

# INDEX

## A

- Abiotic stress..... 62, 90, 102–104, 106, 107, 109, 110, 159  
*Arabidopsis* ..... 3, 6, 8, 11, 32, 41, 63, 75, 84, 113,  
128, 142, 143, 152, 160, 161, 165, 167, 176, 187, 191  
*Arabidopsis thaliana*..... 3, 6, 8, 11, 32, 41–47,  
49–56, 58, 63, 74–80, 113–123, 125, 128, 143, 161,  
165, 167, 168, 187, 191  
*ARR5:GUS* ..... 152–155  
Auxin..... 1, 31, 43, 62, 73, 84, 93, 103,  
141, 160, 166, 175, 188  
and cytokinins..... 3, 4, 31, 32, 61–71, 84, 90, 91, 93  
signaling and metabolism ..... 2–11  
transport ..... 3, 7–11, 17, 50

## B

- Boolean models ..... 84, 88, 90

## C

- Cell cycle ..... 152  
Clubroot-disease..... 41, 43, 48, 49, 55, 58  
Crosstalk..... 15, 16, 31, 84, 94, 103, 141, 166, 175–184  
Cyst nematodes ..... 74–80, 151, 152, 155  
Cytokinin (CKs)..... 1, 31, 43, 62, 73, 84, 93,  
101, 113, 127, 141, 152, 160, 165, 175, 188  
signaling ..... 12–18, 74–80, 121, 152, 155, 166–172

## D

- Defense responses..... 113, 122, 135, 136,  
141, 160, 161, 166, 168  
Derivatization..... 32, 103, 178–181, 183  
Dexamethasone (DEX) ..... 128–131, 133–137, 142

## E

- Ecology..... 127  
Electron-impact tandem mass spectrometry  
(EI-GC-MS/MS) ..... 175

## F

- Fieldwork ..... 130, 133, 135

## G

- Gene regulation ..... 18, 58, 83, 187, 188, 190–199  
Giant cells..... 151  
 $\beta$ -Glucuronidase..... 44, 70, 147

## H

- H<sub>2</sub>O<sub>2</sub>..... 99, 159–162  
High resolution mass spectrometry (HRMS)..... 103  
High-throughput..... 83, 94, 114, 120, 187, 188, 190–199  
Hormone immune network..... 85, 86  
Hormone responsive promoter ..... 43  
Host-pathogen interaction ..... 142–149  
*Hyaloperonospora arabidopsidis*..... 113–123, 125, 166

## I

- Immunity..... 83–91, 113–123, 125, 141, 166  
Immunoblotting ..... 98  
Indole-3-acetic acid (IAA)..... 2–6, 8, 9, 12, 16,  
31, 32, 44, 50, 52, 58, 62–64, 66–70, 73, 74, 76, 84,  
93, 96, 160, 176, 177, 179, 181–183, 188, 199  
Infection assay ..... 80  
In-gel kinase assay ..... 95, 98  
Interactome ..... 83, 166–172  
Internal standard ..... 33–37, 66, 67, 71, 104,  
106, 107, 176, 179, 181, 182  
Isopentenyl transferase (IPTs)..... 16, 127

## J

- Jasmonic acid (JA)..... 44, 62, 141, 142,  
160, 176, 177, 179, 181–183

## L

- Lateral root..... 10, 47, 73, 74, 76–79  
LHGR..... 128–137  
Liquid chromatography..... 103, 177, 178  
Luminol..... 161, 162

## M

- Mass spectrometry..... 103, 176–177, 179–181  
Mitogen activated protein kinase (MAPK)  
assay..... 94–99

## N

- Nematode..... 74–80, 151–154, 156, 157, 166  
Network simulation ..... 83, 85–87

## P

- Pathogen-inducible promoter ..... 142, 144, 146–147  
Pathway prediction ..... 84

Phytohormones .....32, 37, 62, 66, 67, 69–71, 73, 84, 90,  
 93, 103, 135, 141, 160, 162–163, 175, 177, 183, 188  
 Plant hormone .....1, 3, 31, 33, 43, 44, 58, 62, 70,  
 84–86, 91, 101, 103–105, 113, 127, 142–149, 175–181  
 Plant hormone analysis..... 32, 181  
 Plant immunity .....83–91, 113, 141, 166  
 Plant micro interactions .....62  
*Plasmodiophora brassicae* ..... 42–47, 49–56, 58  
 pOp6 ..... 128–137  
 Protoplast .....42, 187, 188, 190–199  
*Pseudomonas syringae*..... 63, 64, 142, 143, 146–147, 166

**Q**

Quantification ..... 35–36, 64, 67, 68, 98, 99, 102–104,  
 106, 107, 109, 110, 113–123, 125, 160, 176, 177  
 Quantitative-Real Time PCR analysis  
 (qRT-PCR) .....97–98

**R**

Reactive oxygen species (ROS)..... 159, 160, 162–163  
 Root-knot nematodes (RKN).....74, 76–78, 80, 151, 166  
 Root structure architecture (RSA)..... 47, 95, 99

**S**

Scintillation counter ..... 161, 162  
 Screening..... 3, 6, 8, 12, 13, 66, 85, 114,  
 130–133, 136, 187, 188, 190–199  
 Signaling..... 3, 9, 10, 13–18, 43, 49, 50,  
 52, 62, 74–80, 83, 90, 93, 127, 141, 175, 176  
 Signaling network.....62, 93  
 Solid-phase extraction (SPE) .....32, 33, 35, 37,  
 64, 67, 104, 106, 107, 178–180, 183  
 Stable isotopes .....33, 37, 63, 67,  
 176, 179, 181  
 Stress response ..... 152, 175–184  
 Syncytium..... 151, 152

**T**

*TCSn:GFP*..... 152, 153,  
 155–156  
 Transcription factor ..... 5, 6, 9, 12, 13, 16, 17,  
 53, 62, 90, 94, 128, 152, 165, 187, 188, 190–199  
 Transcriptomes .....3, 14, 94, 152,  
 166–172, 176  
 Transient plant transformation .....144
