

INDEX

A

- Achromobacter* sp..... 20
- Acid Orange 7 298–300, 302, 303, 305–307
- Adsorbent dosage..... 250, 260
- Adsorption kinetic study.....248, 249, 254, 255
- Advanced oxidation processes (AOPs)36, 37
- Advanced oxidation/reduction processes (AO/RPs)... 34
- Aerobic marine environment
- ASTM standards..... 376
- Aerobic/anaerobic pathway 210
- Ag nanoparticles
- agglomeration 286
- antimicrobial activity 285
- antimicrobial protection 286
- biodegradation 287
- burial testing..... 288
- cellulose fibers 284
- cellulose polymerization 285
- cotton and cotton/PET fabrics 286
- dip-coating method 287
- enzymatic degradation 287
- enzymes and microorganisms..... 292
- fabric weight loss 288
- FTIR analysis 285, 287, 292
- fungus hyphae protruding 290
- mycelium 290
- oxygen plasma 292
- PET component 287
- SEM 289
- soil microorganisms 285
- soil types 292
- textile materials..... 292
- textile nanocomposites 285
- TiO₂ NPs 291
- XPS analysis 289
- XRD measurements 287
- ZnO NPs 292
- Aging 62
- Alcaligenes* sp..... 9
- Algal cell density..... 334
- Alkyl sulfates 320
- Alkylphenoethoxylates (APEs)
- alkylphenols 9
- bacterial degradation pathways 9
- carboxylated derivative [nonylphenoxy(ethoxy)]acetic acid 9
- compounds 9
- cultivation method 9
- endocrine system 9
- fungi 9
- genera 9
- 1-hydroxybenzotriazole 9
- laccase 9
- nonylphenol 9
- nonylphenoldiethoxylate 9
- octylphenoethoxylates 9
- oxidative and non-oxidative biodegradation pathways 9
- P450 genes 9
- polyethylene glycols 9
- residual recalcitrant degradation products..... 9
- Alkylphenols (APs)..... 5
- Alkylpolyglucosides 322
- Alkylpolyoxyethylene sulfates 320
- Allium cepa*..... 299–301
- Alternaria alternata* 287
- Ames test 216–220, 233
- Aminoglycosides 50
- Aminomethyl phosphonic acid (AMPA) 220
- Anaerobic toxicity assay (ATA) 45
- Androgen receptor gene (AR) 197
- Anionic surfactants
- structure toxicity 321
- Anthraquinone 243
- Antibiotic resistance genes (ARGs)..... 31
- Antibiotics
- acute toxicity tests 41
- adsorption 34
- adverse effects 32
- aminoglycosides 50
- anaerobic digestion 51
- applications 51, 52
- bioassays..... 38
- biodegradability tests 41
- biodegradation 34, 40
- biodegradation process 30
- biological treatment 32
- categorization 30
- chronic toxicity tests 33

Antibiotics (<i>cont.</i>)	
chronic/sub-chronic toxic tests	41
confirmatory techniques	39
consumption rate	30
ecotoxicology and toxicology tests	38
environmental toxicology tests.....	38
glycopeptides	50
<i>in situ</i> experiments.....	38
inhibitory effects	38
ISO.....	33, 45
microbial communities	
macrolides.....	47, 48
quinolones	49, 50
sulfonamides	48, 49
tetracyclines	46, 47
β-lactams	44, 46
microbial community.....	33
microcosm and mesocosm.....	38
microorganisms	32
OECD.....	33, 44
oxidation/reduction reactions	34
photodegradation, hydrolysis and thermolysis.....	34
resistance genes	31
sub-lethal effects/death and lethal effects.....	33
toxic effects.....	32, 39
toxicity test	39, 40
water bodies.....	30
WWTPs	
adsorption process.....	36
AOPs.....	36, 37
biological treatment process.....	35, 36
Aquatic environments	298
Aquatic plants.....	245
Aquatic toxicology tests	
bacteria.....	42, 43
<i>Artemia</i> sp.	
cysts of	193
<i>Aspergillus flavus</i>	9
<i>Aspergillus terreus</i>	9
ASTM D 5988-03 standard method	284
ASTM D 6691-09 parameters	377
ASTM D 6692-01 parameters	377
ASTM D 7473-12 parameters	378
Autism spectrum disorders (ASDs).....	6
Auxochromes.....	242
Azo dyes	298
<i>Azomonas agilis</i>	42
B	
<i>Bacillus</i> sp.	279
<i>Bacillus subtilis</i>	271, 272, 274, 278
<i>Bacillus thuringiensis</i>	20
Bartha and Pramer respirometer	208, 209
Benzene, toluene, ethylbenzene, and xylene mixture (BTEX).....	224, 229, 234, 235
Benzyl-butyl phthalate (BBP)	6
Binomial analysis	70
Bioaccumulation	242
Bioassay test	
toxicity	361, 362
Bioassays	
advantages.....	216
bioremediation	215
cell culture	226–231
compilation of.....	233
data.....	236
environmental samples bioremediation	216
eukaryotic organisms	216
higher plants.....	221–225
<i>in vitro</i>	236
<i>in vitro</i> assays with mammal cells.....	217
living organisms	232
physical, chemical and biological parameters	232
plants.....	232
prokaryotes	216, 232
prokaryotic	217–220
scientific literature	217
secondary pollution.....	231
toxicity of sample	216
Biochemical oxygen demand test (BOD ₅)	
acclimated culture	187
acting microorganisms	187
indirect measurement	186
limitations	187
materials	186
methods	186
microbial consumption	188
non-irradiated mixture.....	188
O ₂ and CO ₂	188
photocatalytic and photochemical pretreatment...	187
principle	185
procedure of	186
unavailability of seed	187
water samples.....	187
Biodegradability	
classification models.....	181
CORAL software.....	148–150, 182
molecular features	154, 179–181
organic pollutants	147
QSAR. <i>see</i> Quantitative structure—activity relationships (QSAR)	
qualitative models	147
training, invisible training, calibration and validation sets	151
Biodegradation	
absorbance values	300
adsorption/biosorption	305, 306

