

INDEX

A

- Absolute quantification of glycoproteins18
- Agrobacterium-mediated transformation225–232
- Agrobacterium tumefaciens* (*A. tumefaciens*) 226, 228, 254, 260
- Agroinfiltration 234, 239, 241, 263
- Anion-exchange chromatography..... 365, 382, 396, 400
- Asparagine-linked glycans..... 9, 37, 74

B

- Bacterial expression hosts
 - Campylobacter jejuni* (*C. jejuni*).....5
 - Escherichia coli* (*E. coli*)6
- Bisected *N*-glycans 144, 198, 205
- BY2 transformation..... 205, 207, 208

C

- Cell-suspension cultures225–232
- Chemical conjugation.....393
- Chemical modifications.....57, 395, 397, 399, 419–421
- Chemoenzymatic synthesis376, 386
- Colomonic acid oxidized (CAO).....392–394, 397–398, 402
- Colony screen PCR.....20, 26
- Complex *N*-glycans 76, 105, 119, 133, 134, 180, 181, 198, 205, 206, 233, 249, 251–253, 261, 262, 298
- CTS region
 - cytoplasmic tail 198, 205–207, 237, 239, 240, 244, 246, 251–254, 256–260, 263–265
 - and a flexible stem region 239, 240, 251, 252
 - transmembrane domain 239, 240, 251, 252

D

- Disparity mutagenesis technique124, 125
- DMB-derivatization..... 418–420, 424
- DNA assembly159, 270–272, 277, 282, 283
- DNA polymerase δ 124, 126, 127

E

- Electroporation.....59, 63, 64, 107, 110–111, 126, 160, 161, 260, 283, 330
- Endoglycosidase (EndoS)..... 8, 9, 12, 115, 120, 308, 325, 376, 378, 381, 383–385, 387

- Endoplasmic reticulum (ER)..... 4, 49, 74–76, 78, 81, 103, 123, 196, 249, 251, 253, 255, 256, 258, 259, 263, 264, 290, 293, 307, 308, 319, 320, 323, 336
- ER-retention78, 106, 254–259, 263–264
- Exoglycosidase digestion 115, 120

F

- Forward engineering.....18, 20, 21, 26–28, 34
- Fucosyltransferase (FucT)..... 84, 180, 203, 205, 206, 232, 291, 295–296, 339

G

- Galactose (Gal)..... 11, 22, 62, 76, 79–81, 85, 104, 105, 134, 140–141, 143, 144, 171, 172, 179–181, 188, 189, 252–253, 288, 291–293, 299, 300, 308, 310, 318, 320, 323, 336, 346, 355
- β 1,4-Galactosyltransferase (B4GALT1) 105, 139–141, 143, 144, 146, 147, 155, 158, 179–191, 204–206, 214, 225, 226, 230, 246, 250, 252–254, 259–261, 265, 293
- Galactosyltransferase (GalT)..... 158, 159, 180–185, 188–190, 206, 207, 291
- β 1,4-Galactosyltransferase activity assay229
- Gene knockout82, 214
- Gene silencing.....139
- Gene targeting..... 205, 208, 213–222
- GlcNAcase activity assay 181, 182, 186
- Glucosidase104
- Glycan analysis115, 140, 142, 143, 241–243, 262, 330, 332, 348, 408, 432
- Glycans enzymatic transfer..... 135, 383–384
- Glycocompetent *E. coli*.....42–43
- Glycopeptide9, 29, 32, 68, 69, 245, 257, 261, 262, 407, 408, 411, 413, 414, 434
- Glycosidic bond.....4, 6, 37, 84, 422–424, 434
- GlycoSwitch technology.....103–121
- Glycosylation of secreted N-linked acceptor proteins (GlycoSNAP) assay37–46
- Glycosylation processing inhibitors311–312
- Glycosyltransferases (GTs) 11, 38, 50, 61, 62, 79, 104, 106, 117–119, 142, 144, 145, 154, 196, 198–206, 225–232, 234, 235, 239, 244, 246, 251–253, 263–265, 290, 291, 293, 307, 323, 336, 357, 362
- Golgi apparatus targeting 249, 251, 259

