

Index

- A**
Acquired cystic kidney disease (ACKD), 38, 39, 78–81
Acquired urethral stricture, 208
Acute epididymitis, 359
Acute prostatitis, 221, 222
Acute pyelonephritis, 40
Adenocarcinoma, 3, 135, 138, 139, 150, 154, 156, 170, 175, 179–184, 187, 206, 213, 250, 254–260, 272, 281, 282, 313, 345, 361, 387
 with glomeruloid features, 258
 with neuroendocrine differentiation (Paneth cell-like change), 263, 264
Adenofibroma, 344
Adenoid cystic/basal cell carcinoma, 259, 260
Adenomatoid tumor, 23, 24, 342, 364–366
Adenosquamous carcinoma, 260, 261
Adrenal cortical adenoma, 10–13, 19
Adrenal cortical carcinoma, 14–16
Adrenal cyst, 5, 6, 25
Adrenal gland, 1–28, 30, 53, 120
Adrenal hematoma, 25
Adrenal medullary hyperplasia, 9
Adrenal medullary neoplasms, 16–19
Adrenocortical hyperplasia, 3
Aggressive angiomyxoma, 210, 211, 394, 395
Aldosteronoma, 1, 12, 13
Amyloidosis, 160, 161, 238
Angiokeratoma, 393
Angiomyolipoma, 49, 81–83, 99, 100, 102–105
Angiosarcoma, 100, 178, 198, 210, 280
Appendix testis and appendix epididymis, 347, 349, 350, 357
Atrophic carcinoma, 256, 257
Atypical adenomatous hyperplasia, 231, 232
Atypical small acinar proliferations, 244
- B**
Balanitis xerotica obliterans, 373
Basal cell adenoma, 228
Basal cell carcinoma, 259, 260, 385
Basal cell hyperplasia, typical and atypical, 227, 228, 236, 272
Benign prostatic hyperplasia (BPH), 215, 225–227, 244, 266
Benign smooth muscle proliferation with epithelioid features, 275
Benign soft tissue neoplasms, 194–195
Bladder diverticulum, 143, 144, 156
Bowenoid papulosis, 380
BPH. *See* Benign prostatic hyperplasia
- C**
Calcifications in epididymis and vas, 239, 355
Carcinoid tumor, 117, 118, 315
Caruncle, 204
Cellular variants of PIN, 240
Chancroid, 377, 378
Chemically induced necrosis, 292
Choriocarcinoma, 201, 302, 305, 310, 316
Chromophobe renal cell carcinoma, 50, 51, 64–68, 106
Chronic epididymitis, 344, 360
Chronic prostatitis, nonspecific, 222
Chronic pyelonephritis due to obstruction, 43, 44
Clear cell cribriform hyperplasia, 227
Clear cell renal cell carcinoma, 27, 52–57, 59, 139, 140, 202
Clear cell sarcoma, 98
CMN. *See* Congenital mesoblastic nephroma
Collecting duct carcinoma, 68–71
Common intraluminal and epithelial findings in benign glands, 217–218
Condyloma acuminatum, 207, 208, 378, 379
Congenital mesoblastic nephroma (CMN), 94–97
Congenital ureteropelvic junction obstruction, 43, 123, 124, 126, 127
Congenital urethral polyp, 204
Conventional urothelial neoplasms, 167, 174, 175, 177, 180, 183, 187
Cowper's glands, 221
Cyst/cystadenoma, 239–240, 332, 333, 344, 345, 366
Cystic nephroma, 94, 113–115, 139
Cystic partially differentiated nephroblastoma, 93, 94
Cystic transformation, 343, 344, 355
Cystitis glandularis, typical and intestinal, 154
- D**
Desmoplastic small round cell tumor, 372, 397
Disordered spermatogenesis, 296–297
Distal ureteral injected bulking agents, 126–127
Distant metastases, 136, 137, 189
Ductal carcinoma, 254, 255, 281
Duplex ureter, 123, 125
- E**
Ectopic adrenal, 32, 288, 350
Ectopic prostate, 160, 208
Efferent ducts, epididymis and vas deferens, 239, 286, 287, 290, 292, 295, 318, 319, 323, 338, 342, 347–352, 354, 355, 357–366, 372
Embryonal carcinoma, 299, 304, 305, 314–317, 319
EMPD. *See* Extramammary Paget's disease

Endocervicosis, 159, 160
 Endometriosis, 127, 157, 158, 336
 Eosinophilic metaplasia, 236
 Epidermoid cyst, 315, 316, 388, 389
 Epididymal sperm granuloma, 360, 361
 Exstrophy, 141, 154
 Extensively cystic clear cell renal cell carcinoma, 59
 Extramammary Paget's disease (EMPD), 395, 396
 Extratesticular steroid-type cells, 351