amino and sulfonic acid groups.....	275	linuron	60
azoreductase enzymes.....	307	mass spectrometry.....	58
bioassays.....	307	mineralization process.....	60
broth media preparation	271	organic transformation products.....	60
<i>Burkholderia</i> Sp. BBK_9 Strain	92	residual toxicity	60
complimentary stretching band	307	Biopurification systems (BPS)	
decolorization treatment	300	biomixture	58, 59, 70
dyes	271	commercial product spills	57
environment and human health	270	configurations.....	58
environmental pollution	269	dissipation half-life (DT ₅₀)	71
FT-IR spectroscopy.....	306	humic component.....	58
H acid	270, 272, 274–279	implementation	58
industrial textile effluent	270	kinetics analysis.....	69
infrared spectrum	306	lignocellulosic substrates.....	58, 59
inoculum preparation.....	272	metabolically active microbial community	59
liquid effluent pollutants.....	270	microbial degradation	58
LOD and LOQ.....	274	mineralization	69
mobile phase composition and chromatic		monitoring procedures	60, 62, 63
conditions	272	mortality/immobility.....	70
–NH bonding vibration.....	307	pesticides.....	57
photosynthetic process	270	physicochemical/biological systems	58
phytodegradation	245	pollution events	58
phytotransformation	245	probit analysis	70
propiconazole	89	soil types	59
RSD.....	272	triplicates.....	69
<i>S. cerevisiae</i>	302, 305	Bioremediation	303
SA gel beads	89	bacterial.....	228
stages.....	270	by vermicomposting	222
synthetic dye.....	269	contaminants	216, 217
synthetic dyes	270	endosulfan	81
UV-Vis spectrophotometry.....	300	environmental samples.....	216
waste water	270	<i>Escherichia coli</i>	80, 83
Bioindicators.....	221	living organisms	231
Biological methane potential (BMP).....	45	SCFC	225
Biomagnification	242	stability of	216
Biomass settleability testing		Bioremediation approaches	58
materials.....	202	Biosorbent	247–246
methods	202	Biosorption isotherms.....	250, 251, 260, 261
microalgal/bacterial biomass settleability.....	203	Bisphenol A (BPA).....	3, 4
microalgal-bacterial systems	202	bacterial strains	9
pipetting	203	compounds	9
settleability.....	201	endocrine disrupting properties	8
suctioning	203	environmental water and soils	8
wastewater treatment.....	201	estrogenic activity.....	9
Biomixture efficiency		extracellular enzyme systems	9
aging	65, 68, 69	fungal mycelium growth.....	9
biological transformations	58	hydrophobic compounds.....	8
carbofuran.....	60	3-hydroxybutyric acid	9
chlorpyrifos.....	60	immobilized laccase and tyrosinase	9
chlorpyrifos hydrolysis	60	metabolites	9
diverse transformation products/metabolites	58	petrochemical wastewater	9
ecotoxicological assessment.....	60	soil aggregates/non-reversible sorption	8
insecticide/nematicide carbofuran.....	60	wastewater treatment plant	8
isoproturon.....	60	yeast extract and mineral salts	9

