

INDEX

A

- Accelerated evolution53
Affinity chromatography157

B

- Biochemical assays.....11
Biotypes..... 2, 11–26, 50
Bradford 118–120, 123–127, 131, 167

C

- cDNA synthesis.....30, 31, 34, 35
Cell envelope 136, 171, 172
Cholera..... 1–7, 11–26, 29–51, 53–63, 65–75, 77–95,
97–101, 103–115, 117, 119, 130–132, 135–144,
147–151, 153–169, 171–177
Chromatin immunoprecipitation (ChIP)65–75
Classical..... 2, 4–7, 11–17, 23, 50
Collagenase.....153–169
Collagenolytic proteases153–169
Colonization.....2, 12, 77–95, 98, 100, 101, 147–151
Combinatorial mutagenesis53
Competitive index148, 150
Confocal microscopy86, 92
Cotransformation53–63

D

- Density gradient purification..... 118, 123–124
Diarrhea1, 2, 11, 45, 98, 105, 135
2D-LC-MS/MS171
DNA-binding proteins..... 65, 66, 69, 72, 73
DQ-gelatin..... 154–156, 159, 165, 167
Drosophila melanogaster83–84

E

- El Tor2–7, 11–17, 23
El Tor variants 2, 12–17

F

- Fruit fly.....77
Furanacryloyl-L-leucylglycyl-L-prolyl-L-alanine
(FALGPA)154, 156–157, 160, 166

G

- Growth3–7, 13, 23, 24, 26, 46, 61–63, 73, 78, 86,
87, 93–95, 105, 137, 139–142, 154, 155, 157, 158,
162, 166

H

- High-throughput screening..... 137–138, 140–142
House fly79, 81–83, 89–92

I

- Illumina 30, 31, 35, 36, 106, 107, 112–114
Immunoblot.....118, 119, 121–122, 124, 127–128, 133
Immunoprecipitation.....65–75
Infant rabbit103–115
Infectious disease transmission97
Isobaric tags for relative and absolute quantification
(iTRAQ).....172, 173, 175, 177

L

- Laboratory1–7, 78, 79, 94, 122, 137,
141–143
Lipid extraction118, 119, 122–123, 128–130
Liquid chromatography-mass
spectrometry (LC-MS).....45–51, 118, 129–130,
137, 139, 140, 142–144, 172

M

- Maintenance.....1–7, 89–90, 92, 104
Mariner transposon39, 42
Metalloprotease153, 154
Mouse model.....105, 147–151
mRNA enrichment30, 32–34
Multiplex genome editing53–63
Musca domestica.....77, 79, 89–91

N

- NanoSight118, 120–121
Natural products135–144
Natural transformation53–63, 107
Nested PCR42
Next-generation sequencing29, 66

O

Outer membrane vesicles (OMVs)..... 117–133, 171

P

Phenyl-bonded phase45

Proteomics.....171–177

Purpald..... 118, 120, 125–126, 132

Q

Q₂-TOF mass spectrometer..... 47, 50

Quantification 37, 115, 172

R

Random mutagenesis.....39–44

Random-primed sequencing40–43

RNA-seq29–38

S

Secreted proteins 136, 171, 172

Secretion.....117, 135, 136, 157, 171, 172

Serine proteases 137, 138

Sodium dodecyl sulfate-polyacrylamide gel electrophoresis
 (SDS-PAGE) 118, 121, 122, 124, 126–127,
 157–159, 163, 164, 167

Survival.....80, 84–87, 135

T

Transcription29, 65, 72, 75

Transcriptomic analysis29

Transposon mutagenesis.....39–44

Transposon sequencing (Tn-seq)..... 103–115

TrayCell™ 118, 120, 124, 125, 131

Type I collagen153–169

Type II secretion system 171, 172

U

Ultracentrifugation 123, 171

Untargeted metabolomics..... 46, 47, 50

V

Vibrio cholera 1–7, 11–26, 29–51, 53–63, 65–75, 77–95,
 97–101, 103–115, 135–144, 147–151, 153–169,
 171–177

Virulence2–4, 6–7, 12, 13, 40, 45, 51, 77, 78,
 86, 94, 117, 135, 136, 147, 148

Virulence inducing2–4, 6–7

Z

Zebrafish97–101

Zymography154, 155, 159,
 164–165