H

Homologous recombination (HR) 203, 208, 214, 215
Hybrid *N*-glycans 206
Hypermannosylation 75–78

I

In-gel trypsin digestion 31, 245, 408, 410
Insect expression host
 baculovirus-insect cell system (BICS) 131, 132,
 134–140, 142, 145, 147, 148
 Drosophila expression system (DES)..... 131, 132,
 134, 136, 147, 148
 High Five™ cell line..... 132, 139,
 140, 142, 143, 146, 147
 Schneider 2 (S2) cell line 132
 Spodoptera frugiperda Sf9..... 132
Inverse metabolic engineering (IME)..... 17–35
Isoelectric focusing (IEF) 324, 326, 328–329, 331

L

Lectin
 lectin purification..... 22, 30
 lectin-resistant mutants 327
 lectin selection 313–314, 320
Lipopolysaccharide (LPS) 7, 58, 59, 62–65, 68

M

Mammalian cell culture 74, 299, 300, 361
Mammalian cell transfection 288, 292, 294, 295, 297, 298
Mammalian expression hosts
 baby hamster kidney cells (BHK-21) 289, 292
 Chinese hamster ovary cells (CHO)..... 4, 181, 197,
 288–301, 308, 361
 human embryonic kidney 293T cells
 (HEK 293) 299, 309–315, 320
 murine myeloma cells (NS0 and Sp2/0)..... 289, 292
Mannose 12, 74, 76–78, 81, 82,
 104, 117, 123, 134, 203, 205, 336, 376
Mannosyltransferase (MNN, OCH1)..... 10, 76–78,
 91–100, 104–106, 118, 123
Mass spectrometry
 DSA-FACE 118
 ESI-IT-MS⁽ⁿ⁾ 422, 424
 HPLC 22, 23, 32, 33, 67, 226, 228
 HPLC-ESI-pSRM 22–23, 32–33
 LC-ESI-MS 243, 245, 257, 261,
 262, 377, 380–381, 383, 384, 386, 407–413
 MS/MS, MALDI-TOF MS 183, 187–189, 231,
 408, 413, 414, 418, 419, 421–425, 428, 429, 431, 434
 PGC-LC-ESI-MS 429–430
 ZIC-HILIC 60, 68, 69
Metabolic glyco-engineering 335–357
Modular cloning 270

Monosaccharide analogue

 incorporation 336, 349, 350, 355
 synthesis 336, 351
Moss cultivation 216
MultiBac 153–168
Multigene constructs 269–284

N

N-Acetylglucosamine (GlcNAc) 49–55, 76,
 104, 134, 140, 141, 144, 146, 172, 180, 246, 291, 337,
 376
N-Acetylneuraminic acid (Neu5Ac)..... 171, 173, 201,
 207, 289, 292, 299, 308, 337, 346, 412, 417, 422, 423
N-Glycan preparation..... 112–115, 146, 166
N-Glycan screening 104
N-Glycan trimming 52, 133–134
Nucleotide extraction 364

O

O-antigen 7, 9–11, 55, 58–68
OCH1 knockout 91–100
Oligomannosidic *N*-glycans 153, 154, 428
Oligosaccharides 4–7, 11, 37, 39, 46,
 62, 196, 198, 204, 205, 249, 252, 287, 290, 291, 293,
 296, 297, 318, 352, 427
Oligosaccharyltransferase (OST) 6, 7, 9, 10,
 12, 38–41, 50, 58, 74, 79, 80, 103, 290
O-linked glycans 74, 75, 82–86, 208, 249

