

# INDEX

Note: The letters 'f', 't' and 'n' following the locators refer to figure, table and note number respectively

## A

aCGH, *see* Array comparative genomic hybridization (aCGH)

Affymetrix

- GeneChip® Custom SNP Kit ..... 70
- GeneChip oligonucleotide arrays ..... 1
- GeneChip® Scanner ..... 85
- Gene mapping arrays ..... 48
- Integrated Genome Browser ..... 169, 174
- MAS ..... 210
- tiling arrays ..... 162 n12, 166
- U133 GeneChip arrays ..... 207

Affymetrix Power Tools (APT) ..... 50

Agarose gel electrophoresis, verification ..... 39f

Agilent

- DNA microarray scanner ..... 127
- hybridization buffer ..... 30 n14, 125
- 44 K oligonucleotide arrays ..... 207
- 60-mer SurePrint technology ..... 126

Algorithms, gains/losses in array CGH data

- CBS ..... 102–103
- CLAC ..... 103–105, 104f
- clustering procedure ..... 104
- data examples
  - GBM ..... 108
  - real applications ..... 108–111
  - ROC curves, on simulated dataset ..... 108f
  - simulation studies ..... 107–108
- node/cluster, properties of ..... 104
- pathwise coordinate algorithm* ..... 106
- penalized likelihood approach with adaptive model selection criteria (CGHseg) ..... 105–106
- software
  - cgbFLasso* ..... 114–115
  - CGHseg* ..... 113–114
  - CLAC/CGH-Miner ..... 112–113
  - DNAcopy ..... 112
  - Spatial Smooth with Fused Lasso (*cgbFLasso*) ..... 106–107

Alleles ..... 47, 50, 55, 61, 62f, 194

AMAD (Another MicroArray Database) ..... 31 n18

Anion-exchange column-based kits ..... 26

Anti-BrdU-POD antibody ..... 203 n5

APT, *see* Affymetrix Power Tools (APT)

*Arabidopsis* ..... 129

Array-based comparative genomic hybridization (array CGH) ..... 22, 29 n1, 208

Array comparative genomic hybridization (aCGH) ..... 2, 8, 48, 69, 90, 208

- application of oligonucleotide arrays for ..... 47–63
- on BAC arrays ..... 7–18
- protocol ..... 9f
- by representational oligonucleotide microarray analysis ..... 33–43
- software for visualization and/or analysis for ..... 15t
- on spotted oligonucleotide microarrays ..... 7–18

ArrayIT Microarray Probe Purification Kit ..... 180

Axon

- GenePix/4000B Scanner (laser-based scanners) ..... 10, 17 n8, 46 n29
- scanner, operation of ..... 127

## B

BAC aCGH hybridization ..... 8

BAC arrays, comparative genomic hybridization on

- array CGH protocol ..... 9f
- materials ..... 9–10
  - analysis ..... 10
  - blocking of repetitive elements ..... 10
  - hybridization ..... 10
  - imaging ..... 10
  - labeling of genomic DNA ..... 9
  - preparation of Probe ..... 9–10
  - washing ..... 10
- methods ..... 10–14
  - analysis ..... 14
  - blocking of repetitive elements with CoT-1 DNA ..... 12
  - hybridization, options ..... 12–13
  - labeling of genomic DNA ..... 11–12
  - preparation of Probe, options ..... 11–12
  - washing ..... 13

BACs, *see* Bacterial artificial chromosomes (BACs)

