

INDEX

A

Acid adaptation	34, 40
Acid tolerance	
evaluation of	40
HCl	40
lactic acid bacterial strains	33
Acidic tomato/grape broth medium	5
Adhesion test	161–164
Agar-well diffusion method	16, 17
Aggregation	164
AK-23 strain	170
All nucleotide identity (ANI) calculator	9
Amino acid racemase (AARase)	24, 25, 27, 30
Anaerobic condition	35, 36, 38, 39
Anion-exchange chromatography	88–90
Antibacterial activity assay	
bacteriocin/BLIS	21
CFS	20, 21
evaluation of	19
LAB bacteriocins	15
Arbitrary units (AU)	19
Arsenic	145
Atomic force microscopy	57, 61, 62

B

Bacterial cell growth	149
Bacterial cells treatment	154
Bacterial cell surface proteins	152
Bacterial strains	46
Bacteriocin-like inhibitory substances	
(BLIS)	16, 18–21
Bacteriocinogenics	16
Bacteriocins	
agar plates, indicator strain	19
agar-well diffusion antibacterial activity assay	20
antibacterial activity	19
antibacterial spectrum	21
antibacterial titer	21
bacterial growth	21
bacterial medium	17, 18
bacterial strains	17
bacteriocinogenics	16
CFS samples	19
characteristics	15
clear zones, indicators	21, 22

enzymatic susceptibility tests	20
food application	16
gram-positive bacteria	15
heat/storage-stability tests	21
LAB	15
<i>Lb. gasseri</i> JCM 11046 and JCM 11657	20
<i>Lc. lactis</i> subsp. <i>lactis</i> NBRC 12007	20
<i>Leu. mesenteroides</i> subsp. <i>mesenteroides</i>	
406 and 213M0	20
<i>Lis. monocytogenes</i> VTU 206	20
MRS and BM17 broths	20
pH range	21
punch wells	21
reagent solution	18
sample injection	19
Beer	95
Benzyl chloride	6
Biotin stock	25
BLASTN algorithm	9
Blue Native PAGE	175, 176, 183
<i>Brevibacillus</i>	176, 177, 180–183, 185
Brookfield viscometer	52
Bulgarian people	167

C

Cadmium	
concentration	154
and methylmercury	145
toxicity	146
Calibration curve	39
Carboxyfluorescein diacetate succinimidyl	
ester (CFDA-SE)	34, 35
Carboxymethyl cellulose (CMC)	49
Cell-free culture supernatant (CFS)	16, 19, 21
Cell wall digestion fraction	175, 183
Colony-forming units (CFU)	50
Correlated spectroscopy (COSY)	79
Cross streak method	16
Culture medium	4, 5
Cut gel pieces	180
Cycloheximide	4, 11, 12

D

D-alanine assays	24, 26–31
D-amino acid oxidase	24

D-aspartic acid.....	23
D-body amino acids.....	23, 24, 28
DDBJ Fast Annotation and Submission Tool (DFAST).....	11
De Man, Rogosa and Sharpe (MRS).....	4, 5, 11, 17, 18
Dephosphorylation treatment.....	180
Detoxification tools.....	146
Diagnostic glass slides.....	161, 163, 164
Dipotassium hydrogen phosphate.....	35
Direct vat inoculation (DVI).....	49
DNA-DNA hybridization (DDH).....	4
Dulbecco's modified Eagle's medium (DMEM).....	161
Dynamic viscoelasticity.....	58, 60, 62

E

Electrophoresis.....	100
Electrophoresis apparatus.....	176
Endotoxin.....	169, 171, 172
Endotoxin activity.....	184
Endotoxin-free plastic ware.....	169
<i>Enterococcus faecium</i>	4
Enterotoxigenic <i>Escherichia coli</i> (ETEC).....	134, 138
Ethanol precipitation.....	87, 88
Exopolysaccharide (EPS).....	46
acidic polysaccharides.....	72
analysis methods.....	72
anion-exchange chromatography.....	62, 88–90
atomic force microscopy.....	57, 61, 62
crystal violet stains.....	63
α -D-glucan.....	70
dilution.....	62
dynamic viscoelasticity measurement.....	58, 60, 62
ethanol precipitation.....	87, 88
exocellular polysaccharides.....	85
fermented milk.....	68
functional physiological roles.....	67
hetero-EPS.....	55
heteropolysaccharides.....	86
homo-EPSs.....	55
homopolysaccharides.....	85
HoPS.....	68
immunostimulation.....	85
LAB.....	68, 85
<i>Lactobacillus fermentum</i> MTCC 25067.....	56
<i>L. fermentum</i> MTCC 25067.....	61
light microscopy.....	57, 59
materials.....	86, 87
methylation.....	73
mica surface.....	63
milli-Q water.....	62
monomers.....	72
monosaccharide.....	73
neutral hetero-EPS.....	61

