

# INDEX

## A

Aggregation ..... 109, 126  
 Aggregation-prone regions (APRs) ..... 110–113,  
 116–124, 126  
*Agrobacterium*-mediated transformation ..... 16, 17, 20,  
 24–26, 37, 41–43, 46  
*Agrobacterium tumefaciens*..... 16, 17, 32,  
 46, 113, 114, 145  
 Artificial transcription factor..... 197  
 Assimilates ..... 3

## B

Biolistic transformation ..... 21, 22  
 Bisulfite conversion ..... 186, 187, 191, 193  
 BLAST search ..... 111  
 Bombardment ..... 16, 17, 21, 26–29,  
 32, 35, 36, 41, 135, 137  
 BSR-seq ..... 97, 99–102, 106  
 Bulk embryo isolation..... 55

## C

Causative mutations ..... 97  
 Chimera ..... 79  
 Chloroplasts..... 65, 113, 166, 168, 179, 195  
 Chromosomal integration ..... 98  
 Clustered regularly interspaced short  
 palindromic repeats and associated  
 protein 9 (CRISPR-Cas9) ..... 198–202  
*Cucumber mosaic virus (CMV)* ..... 130, 141–143,  
 148, 149

## D

DNA methylation ..... 86, 185–195

## E

Electroporation ..... 41, 46  
 Elite inbred line..... 43, 46  
 Embryo transfer ..... 29, 52  
 Endosperms ..... 25, 35, 50–52, 56,  
 69, 70, 76–79, 98, 154, 161  
 Excision assay ..... 153  
 Exome-seq ..... 98, 99, 102, 104, 106

Expression control ..... 64  
 Expression profiling ..... 62, 63

## F

Founders ..... 105  
 Freeze-drying ..... 49  
 Freezing ..... 36, 119, 145,  
 172, 211, 222  
 Functional genomics ..... 98, 99, 141

## G

Gateway cloning..... 201, 208, 210  
 Gene silencing ..... 129, 141–149  
 Gene targeting..... 65, 116, 129, 131,  
 133, 138, 142, 144–149, 197, 198, 203  
 Genetic engineering ..... 62, 85  
 Genetic transformation ..... 16, 17, 77  
 Genotyping..... 16, 17, 42, 53,  
 137, 186, 219  
 Golden Gate assembly ..... 200, 207, 208, 210  
 Grain ..... 3  
 Green fluorescent protein (GFP) ..... 113,  
 115, 121, 124, 125, 143, 146

## H

High-spatial resolution ..... 217, 230

## I

Immature embryos..... 23, 42, 43,  
 46, 48–53, 55–57, 113  
 Inbreds..... 12, 15,  
 46, 78, 79, 99, 113, 130, 142, 148, 149, 156, 219  
 Inducible systems ..... 66, 79  
 Insertional mutagenesis ..... 98  
 Insulators ..... 70  
 In vitro ..... 3–13, 46, 80

## K

Kernel..... 3, 24,  
 25, 32, 34, 35, 50, 51, 55, 56, 98, 100, 107, 146,  
 147, 153  
 Knockouts ..... 110, 198

**L**

Laser-capture microdissection ..... 153–162  
Lipids ..... 217

**M**

Maize ..... 3, 15–38, 41–57, 61–86,  
97, 109–126, 129, 153, 165, 217–230  
  functional genomics ..... 99, 141  
  promoters ..... 63, 66, 69, 70, 86  
  transformation ..... 16, 18, 32, 41, 66,  
68, 113, 114, 122  
Mannose selection ..... 55  
Mass spectrometry imaging (MSI) ..... 217  
Matrix-assisted laser desorption  
  ionization (MALDI) ..... 217, 230  
Matrix attachment regions (MARs) ..... 64, 70  
Metabolism ..... 3  
Metabolites ..... 3, 217  
MicroRNAs (miRNAs) ..... 200, 201, 203, 207  
miRNAs. *See* MicroRNAs (miRNAs)  
Monocots ..... 43, 62, 142, 202  
Mosaic ..... 64, 66, 135  
Mouse ..... 115  
Multiplex ..... 197–213, 219, 226  
Mutagenesis ..... 97–107

**O**

Opaque ..... 30, 98–100, 106  
Overexpression ..... 43, 110, 111, 113, 114, 122  
Ovules ..... 3, 7, 8, 12, 13, 105

**P**

Particle bombardment ..... 16, 17, 41, 42  
Phenotypes ..... 65, 98, 100,  
105–107, 113, 123, 130, 135–138, 141, 147  
Phosphomannose isomerase (PMI) gene ..... 43,  
47, 54, 56  
Physiology ..... 3  
Plant transcriptional regulation ..... 197–213  
Plasmids ..... 17, 18, 32, 35, 36, 46,  
114, 115, 117, 118, 123, 130–135, 137, 143,  
145, 148, 201, 203, 206–209, 211, 212  
Polymerase chain reaction (PCR) ..... 65, 98,  
99, 102, 105–107, 124, 132–134, 143–145, 147,  
148, 160, 169, 174–177, 186, 187, 190–195,  
200, 205–207, 210, 212  
Protein interference ..... 109  
Protein knockdown technology ..... 109

**R**

Ribo-seq ..... 165, 168, 174–181  
Ribosome profiling ..... 165–181  
RNAi ..... 197  
RNA silencing ..... 129, 137, 142

**S**

Sequence capture ..... 186  
Sequence-specific aggregation ..... 109–126  
Sequencing ..... 62, 98–100, 102, 104–107,  
124, 132, 134, 165–168, 170, 178, 179, 185  
β-Sheet inclusions ..... 110  
Single-base resolution ..... 185

**T**

Tissue-specific promoter ..... 79, 113  
Transcriptional activator ..... 199, 201  
Transcriptional repressor ..... 199–201, 210  
Transcriptome ..... 62, 86, 154, 198  
Transfer pipettes ..... 52, 53  
Transgenes ..... 42, 61, 62, 70, 72, 76–78, 85  
  silencing ..... 119  
  instability ..... 42, 43  
Transgenesis  
  stable ..... 42, 43  
  transient ..... 43  
Transgenic events ..... 35, 43, 46, 55  
Translation ..... 18, 64, 65, 123, 165, 166, 179  
Transport ..... 71, 79  
Transposons ..... 97, 185  
Type I callus ..... 17, 27, 29, 30, 37

**U**

5′-Untranslated region (UTR) ..... 64–68

**V**

Vascular puncture inoculation ..... 142, 143  
Vectors ..... 16–18, 21, 24, 32, 42, 43, 46,  
55, 70, 113, 114, 117–119, 122, 124, 129, 141,  
200–202, 204, 207–213, 227, 228  
Virus-induced gene silencing (VIGS) ..... 129–138, 141

**X**

X-gal staining ..... 205, 208, 212

**Z**

*Zea mays* ..... 41, 78, 109, 117, 130, 156