Bacterial artificial chromosomes (BACs) ..... 2, 7, 48

Bacteriophage Phi29 DNA polymerase ..... 90

*BfaI* (C#TAG) ..... 122

*Binary segmentation procedure* ..... 102

BioPrime labeling kit ..... 121

- Bioscore Screening and Amplification Kit ..... 151 n2  
Blood and Cell Culture Kit ..... 26  
BrdU labeling ..... 192, 195f  
    *See also* DNA replication timing, microarray analysis of  
Burrows–Wheeler transformation ..... 44 n9
- C**
- Cancer, definition ..... 208  
CBS, *see* Circular binary segmentation (CBS)  
CBS (*R package DNAcopy*) ..... 107  
CGH, *see* Comparative genomic hybridization (CGH)  
CGH Analytics (Agilent Technologies) ..... 31 n19  
CGH array for a glioblastoma multiforme (GBM) tumor,  
    segment of ..... 100f  
CghFLasso ..... 101, 106, 107, 111,  
    114, 210  
CGH-Miner ..... 31, 105, 112–113  
CGH Nexus (BioDiscovery) ..... 31 n19  
CGH-Norm (program used for normalization) ..... 14  
ChIP, *see* Chromatin immunoprecipitation (ChIP)  
ChIP-Chip, algorithms for calling binding sites  
    Affymetrix Platform/MAT Software ..... 165–171  
        affymetrix tiling array analysis ..... 166  
        downloading software ..... 168  
        FDR estimation ..... 167–168  
        genomic region scoring ..... 167  
        MAT (Model-Based Analysis of Tiling  
            Arrays) ..... 166  
        MaxGap ..... 167, 169  
        output files ..... 169–171  
        probe intensity standardization ..... 166–167  
        p-Value Estimation ..... 167  
        running MAT ..... 168–169  
        tag file definition ..... 169, 170f  
    NimbleGen Platform/MA2C Software ..... 171–174  
        downloading software ..... 172  
        FDR estimation ..... 172  
        genomic region scoring ..... 172  
        MA2C, using ..... 172–173, 173f  
        MA2C (Model- Based Analysis of Two-Color  
            Arrays) ..... 171  
        NimbleGen tiling array analysis ..... 171  
        normalization ..... 173–174, 173f  
        peak detection ..... 174  
        probe intensity standardization ..... 171  
ChIPed DNA ..... 155, 158  
ChIP-grade antibodies ..... 161 n3  
Chromatin immunoprecipitation and oligonucleotide tiling  
    arrays (ChIP Chip), combining of  
        material ..... 154–155  
        ChIP ..... 155  
        DNA for hybridization onto tiling arrays,  
            preparation ..... 155–166  
        method ..... 156–158  
    ChIP ..... 156–158  
        DNA for hybridization onto tiling arrays,  
            preparation ..... 158–161  
Chromatin immunoprecipitation (ChIP) ..... 4, 154, 156,  
    169, 206  
Circular binary segmentation (CBS) ..... 51, 100–101,  
    102–103  
Cistrome ..... 154  
CLAC, *see* Cluster along chromosome (CLAC)  
Cluster along chromosome (CLAC) ..... 101, 103–105  
COBRA, *see* Combined Bisulfite Restriction Analysis  
    (COBRA)  
Combined Bisulfite Restriction Analysis (COBRA) ... 120f,  
    135, 136–137  
Copy number abnormalities (CNAs) ..... 2, 4, 48–50, 52,  
    56f, 57, 58, 61, 205–212  
Copy Number Analysis Tool 4.0 (CNAT 4.0) ..... 50  
Copy number neutral (CNN) ..... 3, 48, 55, 60  
Copy number variants (CNVs) ..... 2  
CpG island microarray ..... 126  
CpG islands (CGI) ..... 3, 117, 118, 130, 135, 145  
Cross-linking ..... 154, 155, 157, 158, 161, 161 n4  
Custom-designed oligo arrays (NimbleGen Systems,  
    Inc) ..... 144, 145  
Cyanine-based dyes ..... 17 n7, 31 n17
- D**
- Differential methylation analysis (DMA) ..... 3  
Differential methylation hybridization (DMH) ..... 117  
DIG Easy hybridization buffer ..... 11, 12, 16 n4  
Digest, inspection of agarose gel electrophoresis ..... 44 n14  
Disuccinimidyl glutarate (DSG) ..... 155  
DMH, *see* Differential methylation hybridization (DMH)  
DNA amplification ..... 2, 4, 24f, 91, 95, 156, 162  
    ‘*DNAcopy*,’ ..... 103  
DNA copy number alterations (CNAs) ..... 2, 22, 69, 100,  
    107, 110, 205, 209f  
DNA deletion ..... 3, 8, 22, 23f, 43, 48, 54, 60, 104, 107,  
    113, 209f, 214  
DNA methylation ..... 3–4  
    in diseased states ..... 118  
    study of, types ..... 118  
DNA phosphorylation step ..... 162 n8  
DNA primer hybrids, structure of ..... 38f  
DNA–protein interactions ..... 3–4  
DNA regulatory elements, *see* Regulatory elements by  
    DNaseI Hypersensitivity Chip (DNase-Chip),  
    mapping of  
DNA replication ..... 4  
DNA replication timing, microarray analysis of  
    materials  
        BrdU ELISA ..... 193  
        cell culture/synchronization/BrdU labeling/  
        FACS ..... 192–193

- fragmentation/labeling of H/L DNA ..... 193
  - genome-tiling array hybridization ..... 194
  - genomic DNA extraction ..... 193
  - methods..... 195*f*, 196*f*, 199*t*, 200*t*
    - BrdU ELISA ..... 196*f*, 198–199
    - BrdU ELISA to check fractionation of H/L DNA ..... 196*f*
    - cell synchronization/pulse labeling ..... 196–197
    - discrete temporally specific timing
      - categories ..... 201–202, 202*f*
    - fragmentation/labeling of H/L DNA ..... 199
    - genomic DNA extraction ..... 197
    - H/L DNA purification by CsCl gradient ..... 198
    - hybridization/washing of microarrays ..... 199–200
    - segregation of TSR/Pan-S regions ..... 201
    - time of replication of 50% (TR50) calculation... 200
    - TR50 smoothing ..... 201
  - purification of heavy/light DNA by CsCl density
    - centrifugation ..... 193