F

Fibroepithelial polyp, 130
 Fibroma, 331, 344
 Fibrous pseudotumor of tunica vaginalis, 358, 359
 Fistula, 211, 272, 293
 Foamy gland carcinoma, 257
 Foreign bodies, including calculi, 125, 151
 Fournier's gangrene, 392, 393
 Fuhrman nuclear grading and TNM staging, 53–76

G

Ganglioneuroblastoma, 19, 20, 22, 23
 Ganglioneuroma, 19, 20, 22
 Gangrene of bladder, 149, 150
 Genital herpes simplex, 376
 Germ cell neoplasms, 201, 332
 Gonadal dysgenesis and true hermaphroditism, 286, 287, 331
 Gonadoblastoma, 286, 331, 332
 Granulomatous cystitis, 146
 Granulomatous orchitis, idiopathic and nonspecific, 289–290
 Granulomatous prostatitis, 222, 224
 Granulosa cell tumor, adult and juvenile types, 329, 330
 Gross findings, 8, 12

H

Hemangioma, 7, 8, 25, 26, 106, 195, 209, 210, 333, 334, 393, 394
 Hematoma, 7, 8, 25, 26, 39, 356
 Hematopoietic and lymphoid neoplasms, 201–202, 280–281, 337–341
 Hereditary polycystic kidney disease, 33–35, 58, 107
 Hidradenitis suppurativa, 391
 Histologic variants of urothelial carcinoma, 135, 168, 171–180
 Hydrocele, 353, 354, 356, 370
 Hyperplasia, 1–4, 9, 10, 15, 86, 124, 127, 156, 157, 163, 210, 215, 225–228, 230–232, 236, 237, 244, 257, 266, 272, 295, 323, 324, 332, 343, 348, 351, 356, 357, 393
 Hyperplastic and reactive urothelial changes, 2, 4, 9, 10, 87, 208, 324

I

Incomplete bifid ureter with blind end, 123
 Infected Skene's gland cyst, 205
 Inflammatory cells and reactive epithelial changes, 225
 Inflammatory myofibroblastic tumor, 101, 112, 113, 128, 129, 191–193
 Intralobar nephrogenic rests (ILNR) and nephroblastoma, 87, 88
 Intrarenal neuroblastoma, 120
 Intratesticular mesothelial cyst, 354
 Intratubular germ cell neoplasia, 297–299, 316, 333
 Intratubular seminoma, 299
 Invasive adenocarcinoma, growth patterns, 182–184
 Invasive primary urothelial carcinoma, 211
 Inverted papilloma, 132, 162, 163, 171, 238

J

Juxtaglomerular cell tumor, 107, 108

K

Kaposi's sarcoma, 386, 387
 Klinefelter's syndrome, 295, 296, 323

L

Large cell calcifying Sertoli cell tumor, 328, 329
 Large cell neuroendocrine carcinoma, 188, 189, 265
 Leiomyoma, 83, 90, 105, 106, 194, 195, 209, 276, 334, 364
 Leiomyosarcoma, 27, 99, 100, 178, 193, 196, 197, 278–280, 336, 337, 369
 Leukemia, 121, 338, 340, 341
 Leydig cell nodule and hyperplasia, 296, 323, 324, 332
 Leydig cell tumor, 320–324, 331
 Lipogranuloma, 375
 Lipoma, 363, 364, 367
 Liposarcoma, 101, 178, 261, 366–368
 Low-grade sarcoma NOS, 101
 Lymphangioma, 107
 Lymph node metastases, 98, 269, 270
 Lymphoepithelioma-like carcinoma, 262
 Lymphoma, 24, 113, 120, 121, 129, 174, 175, 193, 201, 280, 281, 285, 303, 337, 338, 375, 387

