 - isoelectric focusing,
 - 20, 24
 - mass spectrometry for protein sequencing and identification,
 - 22–24
 - silver staining, 21, 22
- V–Z**
- Vapor diffusion,
 - see X-ray crystallography
 - Vascular endothelial growth factor (VEGF), stem cell transplantation effects, 342
 - VEGF, *see* Vascular endothelial growth factor
 - Western blot,
 - apoptosis assay, 288
 - transgenic mouse heart failure model analysis, 100, 101
 - X-ray crystallography, vapor diffusion crystallization,
 - materials, 295, 296, 300
 - optimization,
 - 299, 300, 302
 - purification of proteins,
 - 296, 297, 301
 - sitting drop set-up,
 - 297, 301, 302
 - sparse matrix screens, 292–296, 300
 - stereomicroscopy of drops,
 - 297, 299, 302
 - Xenopus oocyte,
 - see Electrophysiology
 - Zebrafish, *see* Thrombosis
