

INDEX

A

- Absorption..... 3, 41, 47, 48, 52, 53, 56,
57, 73, 76, 78, 88, 116, 124, 125, 128, 149, 171
- Activatable probes46
- Adipose tissue..... 110, 113, 114, 117, 119, 120
- Analysis of covariance (ANCOVA).....205–206
- Analysis of variance (ANOVA)203–206,
208, 209
- Anatomical priors127
- Anesthetic68, 69, 88, 145, 147, 157
- Animal model..... 49, 58, 67, 128
- Antibody..... 187, 188, 190
- Athymic nude mice30, 39, 41, 75,
78, 169, 176
- Autofluorescence11, 42, 46, 63, 71,
82, 112, 116, 127, 130, 131, 134, 145, 168, 173, 178,
184, 189

B

- Binding
 - affinity 1, 9, 12, 82
 - specificity.....1, 6–7, 11, 12, 76–78
- Bioconjugation 15–24, 28–29, 38
- Biodistribution27, 34, 82, 99, 105,
106, 183–190
- Bioluminescence imaging67–69
- Bioorthogonal.....16, 74
- Blocking6–8, 12, 32, 77–82,
158, 164, 185, 195, 205
- Blood analysis..... 143, 148–149, 151
- Blood collection..... 142–143, 147–148

C

- Cancer27, 30, 33, 38, 45, 55–62,
64, 74, 75, 82, 85, 86, 90, 94, 153
- Carbon nanotubes 167, 169–171, 173–178
- CD13 receptor..... 74, 76–78, 80
- Cell culture3, 4, 10, 78, 100, 102,
103, 157, 158, 184
- Cell tracking.....71
- Charge-coupled device (CCD).....154
- Chi-square test206, 209
- Clonogenic assays2

- Colocalization.....2
- Computed tomography (CT) 46, 86, 153, 154
- Confidence interval207
- Confocal microscopy68, 79
- Conjugation..... 15, 23, 46–48,
52, 98
- Contrast agent27, 28, 46–47, 58,
89, 98, 124
- Control study.....50–52
- Copper..... 140, 142, 144, 149
- Co-registration 155, 158, 161–163
- Coupling reaction
 - amide coupling 15–19, 24
 - catalyst free inverse electron demand
Diels–Alder [4+2] cycloaddition..... 17, 21–22
 - click chemistry (Huisgen
cycloaddition)17, 20
 - Michael addition 15, 17, 20
 - palladium-catalyzed coupling 17, 20–21, 24
 - Suzuki coupling24
 - Thiourea coupling 16, 19–20
- CT-FMT 155, 158, 161–163
- Cyanine dye.....46
- Cytotoxicity.....1–12

D

- Diffraction168
- Diffuse fluorescence tomography (DFT) 123–125,
127, 128, 130, 132–135
- Diffuse optical126
- Diffuse spectroscopy.....55
- 3D imaging..... 87, 110, 154, 161
- Drug delivery..... 97, 98, 160–162
- Drug delivery tracking..... 153, 154, 156–165
- Dye exclusion assays2

E

- Effect size..... 198, 199, 202
- Emission..... 7, 8, 10, 41, 46–49, 55–58,
60, 61, 63–65, 68, 71, 76, 78, 79, 87, 88, 91, 104, 107,
112, 113, 116, 117, 123, 125, 128, 132–135, 140, 141,
150, 153, 154, 157, 158, 161, 162, 170–173
- Enhanced green fluorescent protein
(EGFP)110, 112–114, 117, 118

Enhanced permeability and retention (EPR) effect.....28
 Enzyme2, 37, 46, 57, 58, 139
 Ex vivo imaging..... 34, 183–185, 187–190

F

Fibroblast activation protein alpha (FAP α)..... 37–39, 41
 Fixed-cell imaging.....5
 Flow cytometry..... 68, 98
 Fluorescence imaging 5–6, 11, 27, 29, 30, 32, 34, 46–49, 68, 69, 71, 91–93, 139, 157, 158, 161, 162, 167, 168, 171–173, 185, 189, 193, 194, 199, 200
 Fluorescence lifetime (FLT) imaging 55–62, 64
 Fluorescence microscopy 1–12, 187
 Fluorescence molecular tomography (FMT) 67–72, 154
 Fluorescence reflectance imaging 27–30, 32, 33, 154, 155
 Fluorescence resonance energy transfer (FRET)..... 37–42, 55
 Fluorescence tracer 88, 133
 Fluorescent probe 1–12, 15, 18, 37, 38, 57, 74, 82, 154, 183–189
 Fluorescent protein..... 56, 57, 60, 63, 64, 69, 71, 99, 109, 110, 113, 116–117
 Fluorescent reporter 57, 59, 60, 67–72
 Fluorophore..... 28, 37, 38, 52, 53, 55–57, 69–71, 74, 124, 128, 130, 135, 154, 169, 178
 Frozen sections 164, 184, 187–188
 Fur removal..... 72, 142, 144

G

Goggle system 85–93

H

HDL 153
 Histology analysis..... 50–52
 Hydrogels 98, 99, 101–103
 Hypothesis testing..... 195, 200, 201

I

Image-guided surgery..... 87–90
 Image reconstruction 124, 128–130, 132, 135
 Imaging 55–62, 64
 analysis..... 52
 contrast 46–47, 98, 184
 procedure 58, 145–148
 Immunofluorescent staining 184, 187
 In vitro imaging 22, 38, 57, 60, 99, 140
 In vivo imaging 1–12, 27–30, 32, 33, 38, 46, 49, 60, 140, 141, 148, 173, 183–185, 187–190
 Independent sample 199