M

Macronodular hyperplasia with marked adrenal enlargement, 4
 Malakoplakia, 147, 148, 224, 290, 291
 Malignant fibrous histiocytoma (MFH), 100, 101, 198, 199, 398
 Malignant melanoma, 200
 Malignant neoplasms, 15, 141, 176, 366
 Malignant soft tissue neoplasms, 196–199
 Malignant solitary fibrous tumor, 26
 Massive scrotal lymphedema, 390, 391
 Meconium periorchitis, 355
 Median raphe cyst, 203, 388
 Megaureter, 123, 124
 Melanoma, 101, 105, 121, 200, 213, 214, 341, 386
 Melanosis, 161, 386
 Mesenchymal neoplasms of prostate, 275–280
 Mesodermal adenocarcinoma, 335, 336
 Mesonephric remnants, 233
 Mesothelial hyperplasia, 356
 Mesothelioma, 370, 371
 Metanephric adenoma, 84, 85
 Metanephric stromal tumor, 86, 87
 MFH. *See* Malignant fibrous histiocytoma
 Mixed epithelial and stromal tumor, 83, 115, 116, 140
 Mixed germ cell tumors, 305, 314, 316–318
 Molluscum contagiosum, 379, 380
 Mucinous (colloid) carcinoma, 182, 258
 Mucinous metaplasia, 162, 235
 Mucinous tubular and spindle cell carcinoma, 63, 74–76, 81
 Müllerianosis, 160
 Multilocular cystic renal cell carcinoma, 58, 59, 93, 114
 Mumps orchitis, 289
 Mural calcifications, 5, 238, 239
 Myelolipoma, 1, 6–8
 Myofibroblastic pseudotumor, 291

N

Neoplastic penile lesions, 380–388
 Neoplastic scrotal lesions, 393–398
 Nephroblastoma (Wilms tumor), 85, 87–94, 114, 120, 313

Nephrogenic metaplasia, 126, 155, 156, 173, 206, 234
 Nerves and paraganglia/intraprostatic ganglion cells, 219
 Neuroblastic neoplasms, 19–23
 Neuroblastoma, 19–23, 120, 341
 Neuroendocrine and neural neoplasms, 187–191
 Neurofibroma, 20, 190
 Neurovascular bundle, 217, 267
 Nongranulomatous cystitis, 144–146
 Nonneoplastic lesions, 141, 153–161

O
 Oncocytic adrenal cortical carcinoma, 16
 Oncocytoma, 48–51, 64, 66, 67
 Oncocytosis, 50, 51
 Osteosarcoma, 122, 136, 177, 199

P
 Pagetoid spread and microinvasion, 243
 Papillary adenoma, 49, 51, 52
 Papillary cystadenoma, 344, 345
 of epididymis, 366
 Papillary necrosis, 44, 45
 Papillary-polypoid pyelitis, 126
 Papillary renal cell carcinoma, 51, 52, 60–63, 79, 85
 Papillary urothelial hyperplasia, 156, 157
 Paraganglioma, 16, 18, 189, 190, 266
 Pathologic T stages and other prognostic findings, 266–269
 PECOMA. *See* Perivascular epithelioid cell tumor
 Pediatric adrenal cortical neoplasm of uncertain malignant potential, 13, 14
 Penile radiation necrosis, 375
 Penile strangulation and infarction, 374, 375
 Perilobar nephrogenic rests (PLNRs), 87
 Perirenal abscess, 39, 40, 47, 48
 Periureteral inflammatory myofibroblastic tumor, 128, 129
 Perivascular epithelioid cell tumor (PECOMA), 196
 Perivesical abscess, 151, 152
 Peyronie's disease, 373, 374
 Pheochromocytoma, 1, 5, 9, 16–19
 Phyllodes tumor, 277
 Pigmented adrenal cortical adenoma, 11
 PIN. *See* Prostatic intraepithelial neoplasia
 PIN compared with normal glandular epithelium, 240
 Plasmacytoma, 339, 340, 372
 PLNRs. *See* Perilobar nephrogenic rests
 PNET. *See* Primitive neuroectodermal tumor
 Polypoid urethritis, 207
 Postatrophic hyperplasia, 230
 Posterior urethral valves, 203
 Postneuroblastoma renal cell carcinoma, 76
 Postoperative spindle cell nodule, 193, 194
 Primary pigmented nodular adrenal cortical disease (PPNAD), 4, 5
 Primitive neuroectodermal tumor (PNET), 118–120, 191
 Proliferative inflammatory atrophy, 230, 231
 Prostatic adenocarcinoma, 202, 214, 216, 219, 244–261, 263, 269–275, 282, 283, 387, 388
 Prostatic infarct, 236
 Prostatic intraepithelial neoplasia (PIN), 232, 240–244, 246, 250, 255, 273, 275
 Prostatic urethral polyp, 237
 Prune belly syndrome and associated malformations, 141, 142
 Pseudoglandular hyperplasia, 3
 Pseudohyperplastic carcinoma, 256
 Pyonephrosis, 41, 42