NMR spectroscopy.....	74, 79–81
physicochemical properties.....	56
polysaccharides.....	63
purification.....	56–58
rheological characterization.....	56, 59
signal-to-noise ratio.....	62
solubilization.....	62
steady shear viscosity measurement.....	58, 63
synthesis mechanisms.....	86
TCA.....	89, 91
thermal drying.....	63
transmission electron microscopy.....	57, 59
types.....	55
uranium acetate.....	63
vertical resolution, AFM.....	64

F

Fatty acid hydrolase (FAH).....	123
Fermentation.....	
individual containers.....	48
lactic acid.....	45
set yogurt.....	49
stirred yogurt.....	49
Fermented foods.....	23
Fish meat.....	109–111, 113, 114, 116
Fluorescence intensity.....	
calibration curves.....	38
external pH.....	37
Fluorescent probe.....	34, 35
Food industry.....	168
Fructophilic LAB (FLAB).....	5

G

Gassericsins.....	20
Generally recognized as safe (GRAS).....	68
Genome blast distance phylogeny (GBDP).....	9
Genome-to-genome distance calculator (GGDC).....	9
Glass beads.....	6, 25
GMI7 broth.....	18
GYP medium.....	25

H

Heat treatment.....	49
Heavy metal biosorption assay.....	147, 149, 151
Heavy metal-contaminated foods.....	149
Heavy metals.....	155
bacterial cell concentration.....	149
bacterial cell growth.....	149
binding proteins.....	155
biosorption.....	149
buffer.....	146
contamination.....	145
detoxification tools.....	146

equipment..... 148
 LAB 145
Lactobacillus plantarum CCFM8610..... 146
 localization..... 152
 measurement 152
 probiotics 145
 reagents 146
 solutions 147
 wash cells 149
 Heteronuclear multiple-bond correlation
 (HMBC) 79
 Heteronuclear single-quantum coherence
 (HSQC) 79
 Heteropolysaccharides (HePS)..... 68
 High-pH anion-exchange chromatography
 (HPAEC) 72
 Homogenization 48
 Homopolysaccharides (HoPS)..... 68, 69
horA 96, 102, 103
horC 96, 102, 103
 House keeping genes
 amplification and sequencing 8, 9
 nucleotide sequences 12
 whole-genome sequences 7
 Human embryonic kidney (HEK293) 137
 Human gut microbiome 159
 Hydrochloric acid 35
 Hydroxyl fatty acids (HFAs)
 conversion..... 120, 125
 GC-MS 120
 industrial applications 119
 lactone-producing 119
 NADH 120
 non-food-use bacteria 120
 Hydroxylation
 extraction 122, 123
 GC-MS 121
 GYP base medium..... 121
 LAB strain..... 121
 MRS medium 121
 MRS-oleic acid medium 121
 YP-oleic acid medium 121
 10-Hydroxy stearic acid 119

I

Identification
 ANI calculator 11
 LAB groups 4
 Immunobiotics
 beneficial effect 132
 LAB preparation..... 134
 NF-κB reporter assay 134
 porcine TLR2 transfectants cultures 133
 strains 132

Immunostimulation 85
 Incubation time 154
 International Dairy Federation (IDF)
 standards 50
 Intracellular pH
 acid tolerance experiment 40
 bacterial strain and growth condition 35
 CFSE..... 34
 Difco™..... 35
 fluorescence intensity 36
 fluorescence measurement 37, 38
 fluorescent probe 34–36
 HCl supplementation 36
 hydrochloric acid 35
 lactic acid bacteria 33
 mechanisms 34
 Nigericin solution 35
 ΔpH 34
 PMg buffer 35
 sodium hydroxide 35
 Ion exchange water (IEW) 57
 Isolation
 anaerobic culture 12
 DNA 5–7
 FLAB..... 5
 LAB 4, 7
 Lactococcus lactis..... 12
 sodium azide and cycloheximide..... 12
 Streptococcus thermophilus 12
 Isopropanol 6
 Itai-itai disease 145

