

# Index

## A

Acid etching, 30  
Acrylic compounds, 37  
Adhesive damage, 4  
Admixture, 42  
Air-entraining agents, 43  
Aluminium oxide, 150  
Amplitude-frequency spectrum, 70  
Anisotropy, 63  
Apparent P-wave speed, 69  
Arithmetical mean height, 62, 119  
Artificial intelligence, 86  
Artificial neural network, 86  
As-cast, 27, 123  
Atomic mass, 73  
Atomic number, 73  
Attenuation coefficient, 73  
Autocorrelation, 63  
Average mobility, 67

## B

Backscattered electron, 75  
Bleeding, 33  
Blistering, 41  
Bonding agent, 37, 40  
Broadband velocity transducer, 65  
Broyden-Fletcher-Goldfarb-Shanno, 99  
Brushing, 30

## C

Calcium oxide, 150  
Capillary suction, 42  
Carbonation, 43  
Cement composite, 3  
Cement mortar, 86

Cement skin, 32  
Chauvenet criterion, 97  
Chemical bonding, 8  
Chlorinated rubber, 37  
Coarseness, 129  
Cohesive damage, 4  
Compaction, 37  
Compressive strength, 33  
Concrete floor, 108  
Concrete skin, 133  
Core fluid retention index, 64  
Cracks, 34  
Creep, 36  
Curing, 37

## D

Data filtering, 61  
Debonding, 44  
Defects, 34  
Deformation, 41  
Delamination, 35  
Developed interfacial area ratio, 119  
Discontinuities, 35  
Disk, 57  
Dominant frequency, 69  
Dragging jute, 30  
Driving platform, 115  
Durability, 47  
Dynamic stiffness, 67

## E

Elastic force, 65  
Elastic modulus, 36  
Ettringite, 15  
Evaporation, 38

Existing constructed layered systems, 100  
Exposed aggregate, 124

**F**

Fatigue, 42  
Final state, 9  
Flame treatment, 28  
Flow, 40  
Flow of water, 15  
Fly-ash, 40  
Fourier transform, 69  
Functional state, 8

**G**

Genetic algorithm, 93  
Geometrical effective surface area, 11  
Geophone, 65  
Gradient descent algorithm, 103  
Greyscale, 136  
Grinding, 28  
Grooving, 30  
Ground, 123

**H**

Hammer, 65  
Hardening, 139  
Hardness, 74  
Heterogeneity, 33  
Honeycombing, 71  
Hydrodemoliton, 28

**I**

Impact-echo method, 68  
Impactor, 68  
Impulse-response method, 65  
Indentation depth, 75  
Indentation modulus, 74  
Initial state, 8  
Interface, 6  
Interfacial transition zone, 12  
Interphase, 6  
Interphase zone, 141  
Isometric view, 26, 61  
Isotropy, 63

**K**

Kurtosis, 62, 119

**L**

Laitance, 29, 153  
Lambert-beer law, 71  
LASER, 59  
LASER scanner, 59  
LASER triangulation, 60

Lavenberg-Marquardt (LM), 107  
Layered systems, 4  
Leaching of cement paste, 30  
Learning algorithms, 86  
Level of adhesion, 4  
Light stereo microscope, 71  
Low pressure washing, 28

**M**

Macro-scale, 10  
Manometer, 57  
Maximum height, 62  
Maximum peak height, 62  
Maximum pit height, 62  
Mechanical interlocking, 8  
Mechanical treatment, 29  
Membrane curing, 38  
Meso-scale, 11  
Methodology, 105, 155  
Microcracking, 24, 45  
Micro-scale, 12  
Microstructure, 134  
Milling, 28  
Mobility slope, 67  
Mobility spectrum, 67  
Moisture condition, 38  
Molecular level, 13  
Monomolecular films, 38  
Morphological parameters, 117  
Morphology, 24  
Mortar skin, 32

**N**

Nanoindentation, 74  
Nano-scale, 13  
Near-surface layer, 31  
Near-surface zone, 138  
Needle gun, 29  
Newly constructed layered systems, 94

**O**

Oil, 40  
Optical microscope, 125  
Optical microscopy, 71  
Osmosis, 41  
Overlay transition zone, 6  
Oxides, 149

**P**

Paraffinic emulsions, 38  
Patch grabbing, 27  
Peak material volume, 119, 123  
Peaks, 63  
Pearson's correlation coefficient, 91

- Penetrating layer, 15  
Permeability, 36  
Permeable layer, 12  
Permeation, 42  
Physical bonding, 8  
Piezoelectric transducers, 68  
Placement, 37  
Plastic films, 38  
Pre-wetting, 38  
Principal component analysis, 86  
Protective coatings, 38  
Pull-off adhesion, 4  
Pull-off test, 57  
P-wave, 68
- Q**  
Quasi-Newton, 107
- R**  
Radial basis function, 86  
Raw, 123  
Reaction layer, 12  
Ready-mix, 33  
Rheological factors, 41  
Root mean square height, 62, 119
- S**  
Sand-blasting, 28  
Saturation, 40  
Scales, 44  
Scales of observation, 10  
Scanning electron microscopy, 75, 149  
Scarifying, 28  
Segregation, 33  
Self-organizing feature map, 86  
Sensitivity analysis, 96  
Shadow effect, 60  
Shape, 25  
Shapiro-wilk, 120  
Shot-blasting, 28  
Shrinkage, 36  
Silicon dioxide, 150  
Skewness, 63, 119  
Skin of concrete, 31  
Softening, 41  
Spearman's rank correlation coefficient, 91  
Spectroscopy, 75  
Strongly-affected layer, 15
- Structure of the air pores, 133  
Surface bearing index, 64  
Surface texturing, 30  
Suspension, 38  
Swelling, 41  
Synthetic resins, 37
- T**  
Temperature, 36  
Temperature drop, 39  
Tensile strength, 36  
Tension, 58  
Texture aspect ratio, 63, 119  
Texturing, 30  
Thermal coefficient, 36  
Transient stress waves, 68  
Transient vibration, 65
- U**  
Ultrasonic method, 33  
Unmanned ground morphoscanning vehicle, 115
- V**  
Valley fluid retention index, 65  
Valleys, 63  
Variable thickness of the overlay, 94  
Velocity spectrum, 66  
Vestibule of the freezer, 108  
Vibration, 34  
Voids, 35  
Voids index, 67  
Volume fraction of pores, 73
- W**  
Wall effect, 12  
Water-blasting, 28  
Water film, 13  
Water-jetting, 28  
Waterproof papers, 38  
Wax compounds, 37  
Weakly-affected layer, 15  
Weight of evidence, 89  
Workability, 37
- X**  
X-ray micro-computed tomography, 71
