

# INDEX

## A

Aggregate ..... 2, 8–15, 20, 22, 24–28, 32, 37–38,  
41, 44, 58, 63, 64, 69, 72, 75–79, 81, 104, 105, 113,  
114, 125, 126, 131–133, 136, 142, 143, 147–149, 159,  
164, 181, 198, 202–204, 222, 227

Artificial extracellular matrix ..... 44

## B

Barx1 ..... 217, 218, 223, 225

Bioengineered hair follicle ..... 118, 124–133

Bioengineered lacrimal gland ..... 153–164

Bioengineered salivary gland germ ..... 136, 138,  
139, 141–150

Bioengineered small intestine ..... 229–230, 232,  
238, 240–242

Bioengineered tooth ..... 98–100, 102, 104–115

## C

Cell-manipulation ..... 98, 112, 114, 133,  
136, 149, 154

Cerebellar development ..... 32

Cerebellum ..... 31, 35, 38–40

Cerebral cortex ..... 1–2

Ciliary margin ..... 17, 26–29

Culture ..... 2, 17, 32, 43, 58, 68, 86, 98,  
119, 136, 154, 168, 183, 196, 207, 218, 230

Cyst ..... 44–54

## D

3D culture ..... 1–3, 9–12, 14, 31–41, 44, 67, 68,  
76, 78, 86, 179, 181, 186, 189, 191, 203, 218

Definitive endoderm (DE) ..... 168, 172–177,  
208, 212, 234

Development ..... 2, 9, 17, 31, 32, 43–45, 58, 59,  
67–70, 85, 86, 97–99, 102, 108, 113, 118, 135, 136,  
139, 148, 150, 153, 154, 157, 160, 164, 168, 169,  
180, 192, 196, 197, 207, 208, 217, 230

Differentiation ..... 2, 17, 31, 43, 58, 68,  
85, 98, 117, 153, 168, 180, 196, 207, 217, 230

Directed differentiation ..... 67–81, 172, 195,  
197, 202, 204, 205

Disease model ..... 32, 70, 180, 217

Dkk-1 ..... 219

Drug development ..... 207

## E

Early embryogenesis ..... 196

Embryonic stem cell (ESCs) ..... 1–3, 9–12,  
14, 17, 25, 27, 43, 45, 46, 54, 58, 60–64, 67, 68, 76, 78,  
85–95, 168, 197, 217, 222, 224–226, 234

## F

Foregut ..... 168, 169, 172–173,  
175, 217, 218

## G

Ganglionic eminence ..... 1, 2

Gastric organoids ..... 168

## H

Hair cells ..... 67–69, 78, 79

Hindgut ..... 168, 170, 172–176

Hippocampus ..... 1, 2

Human ESCs ..... 1–15, 17–29, 33, 36–41,  
58–64, 171, 198–202

Human-induced pluripotent stem cells (iPSCs) ..... 28, 31,  
32, 168, 180–182, 187–189, 191, 207, 208, 210–211,  
214, 215

Human intestinal organoids (HIO) ..... 170, 230–242, 244

Human pluripotent stem cells (hPSCs) ..... 31, 35,  
38–40, 168, 169, 171, 173, 174, 195–197, 199–202,  
204, 205, 207, 230, 231, 234

Hypothalamus ..... 58

Hypothyroidism ..... 93

## I

Inner ear ..... 67, 68, 76, 78

Intermediate mesoderm ..... 180, 196–198,  
202–204

Intestinal organoids ..... 168, 176

In vivo Model ..... 229–244

Isthmic organizer ..... 31, 35, 38–40

## K

Kidney capsule ..... 89, 193, 230, 236, 237

Kidney developmental ..... 196

Kidney organoid ..... 195, 197,  
202, 204, 205

**L**

Lacrimal gland germ ..... 153–162, 164  
 Liver bud ..... 207, 209, 212–214  
 Lumen ..... 15, 44, 45, 244

**M**

Medial pallium ..... 2–3, 11–13  
 Mesentery ..... 238, 239, 244  
 Metanephric mesenchyme (MM) ..... 179, 180, 195, 196, 198  
 Mouse embryonic stem cells (mES) ..... 17, 43, 54, 58, 67, 68, 76, 78, 207, 217, 222, 224–226  
 Mouse pluripotent stem cells ..... 67  
 Multicellular interaction ..... 207

**N**

Nephron progenitor cells ..... 179–181, 183–185, 188–190  
 Neural differentiation ..... 6, 8, 10, 11, 45  
 Neural retina (NR) ..... 17, 22, 24–27, 29  
 Neural tube ..... 43–54  
 Neuroepithelium ..... 9, 10, 15, 37, 38, 44–46, 54

**O**

Optic-cup ..... 17, 22, 85  
 Organ culture ..... 98, 100, 105, 106, 108, 109, 112, 114, 115, 119, 120, 126, 132, 136, 137, 142, 144, 147, 150, 155–157, 159–161  
 Organ germ method ..... 98, 104, 118, 136, 154, 160  
 Organoid ..... 43–45, 68–70, 168–177, 195, 197, 202, 204, 205, 217–227, 230, 231, 233–239, 241  
 Organ replacement regenerative therapy ..... 97

**P**

Patterning ..... 2, 8, 32, 44–46, 49, 51, 52, 54, 234  
 PEG hydrogel ..... 44, 45, 47, 49, 50, 52, 53  
 Pituitary gland ..... 58, 85

Pluripotent stem cells (PSCs) ..... 2, 31, 35, 38–40, 69, 86, 168, 169, 173, 174, 179, 181, 186, 189, 191, 195–205, 217  
 Primitive streak ..... 196, 197  
 Purkinje cells ..... 37–41

**R**

Regeneration ..... 97–115, 117–133, 135, 139, 140, 143–146, 154, 207–215  
 Regenerative medicine ..... 17, 31, 57, 207, 217  
 Retina ..... 17, 19, 24, 26, 85  
 Retinal pigment epithelium (RPE) ..... 17, 18, 22, 24–29

**S**

Saliva secretion ..... 146, 150  
 Salivary gland ..... 135–150, 154  
 Self-organization ..... 38, 118, 136, 198, 202  
 Sensory epithelium ..... 68, 69, 78  
 SFEBq ..... 2–3, 8–10, 13–14, 17, 21, 23, 28, 58, 64  
 shh ..... 2, 8, 11, 44–46, 51, 53, 54, 219  
 Stomach organoids ..... 218, 224, 225

**T**

Telencephalon ..... 1, 2, 11  
 Three-dimensional kidney structure ..... 179–193  
 Thyroid development ..... 86  
 Tissue formation ..... 15, 57–65, 225  
 Tooth regeneration ..... 97, 102–104, 106, 107, 109–111  
 Transplantation ..... 89, 91–93, 98–100, 105–112, 115, 118, 120, 125–129, 132, 136, 137, 142–147, 150, 154, 155, 159–162, 164, 179, 180, 189–191, 212, 230, 232–240, 242–244

**U**

Ureteric bud (UB) ..... 179, 196

**V**

Vestibular ..... 67, 69