J

JSpeciesWS 11

L

Lactic acid bacteria (LAB) 145, 168
 acidic tomato broth medium..... 12
 ANI calculator 9
 assay endotoxin 172
 bacteriocins
 classification 15
 food industry 16
 lanthionine..... 15
 non-lanthibiotic..... 15
 biomacromolecules 67
 biosorption 146
 biosynthesis 70
 CCFM8661 146
 cell fraction 174
 Codex standard 50
 culture media and dilution buffer 4, 5
 DFAST..... 11

Lactic acid bacteria (LAB) (<i>cont.</i>)	
D-galactose residue	70
DNA isolation	5–8
endotoxin	173
EPS-producing LAB	68
FLAB	12
habitats	3
HePS	68
housekeeping genes	8, 9, 12
hydrolytic process	72
industrial application	68
isolation	4, 7
JSpeciesWS	11
<i>Lactobacillales</i>	3
metabolites	46
M17 medium	12
MRS medium	11
nondestructive technique	73
PCR, electrophoresis, purification and sequencing	6
16S rRNA gene	4, 8, 12
strains	145, 173
structural information	71
structure/function relationships	69
tautomers	72
types	68
whole-genome sequence	9–11
<i>Lactobacillus</i>	95
<i>Lactobacillus</i> adhesion	
antibacterial proteins	160
cell aggregation	160
evaluation	159
glass slides and microtiter plates	160
materials and equipment	160–161
methods and tools	159
microtiter plate wells	159
strains	160
<i>Lactobacillus</i> adhesion test	161
<i>Lactobacillus casei</i>	4, 9
<i>Lactobacillus delbrueckii</i> subsp. <i>bulgaricus</i>	35, 38, 39, 45, 46
<i>Lactobacillus fermentum</i>	69, 70
<i>Lactobacillus plantarum</i>	4, 9, 12, 110, 114
<i>Lactobacillus reuteri</i>	69
γ -Lactone	123
Lead toxicity	146
Ligation	181
Light microscopy	57, 59
Lipopolysaccharide (LPS)	
assay	169, 171
components	167
concentration	180
cultivation	169
elimination	168, 169, 171, 179, 180, 182, 186
elimination assay system	169
fermented foods	175
fractionation	170, 175
genomic DNA	181
gram negative bacteria	175
GYP medium	168
LAB	168
LEP	171
lysozyme solution	169
methods	179
MRS medium	168
neutralization	175
recombinant	182
salt solution	168
structure	168
temperature	170
Lithium chloride	152
Lysozyme solution	169, 176
M	
Man-Rogosa-Sharpe (MRS)	70
Mass spectrometry	72, 73
Mesophilic LAB	7
Methanol-perchloric acid	25
Methanolysis	75
Methoxyl pectin	49
Methylation analysis	
acetylation	78, 79
EPS 180	77
GLC-EIMS	78, 79
hydrolysis	78, 79
500-MHz ^1H NMR spectrum	70
permethylation	76–78
reduction	78, 79
structural analysis	69
Microbe-associated molecular patterns (MAMPs)	131
Microbiological analysis	
acidified MRS medium	47
lactic acid bacterial count	50, 51
M17 medium	47
peptone-salt solution (diluent)	47
yeast and mold count	51
yeast extract dextrose chloramphenicol agar medium	47
Microplate method	16, 25
Microplate plate reader	169
Microtiter plates	159, 160, 163
Milk protein concentrate (MPC)	46
Milk solids-not-fat (MSNF)	46
Milli-Q water	58, 61, 62
Minamata diseases	145

Ministry of Agriculture, Forestry and Fisheries (MAFF) 145
M17 medium 4, 5
Monosaccharide analysis
 D/L configuration 75
 GLC-EIMS 74, 75
 methanolysis 75
 per-trimethylsilylation 75
Mucin glycoproteins 159
Multiplex 95, 102, 104, 105, 107