 ligation mediated PCR (LM-PCR)..... 179–180  
 ligation of biotinylated linkers..... 179  
 ligation of non-biotinylated linkers to sheared  
 DNA ends..... 179  
 Pulsed-Field Gel Electrophoresis (CHEF) ..... 179  
 purify LM-PCR product ..... 180  
 shear DNA..... 179  
 methods  
 bind to streptavidin beads..... 186

blunt-end DNased DNA in-gel..... 184–185  
 blunt-end randomly sheared DNA ..... 183–184  
 blunt-end sheared DNA ends ..... 186  
 cell collection/nuclei prep ..... 180  
 DNase-chip method ..... 181  
 DNaseI concentrations on PFG gel ..... 189 n4  
 DNaseI digestion..... 180–182, 184f  
 label and hybridize to arrays ..... 188  
 ligation-mediated PCR (LM-PCR) ..... 184f, 187  
 ligation of biotinylated linkers..... 185  
 ligation of nonbiotinylated linkers to sheared  
 DNA ends..... 187  
 Pulsed-Field Gel Electrophoresis  
 (CHEF) ..... 182–183  
 purify LM-PCR ..... 182–183  
 purify LM-PCR product ..... 188  
 shear DNA..... 186  
 Replication timing, methods used for mapping ..... 195  
 Representational oligonucleotide microarray analysis  
 (ROMA)..... 2, 33–45  
 ROC, *see* Receiver-operator characteristic (ROC)  
 ROMA, *see* Representational oligonucleotide microarray  
 analysis (ROMA)  
 ROMA, comparative genomic hybridization by  
 materials  
 extraction of DNA from small number  
 of cells ..... 34–35  
 ligation of adaptors ..... 35  
 pre/post-hybridization analysis..... 36  
 representation amplification/clean-up..... 35  
 representation labeling ..... 35–36  
 restriction of DNA ..... 35  
 washing/scanning..... 36  
 methods  
 agarose gel electrophoresis, verification ..... 39f  
 extraction of DNA from small number of cells.... 37  
 labeling protocol for microarray  
 hybridizations..... 40–41  
 ligation of adaptors ..... 38  
 PCR amplification/clean-up..... 38–40, 38f, 39f  
 pre/post-hybridization analysis..... 41–42  
 restriction of DNA ..... 37–38  
 washing/scanning..... 42

**S**

*Saccharomyces cerevisiae*, 192  
 Sigma's Whole Genome Amplification kit..... 90, 91  
 Single-nucleotide polymorphisms (SNPs) ..... 48, 67, 205  
 SMD, *see* Stanford Microarray Database (SMD)  
 SNP array..... 2, 60, 90, 210  
 SNP mapping array (SMA)..... 48  
 Softworx (software)..... 13  
 Spatial Smooth with Fused Lasso (cghFLasso)..... 106–107  
 Spatial structure ..... 100

Spearman's correlation ..... 211, 214 n4  
*See also* Integration of diverse microarray data types  
 S-phase ..... 191–197  
 Stanford Microarray Database (SMD) ..... 31 n18  
 SurePrint technology ..... 126  
 Systems-biology technologies ..... 118

**T**

Temporally non-specific replication (TNSR) ..... 194  
 Temporally specific replication (TSR) ..... 194  
 Thermal cycling programs ..... 76f, 86 n2  
 TR50 (time of completion of 50% replication) ..... 192,  
 200–202, 202f  
*Tsp509I* (#AATT) ..... 122  
 Tumor-suppressor genes (TSGs) ..... 208

**U**

UHTS, *see* Ultra-high-throughput DNA sequencing  
 (UHTS)  
 Ultra-high-throughput DNA sequencing (UHTS) ..... 5  
 UniGene Cluster ID ..... 207

**W**

WGA, *see* Whole-genome amplification (WGA)  
 WGA approach ..... 29 n7  
 WGA2 GenomePlex Complete Whole Genome  
 Amplification (WGA) Kit ..... 151 n2  
 WGA protocol for a wide variety of DNAs  
 DNA amplification (material) ..... 91–92  
 DNA amplification (method)  
 clean-up ..... 96  
 creation of PCR-amplifiable library ..... 95–96  
 fragmentation of genomic DNA ..... 95  
 PCR amplification ..... 96  
 FFPE sample preparation (material)  
 DNA extraction/clean up ..... 91  
 macrodissection/deparaffinization ..... 91  
 FFPE sample preparation (method)  
 DNA clean-up ..... 95  
 DNA extraction ..... 94  
 macrodissection/deparaffinization ..... 93–94  
 Whole-genome amplification (WGA) ..... 26  
 Whole-genome methylation profiles ..... 143