P

Pathway engineering 49, 376
pgl gene cluster 9
Pichia transformation 105–107
Plant cultivation 236, 238
Plant expression host
 Arabidopsis thaliana (*A. thaliana*)..... 203, 205–207,
 240, 254, 255, 258–260, 263–265
 Nicotiana tabacum L. cv. Bright Yellow 2 (BY2)..... 226
 Nicotiana benthamiana (*N. benthamiana*) 203–208,
 233–247, 253, 255, 259–264, 269
 Physcomitrella patens 199, 200, 202,
 203, 206, 208, 213, 216
Plant expression vectors 228, 235, 239, 241, 254, 255, 257,
 258, 260, 264
Plasmid libraries 19, 24
PNGase F 12, 109, 114, 118, 168, 309,
 313, 317, 318, 409, 410, 413, 414, 429, 431, 433, 434
Polymerase chain reaction (PCR)..... 18, 20, 24,
 26, 33, 34, 59, 62, 108, 110, 114, 181–183, 185, 215,
 217, 218, 220–222, 239, 253–255, 257–260, 282,
 325, 327, 331
Polysialic acid (PSA) 389–392, 394–397,
 399–402, 417–425
Polysialylation 389–403

Posttranslational modifications (PTMs) 3, 4, 22,
32, 37, 73–75, 80, 86, 91, 93, 94, 98, 100, 171, 196,
207, 233, 234, 287, 288, 361, 384, 407

Protein deglycosylation 313

Protein extraction 21–22, 28–30, 112, 235

Protein glycosylation

- bacteria 3–13, 38, 58, 207
- insect 195–210, 73, 132–135, 137, 140, 147, 203
- mammalian 4, 7–10, 12, 135, 196,
197, 203–205, 207–209, 287, 293, 299, 300
- plant 196, 198, 209
- yeast 73–86

Protein purification

- His-tag purification 21, 28, 30
- Ni-NTA purification 67, 157, 164,
182, 187, 312, 316, 317
- periplasmic purification 21, 28, 29, 58
- protein A purification 262, 330, 381, 383

Protein quantitation 22–23, 30–33, 52, 330

Protoplast transformation and isolation 215–222

Q

Quenching 114, 186, 342, 348, 354, 361–371

R

Recombinant baculovirus 131, 132, 134,
136, 138, 140–143, 154, 162, 173

Recombinant protein 5, 6, 17, 18, 58, 74, 80,
82–84, 86, 93, 131, 132, 134, 138, 140, 141, 147, 148,
155, 196–198, 208, 209, 213, 214, 244–247, 252,
260–261, 263, 264, 288, 292, 298, 300, 324, 329, 378,
389, 390

Reverse phase (RP) chromatography 166, 365,
395–396, 400–402

Ricinus communis agglutinin-I (RCA-I) 323–332, 342

RNA interference (RNAi) 147, 181, 182,
185–186, 188, 190, 234, 294, 301

S

S-alkylation 262, 429–431

SDS-polyacrylamide gel electrophoresis
(SDS-PAGE) 312, 324

Sialic acid (Sia) 76, 104, 133, 171, 179,
197, 233, 288, 310, 323, 337, 385, 389, 412, 417

Sialidase 292, 294

α 2,6-Sialyltransferase (ST6GAL1) 139, 144,
201, 205, 207, 225, 237, 252, 254, 288, 292, 298

Stable transfection of S2 cells 181, 182, 184–185, 190

Subcellular targeting 206, 234, 249–265

SweetBac 140, 141, 153–168

Synthetic biology 269

T

Tetra-antennary *N*-glycans 298

Transglycosylation 8–11, 377, 384

Transient expression 198–202, 206–208,
215, 234, 236, 263, 275, 309, 330

Tri-antennary *N*-glycans 206

Type II membrane proteins 79, 251–254, 258, 263

V

Vacuum infiltration 241, 242, 245

W

Western blot 39, 42, 43, 59, 60,
62, 64, 66, 68, 164, 190, 215, 326–329, 331, 418

X

Xylosyltransferase 196, 199, 203, 205, 249–251, 263

Y

Yeast cultivation

- glycerol fed-batch 95
- methanol fed-batch 96

Yeast expression hosts

- Caenorhabditis elegans* (*C. elegans*) 155, 158, 159, 208
- Pichia pastoris* (*P. pastoris*) 75–83, 85,
91–100, 103–121
- Saccharomyces cerevisiae* (*S. cerevisiae*) 10, 75–79,
81–85, 106, 123, 126, 263

Yeast mutants isolation 125, 126

Z

Zinc finger nuclease (ZFN) technology 324