Indocyanine green (ICG) 5–6, 10–12, 28–32, 88–90, 94, 190
 Inference statistics 206–207
 Inflammation..... 98–100, 104–106, 177, 189, 199
 Integrin $\alpha_v\beta_3$ 28, 98
 Internal charge transfer (ICT)..... 139, 151
 Intraoperative fluorescence imaging 85–94
 Intraperitoneal injection 145
 Ischemia 45, 46, 49, 50, 189
 Isoflurane..... 30, 49, 50, 58, 59, 68, 78, 100, 104, 126, 127, 142, 144–147, 157, 160–162, 169, 174
 IVIS spectrum 142, 145, 150

L

Lentiviral vector 110
 Live-cell imaging..... 4–5, 139, 140
 Luciferase 67, 71, 157
 Lymph node 89, 110, 112, 117, 118

M

Magnetic resonance imaging (MRI) 46, 86, 88, 91–94, 98, 124–131, 133, 153–155, 157, 161
 Matrix metalloproteinases (MMPs) 37
 Metal ion 139–144, 146, 147, 149–151
 Microenvironment 55
 Molecular imaging..... 27, 57, 123, 124, 133
 Mouse..... 30, 32–34, 41, 49, 50, 58, 60, 62, 64, 68–70, 72, 78, 98, 100, 104, 105, 107, 110, 113, 116, 117, 119, 141, 145, 147, 148, 150, 157, 163, 171–178, 195, 197–200, 203, 209
 MRI-DFT 124–134
 MTT assay 3, 12
 Multimodal imaging..... 86, 91, 92, 99, 117
 Multiphoton microscopy 111
 Multiplate reader 1–12
 Multiplicity adjustment 207–209

N

Nanoemulsions 97–106
 Nanoparticle 28, 58, 154–157, 159–160, 165, 169
 Near-infrared (NIR)..... 38, 46, 73–76, 78, 80, 82, 88, 97–102, 104–107, 189
 NIRFAST 126, 129, 130, 132, 133
 NIR-II fluorescence imaging..... 169, 171–173
 Noninvasive 27, 67–72, 153–155

O

Oncology 55
 One-tailed test..... 201
 One-way ANOVA 204, 208

Optical imaging.....	4, 29, 56–60, 67, 78–81, 99, 126, 127, 184–186	Small interfering RNA (siRNA)	154–156, 160–163, 165
Organ harvesting.....	141–143, 147–148	Smart probe.....	37–42
Organ imaging	146	Standard deviation (SD).....	8, 34, 80, 81, 106, 198, 199, 202, 203, 206, 207
Organic fluorophore	28, 57	Standard error (SE).....	203, 206, 207
Orthotopic tumor	63, 155	Statistical analysis.....	33, 34, 52, 82, 133, 147, 185, 200
P			
Paired sample.....	199–200	Stereoscopic imaging.....	87, 88, 90, 93
Peptide		Subcutaneous mouse tumor model.....	27–30, 32, 33
peptide-based probes	37	Summary statistics.....	206–207
synthesis, 38–40		Surgical navigation	85–93
Perfluorocarbon (PFC).....	98, 100, 104	Synthesis.....	18–24, 38, 39, 74
Perfusion.....	142–143, 147–148, 151	T	
Pharmacokinetic.....	82, 98, 183	Targeting specificity	1, 2
Photobleaching.....	57, 150, 151	Temporal point spread function (TPSF)	56, 62–65
Photo-induced electron transfer (PET).....	139, 140, 151	Terminal deoxynucleotidyl transferase dUTP	
Photon scattering	154, 167	nick end labeling (TUNEL) assay	158–159, 164–165
Polymerase chain reaction (PCR).....	141, 158, 164	Theranostic.....	98, 155
Positron emission tomography (PET).....	46, 73, 123, 153, 154	Therapeutic efficacy	141, 155, 158–159, 164–165
Power analysis.....	198	Third-harmonic generation (THG).....	109, 112, 117–121
Preclinical.....	56, 58, 59, 88–90, 92, 98, 183	Time-domain	56–58, 60
Prostate cancer.....	141, 155, 157, 160–161, 165	Tissue penetration	71, 97, 140, 154, 183
P-value.....	34, 199, 206–209	Transgenic mouse models.....	110
Q			
Quantum dots	28, 71, 169	Transgenics.....	69, 72, 110
Quantum yield.....	55–57, 93, 128	<i>t</i> -test	34, 82, 202–204
Quencher.....	37, 38, 46	Tumor angiogenesis.....	28, 73–76, 78, 80, 82
R			
Randomization	195–197, 199, 200, 209	Tumor targeting probe.....	31, 34
Reactive oxygen species (ROS).....	2, 45–48, 50, 53	Tumor volume	78, 157, 161, 197–199, 207, 208
Repeated measures	197–198, 200, 205–206, 208–209	Two-photon excited fluorescence (TPEF)	109, 114, 115
Reporter gene	69	Two-photon microscopy.....	113–117
Reticuloendothelial system (RES).....	184	Two-tailed test.....	201–202
RNA interference (RNAi).....	153, 155	Two-way ANOVA	204, 205, 208
S			
Sample size.....	149, 198–200, 206, 207	U	
Saturation binding assay.....	7–9, 12	Ultrasound imaging.....	86, 87, 90, 91, 98
Second harmonic generation (SHG).....	109, 112, 113, 115–119	V	
Second near-infrared (NIR-II) window	167–171, 173–178	Variation.....	12, 86, 106, 195, 196, 199, 200, 202–205, 208
Sentinel lymph node (SLN) mapping	86–89	W	
Signal-to-noise ratio (SNR)	121, 123, 167, 174	Wilson's disease	141
Significance level	199, 201, 202	X	
Single-photon emission tomography (SPECT)	123	Xenograft.....	31, 64, 74, 78
Single-walled carbon nanotubes (SWCNTs).....	169–171, 174–178
