

INDEX

A

- Alternative glycosylation5, 7
- 2-Aminobenzamide (2AB).....22, 23, 100, 102, 175, 200, 222, 241, 242
- Automated data analysis.....32
- Automatic alignment.....220, 223
- Automation32, 98

B

- Biopharmaceutical.....44, 49, 265, 266
- Blocking8, 14–18, 43, 121, 157, 160, 171, 172
- Bottom-up proteomics31, 32
- Brain tissue.....v, 207–215

C

- C18-PGC-LC109–118
- Capillary electrophoresis (CE)v, 31, 98, 122, 242, 254–257, 266, 269, 270
- Carbohydrate.....1, 4, 174, 239, 240, 267, 268, 270, 271
- Carbohydrate microarray.....147–162
- Carbohydratesv, 147–162, 240, 266
- Cells3, 34, 83, 97, 124, 132, 151, 168, 185, 197
- Clinical cohorts32
- Cloud-point extraction (CPE),198
- Cotton59, 60, 191, 195
- Cotton HILIC solid-phase extraction.....52, 54–55

D

- Data analysis.....v, 18, 51, 65, 75–77, 103–104, 106, 117, 172, 179
- Databases.....27, 104, 155, 204, 235–261

E

- Ethyl esterification190
- Experimental design.....13–18

F

- Fc glycosylation6, 32, 50
- Fluorophore labeling266, 267, 269
- Formalin-fixed.....131–143
- Free oligosaccharides122, 124–125, 149, 150, 244

G

- Glycan analysisv, 98, 110, 142, 198–202, 266
- Glycan profiling.....32, 98, 197, 218, 219, 223–228
- Glycans.....1, 22, 32, 50, 63, 83, 97, 109, 126, 153, 167, 185, 197, 207, 218
- Glycobioinformatics236, 243
- Glycoform profiling.....36, 43, 46
- Glycomev, 21, 98, 154, 198
- Glycomics.....v, 13–18, 22, 84, 95, 97, 98, 132, 153, 156, 167, 173, 180, 181, 185–195, 207, 217–232, 235–261
- Glycopeptide.....22, 31–46, 49–61, 63, 64, 66–81, 169, 172–175, 181, 182, 237, 243, 244
- Glycopeptide analysis109–118
- Glycoproteomics.....v, 32, 33, 85, 235–261
- Glycosylation.....1, 22, 31, 49, 64, 83, 97, 109, 110, 131, 132, 151, 167, 185, 197, 265
- Glycosylation in disease.....8

H

- High-pressure liquid chromatography (HPLC).....24, 33, 65, 68, 87, 98, 122, 123, 126, 128, 168, 170, 173, 176–177, 179, 181, 188, 200, 202, 236, 242, 254–257, 267–270
- High-throughput.....v, 14, 15, 21–27, 29, 31, 33–36, 39–43, 45, 46, 50, 51, 66, 79, 85, 97–106, 122, 128, 147–162, 185–195, 207, 213, 239, 266–271
- High-throughput glycosylation profiling.....32
- Human milk67, 122, 123
- Hydrophilic interaction liquid chromatography (HILIC)22–26, 51, 52, 54–55, 58, 60, 100, 186, 201–203, 207–215

I

- IgG glycosylation.....33, 50, 55
- Immunoglobulin G (IgG)5–7, 21–27, 29, 31–36, 39–43, 45, 46, 49–51, 53, 55–59, 64, 67, 79, 98, 104–105, 157, 171, 179, 219–222, 224, 229–232, 270, 271

L

- Label-free quantitation.....33
- Laser capture microdissection (LCM),132, 135–137

