

# INDEX

## A

- Annexin-A5 (Anx5) ..... 45–47, 49  
Antibodies (Abs) ..... 12, 13, 40, 41, 92, 105, 110, 118–121,  
124, 145, 157, 162, 165, 177, 216, 218, 221–224

## B

- Bead-based assays ..... 215  
Bicuculline ..... 130–132, 134–136  
Bioinformatics ..... 190–192, 194  
Biological fluids ..... 25, 56, 72, 75–77, 87, 129, 154, 156  
Biomarkers ..... 2, 43, 56, 59, 72, 190, 191  
Blood plasma ..... 8, 10, 44  
Brain ..... 133, 135, 136, 140–149, 155, 160

## C

- Capture antibodies ..... 120  
CD9 ..... 36, 118, 119, 121, 154, 162, 169, 217, 219, 222  
CD63 ..... 12, 36–38, 94, 99, 105, 111, 118,  
119, 121, 129, 145, 154, 157, 162, 169  
CD81 ..... 36, 94, 99, 105, 111, 118, 119,  
121, 157, 162, 169, 217, 219  
Characterization ..... 2, 6, 8, 11, 12, 14, 21–26,  
28–32, 36–41, 44, 92–96, 98–113, 130, 140–150, 153,  
155, 161–163, 181  
Cryo-TEM ..... 2, 44–52

## D

- Delipidation ..... 142, 145, 149, 150  
Differential ultracentrifugation ..... 92, 110,  
140, 141, 198  
Digital PCR ..... 55–65, 67, 68  
Drug delivery ..... 43

## E

- Ectosomes ..... 190  
Endothelial cells ..... 205–213  
Erythrocytes ..... 186  
Exosomes ..... 1, 36, 43, 55, 72, 92, 117, 129,  
139, 154, 181, 190, 197, 205, 216  
Extracellular space ..... 139–150  
Extracellular vesicles (EVs) ..... 1, 21, 40, 43, 72,  
91, 117, 129, 141, 154, 155, 177, 189, 197, 205, 215

## F

- Flow cytometry ..... 2, 11–13, 44, 177,  
206, 212, 215, 217, 219–224

## G

- Glutamatergic synapses ..... 130, 134–135  
Gradient centrifugation ..... 13, 92, 110,  
140, 141, 186

## I

- Immunobeads ..... 186, 187  
Immuno-gold labeling ..... 44  
Ion torrent ..... 71, 73–89  
Isolation ..... 36–38, 44, 56, 72–74, 87, 89, 92–96,  
98–113, 140–150, 153–169, 177–187, 191, 197–203,  
206, 208, 218

## M

- Mature neurons ..... 131  
Microparticle ..... 40, 43, 181  
MicroRNA (miRNA) ..... 55–62, 66, 67, 71,  
72, 76, 77, 79, 81, 86–89, 139  
Microvesicles ..... 1, 36, 37, 39, 43, 72,  
92, 117, 136, 153–169, 197, 205  
Multiplexed phenotyping ..... 118–126

## N

- Nanoparticle tracking analysis (NTA) ..... 2, 8–11,  
36–41, 44, 100, 105–106, 112, 129, 207, 212, 217  
NanoSight ..... 36, 39–41,  
100, 105, 207

## P

- Phosphatidylserine (PS) ..... 49  
Physiological flow ..... 205–213  
Platelet-rich plasma (PrP) ..... 155, 156, 159, 163–169  
Platelets ..... 11, 44, 52, 177–187  
Primary neuronal culture ..... 136  
Prions ..... 153–169  
Protein microarray ..... 21, 118–126  
Purification ..... 57, 92, 101, 132–135,  
140, 141, 143, 145, 147–148, 150, 202, 207, 209

**Q**

Qdots® .....38–41  
qNano.....21–24, 27  
Quantification ..... 3, 10, 21, 24, 25, 27,  
29–31, 43–52, 72–73, 112, 145, 164, 166–167, 199,  
202, 207, 218, 223  
Quantitative PCR ..... 56, 62  
Quantum dots ..... 36, 38–39

**R**

Regulated secretion.....130  
Resistive pulse sensing (RPS)..... 2, 14–15, 44  
RNA isolation ..... 72–73, 199–201

**S**

Sequential centrifugal ultrafiltration (SCUF).....92–96,  
98–113  
Shed microvesicles..... 92, 94, 96

Short interfering RNA (siRNA) .....197–203  
Size distribution .....25–29  
Size-exclusion chromatography (SEC) ..... 92, 179,  
181–182, 198, 209  
Small RNA..... 1, 56, 57, 59, 66, 71,  
73–89, 198, 199, 203  
Small RNA deep sequencing.....79, 87  
Sucrose step gradient.....141, 143, 145, 147–148  
Surface antigens..... 118, 119

**T**

Taqman assay..... 56, 57, 59,  
61–62, 66, 199  
Targeting ..... 155, 206  
Transmission electron microscopy (TEM) ..... 1–3, 43–52,  
105

**U**

Uptake ..... 198, 206
