

INDEX

A

- Affymetrix 12, 80, 81, 85–90, 119,
125–127, 154, 279, 291–309
- Agilent..... 11, 125
- Alu..... 4, 20, 212, 213, 230
- Autism spectrum disorder 53, 115–130, 274, 279

B

- Bacterial artificial chromosome (BAC)..... 11, 12, 14,
17, 20, 52, 55, 101, 141, 153–155, 160, 165, 189,
226, 254, 257, 261, 276, 280, 319, 344, 345, 348,
370, 382
- B-allele frequency (BAF)..... 13, 256, 261, 263, 265,
299, 300

C

- Chimerism..... 250

D

- Database of genomic variants (DGV)..... 17, 50,
82, 107, 126, 173, 275, 278, 283, 295, 302, 303, 312
- dbVAR..... 274, 275, 283
- DECIPHER..... 50, 82, 108, 157, 275, 279
- DGV. *See* Database of genomic variants (DGV)
- DGVa..... 274, 275, 283
- Double-strand break (DSB) 3, 5, 8, 10, 16, 51
- DSB. *See* Double-strand break (DSB)

E

- ECARUCA..... 50, 82, 108, 157, 275, 278–279
- Exome sequencing..... 57, 125, 351–353

F

- FFPE. *See* Formalin-fixed paraffin-embedded (FFPE)
- Fluorescence in situ hybridization (FISH).. 11, 15,
16, 18, 19, 21, 29, 55, 56, 78, 79, 138–146, 152, 161,
162, 164, 256, 261, 263, 280, 314, 323, 324
- Fork stalling and template switching (FoSTeS)..... 6, 8–10,
13, 16, 20, 21, 30, 51, 213
- Formalin-fixed paraffin-embedded
(FFPE) 324, 329–340

- FoSTeS. *See* Fork stalling and template switching
(FoSTeS)

G

- GECCO. *See* Genomic classification of CNVs objectively
(GECCO)
- 1000 Genomes Project 107, 231, 277, 349, 360
- GenomeStudio 13, 294, 296–298, 306
- Genomic classification of CNVs objectively
(GECCO) 84
- Genotyping console (GTC) 126, 127, 294,
296, 299, 306

H

- Haploinsufficiency..... 20, 53, 178, 179
- Hidden Markov model (HMM).. 81, 127, 292,
305–307, 309

I

- Illumina.. 12, 13, 119, 125, 201, 202,
235, 254–256, 261, 263, 265, 277, 281, 291–309,
325, 345–348, 369–373, 375, 378, 381
- In vitro fertilization (IVF) 162, 164, 260

L

- LINEs..... 3–6, 16, 230
- logR ratio (LRR)..... 13, 261, 298–300

M

- MAPH. *See* Multiplex amplifiable probe hybridization
(MAPH)
- Mental retardation..... 15, 21, 49, 77–85, 102,
104–106, 139, 141, 275, 279, 353
- Microhomology..... 5, 6, 9, 10, 30, 51, 237
- Microhomology mediated break induced repair
(MMBIR)..... 6, 8–10, 13, 16, 20,
21, 30, 51, 231
- MLPA. *See* Multiplex ligation-dependent probe
amplification (MLPA)
- MMBIR. *See* Microhomology mediated break induced
repair (MMBIR)
- Monozygotic twins..... 15, 252–256, 266

Mosaicism 2, 7, 11, 13–15, 30, 118,
160–162, 164, 249–267

Multiplex amplifiable probe hybridization
(MAPH)..... 318–320, 324

Multiplex ligation-dependent probe amplification
(MLPA).....20, 55, 56, 152,
318, 320–324

N

NAHR, Non-allelic homologous recombination (NAHR)

Next generation sequencing (NGS) 12, 56–58,
125, 227, 228, 234, 239, 242, 281, 323, 325, 345–349,
351, 353–355, 357, 358, 369–373, 375–383

NHEJ. *See* Non-homologous end joining (NHEJ)

NimbleGen..... 11, 125, 228, 276, 281, 335

Non-allelic homologous recombination
(NAHR)6–9, 18, 20, 21, 30,
50–52, 139, 196, 211–213, 229, 230, 237–239,
259, 265

non-B DNA 5, 51, 214

Non-homologous end joining (NHEJ) 5–9, 16,
20, 21, 51, 141, 196, 213, 237–239

P

Paired-end mapping57, 199, 232–234, 238,
274, 281, 370, 377, 381–382

Pan-genome353

PFGE. *See* Pulsed field gel electrophoresis (PFGE)

PGD. *See* Pre-implantation genetic diagnosis (PGD)

POC. *See* Products of conception (POC)

Position effect54, 178, 179, 313

Pre-implantation genetic diagnosis
(PGD) 163–165

Prenatal diagnostics 153, 156–162

Products of conception
(POC).....154, 161, 163, 324

Pulsed field gel electrophoresis
(PFGE)203

Q

Quantitative PCR (qPCR)..... 55, 56, 79,
120, 127, 193, 315–316, 318, 324

R

Recombination 2, 5–8, 19, 20, 30, 50–51,
139, 188, 189, 194–199, 210–211, 213, 229, 251,
259, 260, 262, 265, 350

Replication fork.....3, 9, 10, 16, 51

Roche 454..... 201, 202, 238, 325, 345–347,
349, 369–371, 373, 378

S

SAM format373

Schizophrenia33, 35, 53, 54, 97–107,
109, 110, 116, 122, 123, 255, 313

Sequence read depth..... 191, 202

SINE.....3–6, 16, 230

SOLiD 345, 349, 369–371, 373, 381

Somatic variation..... 240–241, 251,
252, 264, 265, 332

Split-read mapping (SRM) 237–240

Subtelomere..... 16, 137–147

T

Transposable element 228, 230, 232

U

Uniparental disomy (UPD) 55, 81, 250,
262–263, 265

W

Whole genome amplification (WGA) 153, 154, 164

Z

Z-DNA.....5