Bisphenol F (BPF)	8	temperature, 4 °C	128–130

<i>Salmonella</i> /microsome test.....	217
Scanning electron microscopy (SEM).....	284
Screening information dataset (SIDS).....	366
SDS-PAGE analysis.....	91
<i>Selenastrum capricornutum</i>	324
<i>Septoria</i> spp.....	88
<i>Serratia marcescens</i>	20
Seubert's mineral salts medium (MSM).....	88
Sewage treatment plant.....	7
Short-term chronic bioassays.....	334
Simplified molecular input-line entry system (SMILES).....	148–150, 152, 154, 174, 178
Simulation (ST).....	364
Slurry phase bioremediation, cell immobilization. <i>See</i> Phenanthrene (PHE)	
Soil burial testing.....	291
Soil microbial metabolic efficiency (SMME).....	124, 125, 131, 135, 136
Soil microorganisms.....	293
Solid retention time (SRT).....	35
Solid waste management.....	281, 282
Sorbent dosage.....	247
SOS-Chromotest.....	216
<i>Sphingobium</i> sp.....	20
<i>Sphingobium yanoikuyae</i>	9
<i>Sphingomonas bisphenolicum</i>	9

Sphingomonas sp 9

Standard testing method

 OECD guidelines 366, 367

 ASTM biodegradability tests 367, 368

 OECD biodegradability tests 367

Stereum hirsutum 9

Structure-activity relationships (SARs) 356

Sugarcane bagasse (SCB) 225

Sugarcane filter cake (SCFC) 225

Sulfamethazine (SMN) 49

Sulfamethoxazole 35

Sulfonamides 48, 49

Sulforhodamine B (SRB) assay 199, 201

Superoxide dismutase (SOD) 91, 98, 99

Surfactants

 applications 312–314

 challenges 325, 326

 ecotoxicity. *see* Ecotoxicity

 ecotoxicological characterization 317, 318

 environmental properties 323, 324

 legislation 313, 315, 316

 production data 311

 structure-toxicity relationships 315, 317

T

Teicoplanin 50

Temkin isotherm 265

Tempkin isotherm 251

Tetracyclines 37, 46, 47

Textile effluent

 BOD 243

 chemical and thermal regeneration 244

 COD 244

 dyeing processes 243

 purpose 243

 treatments and restrictions 244

 water system 243

Thermal conductivity detector (TCD) 186

Thiazolyl Blue Tetrazolium Bromide 226

Total Organic Carbon (TOC) 9

Toxicity identification evaluation (TIE) 338, 339

Toxicity reduction evaluation (TRE)

 causative factors 338

 chemical and allied products plant 339–341

 drugs and medicines manufacturing plant 340

 fabricated metal products plant 338, 339

 miscellaneous manufacturing plant 342–344

Toxicity tests 300

Toxicological concern (TTCs) 355, 356

Trametes versicolor 9

Trametes villosa 9

Transformation products (TPs) 30

Tricarboxylic acid (TCA) 14

Trichloroacetic acid (TCA) 200

Triphenyl formazan (TPF) 211

Triphenylmethanes 227

Triphenyltetrazolium chloride (TTC) 211

U

Ultraviolet (UV) disinfection process 37

US Environmental Protection Agency (USEPA) 221, 317

UV-Vis spectrophotometry analysis 302, 305

UV-Visible spectrophotometer 246, 272, 274

V

Vancomycin 50

Variovorax sp. 20

Vibrio fischeri 33, 42

W

Wastewater treatment plants (WWTPs) 30

Water hyacinth (WH) 246, 249, 253

Whole-effluent toxicity (WET)

 acute, sub-chronic and chronic assays 345

 aquatic ecosystems 331

 bioassay-based regulations and biological methods 332

 bioassays 343, 345

 biological testing 332

 cysts and cryopreservation 345

 Japan

 AAP/OECD medium 334

 algal growth inhibition test 334

 cladocerans and algae 336

 environmental protection 337

 freshwater short-term chronic tests 333

 industrial plants 334

 industrial wastewater 333

 monochloramine 336

 neonate daphnia 335

 NOEC 336

 short-term toxicity testing 335

 survival and hatching rates 335

 USEPA 336

 short-chronic assays 332

 temperature-controlled chambers and clean bench 343

X

X-ray diffraction (XRD) 284

Z

Zebrafish embryo toxicity assay 345