N

National Institute of Technology and Evaluation (NITE) 17
Negative staining 61
NF-κB reporter assay 137, 138
Nigericin 35
NITE Biological Resource Center (NBRC) 17
NMR spectroscopy 74, 79–81

P

Paper disk method 16
Partially methylated alditol acetates (PMAAs) 76
Pattern recognition receptors (PRRs) 131
PCR amplification 181
Pediococcus 95, 96
Pediococcus pentosaceus 168, 171, 172, 175, 176, 181
Perchloric acid solution 25
Permethylation 76–78
Per-trimethylsilylation 75
ΔpH 33, 34, 36, 38–40
pheS gene 6, 9
Phosphate-buffered saline (PBS) 161
Picric acid 110, 112–116
Plastic ware 177
Polymerase chain reaction (PCR)
 bacterial suspension 100
 beer-spoilage microorganisms 95, 96
 horA and *horC* 103
 materials 96, 97
 methods 100
 DNA isolation 97
 electrophoresis 100
 interpretations 102
 photographing 100
 sample separation 100
 staining 100
 species-specific identification 95
 target species 105
 tests 95
Polypeptide 5
Polysaccharide 70–72

Porcine colonic mucin 160
 isolation and purification 160, 161
Porcine intestinal epitheliocyte (PIE) 132
 cDNA 135, 139
 cell culture 134, 138
 ETEC 134, 138
 LAB strains 132
 real time PCR 135, 139
 RNA extraction 134, 138
 stimulation 138
Porcine TLR2 transfectants 133, 137
Potassium dihydrogen phosphate 35
Probiotic activity 175
Probiotic bacteria 68

R

recA gene 6, 9, 12
Restriction enzyme treatment 181
rpoA gene 6, 9

S

Saline 5
Skim milk and yeast extract (SMY) medium 46
Skim milk (SM) medium 46
Sodium dodecyl sulfate (SDS) 6
Sodium hydroxide 35
Spectrophotometer 6, 110, 112, 113
Spoilage 95, 96, 102
Spot-colony overlay method 16
Spot-on-lawn method 16
16S rRNA gene
 amplification and sequencing 8
 phylogenetic analysis 4
 primers 6
Standardization 48
Standard plate count (SPC) agar 18
Starter culture 45, 49, 50, 53
Sterile physiological saline 18
Streptococcus thermophilus 45–47, 50, 51

T

Tautomers 72
TE buffer 5
Tetranucleotide frequencies (Tetra) 11
Texture analysis
 centrifuging 52
 curd firmness and smoothness 52
 viscosity 52
Thermophilic LAB 7
Toll-like receptor 4 (TLR4) 132
Total correlation spectroscopy (TOCSY) 79
Transmission electron microscopy 57, 59
Trichloroacetic acid (TCA) 89, 91

Trimethylamine (TMA)

assay	112, 113
counting, LAB cells.....	112
cultivation	112
elimination	113
extraction	112–114
fish meat.....	113
LAB	110
materials.....	110, 111
osmosis-regulating substance	109
<i>Penicillium</i> sp.....	110
pre-cultured LAB cells	111
Trimethylamine oxide (TMAO).....	109
Trimethylsilylation	124
Trimethylsilyldiazomethane.....	121
Tryptone, yeast extract, lactose and glucose (TYLG) broth	18

U

Ultrafiltration	89, 91
-----------------------	--------

W

Washing cells	149
Whey protein concentrate (WPC)	46
Whey protein isolate (WPI).....	46
Whole-genome sequence similarities	4, 9–11

Y

Yogurt production

bulk starter	47
characteristics.....	46
drinking	49, 50
DVS/DVI.....	53
FAO/WHO	45
fermentation process.....	45
homogenization pressures	53
ingredients	46
microbiological analysis	47
lactic acid bacterial count.....	50, 51
yeast and mold count	51
preparation	48–50
set yogurt.....	48, 49
starter culture	46, 53
stirred.....	49
texture analysis	
centrifuging	52
curd firmness and smoothness	52
viscosity.....	52
titratable acidity.....	46, 50
titration	53
UHT	53
vertical axis	53