R

Radiation cystitis, 152, 153
 Reflux nephropathy, Ask-Upmark kidney, 42–44
 Regressed (burntout) germ cell tumor pt0, 317, 318
 Renal agenesis, 30, 31
 Renal calculi and xanthogranulomatous pyelonephritis, 45, 46, 80, 101, 125, 126
 Renal cell carcinoma, 14, 27, 39, 49–85, 105, 106, 114, 121, 139, 140, 175, 202, 387
 Renal dysplasia, 35–38
 Renal ectopia and fusion anomalies, 32, 33
 Renal fusion anomalies, 32
 Renal medullary carcinoma, 70–72
 Renal tuberculosis, 47, 48, 362
 Renomedullary interstitial cell tumor, 108, 109
 Retroperitoneal fibrosis, 129
 Rhabdoid tumor, 97, 98
 Rhabdomyosarcoma, 136, 145, 178, 193, 197, 198, 278, 279, 314, 315, 341, 368, 369, 372

S

Sarcoidosis, 290, 363
 Sarcomatoid carcinoma and carcinosarcoma, 83, 84, 101, 135, 136, 138, 176, 178, 187, 199, 261
 Schistosomiasis, 150, 186
 Schwannoma, 24, 25, 109, 110
 Sclerosing adenosis, 232, 233
 Scrotal calcinosis, 392
 Segmental infarcts due to vasculitis and fibromuscular dysplasia, 180, 293
 Seminoma, 28, 121, 122, 201, 299–305, 307, 316–319, 325, 332
 Septic emboli and septic infarct, 41
 Sertoli cell adenoma, 326, 327
 Sertoli cell nodule, 326
 Sertoli cell tumor, 325–329
 Signet ring cell carcinoma, 259
 Simple cortical cyst, 38
 Simple cyst, 38, 343
 Small cell carcinoma, 118, 135, 138, 166, 170, 187–189, 264, 265, 314
 Smooth muscle hyperplasia of epididymis and vas deferens, 357
 Soft tissue/myofibroblastic proliferations, 191–194
 Soft tissue neoplasms of urethra, 137, 194–199
 Solitary fibrous tumor, 101, 110–112, 116, 276, 277
 Spermatic cord and testicular adnexae, 347–372
 Spermatocele, 352
 Spermatocytic seminoma, 303, 304
 Splenogonadal fusion, 288
 Splenorenal fusion, 31
 Squamous cell carcinoma, 135, 137, 138, 155, 184–187, 212, 260, 263, 373, 380–385, 389, 396–398
 Squamous metaplasia, 137, 154, 155, 163, 185, 186, 234, 236
 Squamous papilloma, 163
 Stromal hyperplasia with atypia, 227
 Stromal nodule and fibroadenomatous BPH, 226, 227
 Stromal sarcoma, 278
 Synovial sarcoma, 101, 116, 117
 Syphilis, 377

T

Teratoma, 139, 201, 305, 311–316, 318, 333
 Testicular torsion, 292, 293
 Testicular tumor of adrenogenital syndrome, 324
 Torsion of appendix testis, 357

Translocation carcinoma, 72–74

Tuberculous epididymitis, 362

Tubulocystic carcinoma, 77

U

Unclassified sex cord-stromal tumor, 331

Uncommon histologic findings, 248–250

Undescended testis, 295, 296

Unusual findings in renal cell carcinoma,
57, 64, 81

Unusual intrapelvic tumors, 139, 140

Urachal cyst, 142, 143

Ureteral endometriosis, 127

Ureteral stricture, 127, 128

Ureteritis cystica and glandularis, 125

Ureterocele, 37, 123–125

Urethral diverticulum, 205, 206, 209, 212

Urethral meatal cyst, 203

Urethral neoplasms, 209–214

Urothelial carcinoma, 130–139, 150, 161, 163,
165–181, 183, 187, 199, 201, 211, 223,
262, 263, 282, 283, 341, 387

Urothelial dysplasia, 164

Urothelial (transitional cell)
metaplasia, 235

Urothelial papilloma, 162, 163

V

Vanished testis, 286

Varicocele, 294, 295, 304, 344

Vasitis nodosa, 361

Verumontanum, ejaculatory ducts, and seminal vesicles,
203, 204, 215, 219, 220, 237–240, 268, 269,
282, 283, 335, 347, 348, 351

Verumontanum mucosal gland hyperplasia, 237

Villous adenoma, 130, 180, 181, 212

Viral cystitis, 153

Von Brunn's nests and cystitis cystica, 130, 153,
154, 166, 168, 171, 173

W

Waterhouse-Friderichsen syndrome, 1, 2

Wolffian remnants, 349–351

X

Xanthoma, 149, 163, 224, 257

Y

Yolk sac tumor, 71, 201, 305–310, 316, 317

Z

Zones: peripheral, transitional and central, 19, 215–217, 222, 225, 244

Zoon's balanitis, 373, 381