- Lectins..... 4, 83, 98, 148, 172, 179, 182, 183, 240, 243, 259, 260
- Linkage-specific 56, 171
- Linkage-Specific MALDI-TOF-MS 49–61
- Liquid chromatography 22, 31, 34, 83–85, 87–89, 91–93, 132, 147, 172, 218, 220, 242
- Liquid chromatography–mass spectrometry (LC-MS) 24, 26, 27, 31–37, 39, 40, 42–46, 51, 66, 80, 85, 90, 93, 95, 169, 170, 173, 200, 210, 220
- M**
- Magnetic bead 266–271
- MALDI-TOF-MS 56, 168, 173, 176, 177, 181, 182, 185, 188, 191–195
- Mass spectrometry (MS) 31, 50, 65, 80, 83–85, 87–89, 91–93, 98, 109–118, 121–128, 132, 135, 141, 170–171, 173, 175, 181, 185–195, 237, 241, 257
- Matrix assisted laser desorption/ionization (MALDI) 50, 53, 55, 60, 84, 90, 124, 126, 170, 178, 179, 195, 236
- Membrane proteins 197–204
- Multiple reaction monitoring (MRM) 63–68, 76, 77, 79, 80, 85, 87, 91–93
- N**
- N-acetylneuraminic acid..... 38, 55, 56, 58, 84
- N-glycan 132, 133, 135, 136, 139, 141, 143, 198, 201–203
- N-glycan analysis..... 98, 201, 207, 266–271
- N-glycolylneuraminic acid..... 55, 58, 151
- N-glycopeptides..... 109–118
- N-glycosylation..... 1, 6, 32, 33, 167, 168, 197–204, 265, 266
- N-linked glycosylation..... 239, 240
- Nuclear magnetic resonance (NMR)..... 98, 236, 238, 240–242, 250–254
- O**
- O-GlcNAc..... 6–8
- O-glycan 2, 3, 6, 84, 131–133, 135, 136, 139–142, 152, 175, 237, 243, 250
- O-glycopeptide 109–118, 173
- Oligosaccharides..... v, 121–128, 148–150, 154–156, 239–242, 244
- Omics v, 13, 98, 217, 236, 237
- Online purification..... 85, 91
- P**
- Paraffin-embedded (FFPE)..... 131–143
- Peak detection 32, 218–221, 223, 225, 229, 230
- Permethylation 84, 87, 89–90, 92, 93, 179, 182
- Plant cell wall 147–162
- Plant glycans..... v, 155–156
- Plant glycomics..... 156
- Plasma 8, 22, 32, 35, 42, 50, 51, 53–54, 56, 59, 61, 63, 97–106, 187, 189, 190, 193, 207, 218, 219, 221
- PNGase F digestion 85, 99
- Porous graphitized carbon 126, 132
- Protein enrichment..... 198, 201
- Protein function..... 8, 83, 167
- Protein half-life 3
- Protein structure 243
- PVDF filter plates 185, 190, 193
- Q**
- Quadrupole-time-of-flight (QTOF) -mass spectrometers(MS) (QTOF-MS) 44, 77, 109–118
- Quality score..... 194–195
- Quantitation 27, 39–42, 44, 46, 64, 77, 80, 84, 85, 93–95
- Quantitative glycomics 84
- R**
- Randomization 14, 15, 18
- Replication 14, 15
- Robotic 98–102
- S**
- Serum 22, 35, 38, 42, 51, 53–54, 59, 63–76, 79, 80, 85, 93, 98, 100, 104–106, 123, 171, 180, 186
- Sialic acid..... 4–6, 49–61, 66, 84, 118, 121, 122, 128, 168, 179, 185, 190–191, 254, 256
- Site specific..... 32, 63–68, 76, 79, 80, 109–118, 149
- Solid-phase extraction (SPE) 51, 52, 54–55, 58, 60, 85, 88, 90, 100, 102, 124, 125, 128, 135, 168, 169, 175, 186, 191
- Stabilization..... 185
- Stepping-energy CID..... 110–112, 117
- Subclass-specific 49–61
- Sulphated glycans 182
- T**
- Time-of-flight (TOF) 31, 126
- Triton X-114 198–203
- U**
- Ultra-high performance liquid chromatography 97–106, 198, 242, 254–257
- Ultra performance liquid chromatography system with fluorescence (UPLC-FLR), 21–27, 29
