

Index

A

- Activation function
 - linear, 12, 122
 - nonlinear, 97, 114, 117, 122, 175
- Artificial neural networks
 - structure selection, 143
- Automatic control, 60

B

- Back-Propagation algorithm (BP), 13
- Binary diagnostic matrix, 92, 102
- Bounded-error approaches, 44

C

- Constrained optimization, 87
- Constraints, 79, 121
 - horizon, 79, 84, 109
 - inequality, 89
 - input, 79, 91
 - output, 79, 91, 108, 109, 120
 - soft, 79, 108
 - terminal, 85, 87, 100
- Contraction mapping, 175
- Control, 99, 124
 - classification, 62
 - closed-loop, 59, 71, 113, 121
 - neural networks, 61
 - open-loop, 59, 97
 - reconfiguration, 131
 - robust, 109
- Control horizon, 78, 99
- Cost function, 78
- Cost optimization, 78

D

- Deep belief networks, 17
- Diophantine equation, 91
- Direct inverse control, 62
- Discrete Fourier Transform (DFT), 143
- Dynamic neuron unit, 26

E

- Echo-state network, 33
- Error model, 47, 49, 51, 83, 107, 116

F

- Fault, 70
 - actuator, 71
 - distinguishability, 93
 - estimation, 94
 - intensity, 94
 - isolation, 103
 - process, 71
 - sensor, 71, 92, 94, 106
 - tolerance, 78, 104
- Fault accommodation, 147
- Fault detection
 - threshold, 93, 103, 148
- Fault detection and isolation, 92
- Fault diagnosis, 47, 92, 101
- Fault-tolerant control, 70, 92, 147
 - active, 71
 - classification, 71
 - fault compensation, 147
 - passive, 71, 106
- Feedback controller, 189
- Feed-forward control, 64
- Finite impulse response, 111
- Forward modelling, 39, 63

I

- Identification model
 - parallel, 40, 81
 - series-parallel, 40
- ILC, *see* iterative learning control
- Infinite impulse response, 111
- Instantaneous linearization, 90, 107, 124
- Internal model control, 63
- Inverse modelling, 42, 62, 65
- Iterative learning control, 169
 - convergence, 178, 179, 183
 - current iteration, 171
 - neural, 172
 - parallel architecture, 171
 - serial architecture, 171
 - stability, 194

K

- Karush-Kuhn-Tucker conditions, 87

L

- Learning controller
 - D type, 183, 187
 - dynamic, 193
 - neural, 185, 193, 196
 - neural network, 176
 - parameters update, 177, 194
 - PD type, 188
 - P type, 179, 185, 191
 - static, 173
- Learning transient, 186
- Learning vector quantization, *see* neural network LVQ
- Levenberg–Marquardt, 98, 103, 114, 122, 143
- Linear ILC, 172
- Lipschitz condition, 195
- Lipschitz constant, 175, 182, 191
- Locally recurrent globally feed-forward network, 27
- LRGF, *see* locally recurrent globally feed-forward
- LSTM, *see* neural network long short term memory

M

- Magnetic suspension, 189
- Model
 - disturbance, 80, 99, 104
 - linear, 91
 - linearization, 90, 116

- mathematical, 10
- neural, 31, 80, 97, 113, 121, 174, 185, 190, 193
- partial, 101, 103
- robust, 109
- uncertainty, 44, 81, 111

Model error modelling, 47, 82, 145

- ARX, 145
- confidence region, 146
- NLARX, 145
- NNARX, 145

Model predictive control, 65, 77

- constrained, 115, 118
- nonlinear, 78, 84
- robust, 106, 118, 120

Model reference control, 63

Multilayer perceptron, 21

Multi-valued diagnostic matrix, 94, 102

N

Neural modelling, 142, 143

Neural network, 13

- DBN, 17
- LVQ, 16
- feed-forward, 12
- generations, 9
- Kohonen, 15
- NARX, 114, 122
- NFIR, 117
- NIIR, 117
- probabilistic, 19
- pulse coupled, 36
- RBF, 13
- recurrent, *see* recurrent network
- spiking, 35
- static, 11
- time-delay, 21
- with external dynamics, 21, 32

Neuron, 11

- Adaline, 12
- dynamic, 26, 31
- hidden, 24, 26, 33
- McCulloch–Pitts, 11
- memory, 29
- output, 25
- with infinite impulse response, 30
- with local activation feedback, 27
- with local output feedback, 28
- with local synapse feedback, 27

Nonlinear behaviour, 112

- Nonlinear ILC, 172
 - current iteration, 173

Nonlinear optimization, 86, 89
 Nonlinear programming, 79, 90

O

Observer, 10
 Optimal control, 66

P

Parameter estimation, 10
 PI, 147
 PI controller, 113, 118
 PID, 64, 100, 104
 Pneumatic servomechanism, 112, 121, 185, 196
 PNN, *see* neural network probabilistic
 Prediction, 91
 Prediction horizon, 78, 99, 114
 Predictor, 81, 107, 110, 114, 121
 nonlinear, 84, 98
 Pulse coupled neural network (PCNN), *see*
 neural network pulse coupled

Q

Q filter, 186, 191
 Quadratic programming, 91, 108, 124
 Quality indexes
 FPE, 143
 SSE, 143
 tracking error, 148

R

Radial basis function, *see* neural network
 RBF
 Recurrent multilayer perceptron, 25
 Recurrent network
 Elman, 24
 ESN, 33
 fully, 23
 Jordan, 24
 long short term memory, 38
 NOE, 81, 97
 partially, 24, 25
 state space, 31
 RLMP, 25
 Robust
 control, *see* robust control
 identification, 44, 47
 model, 44, 82
 Robust control, 66, 120, 170
 classification, 66

Robust model, 117
 Robustness, 99, 106, 108
 Robust stability, 109

S

Self organizing map (SOM), *see* neural network Kohonen
 Set-membership identification, 44, 46
 Significance level, 47
 Spiking neural networks, *see* neural network
 spiking
 Stability, 148
 autonomous, 148
 LMI, 148
 Lyapunov direct method, 140, 196
 original system, 139, 148
 P controller, 137
 predictive control, 83, 100, 109, 119
 sufficient conditions, 140
 State-space neural network (SSNN), *see* recurrent network state space
 Statistical-error bounds, 44

T

Tank unit, 95, 142, 147
 faults, 142
 Tapped-delay lines, 21
 Testing data, 142
 Training data, 97, 121, 142
 Two tank system, 151

U

Uncertainty
 additive, 69, 82
 bounds, 47, 49, 50
 description, 67
 global, 70, 81
 multiplicative, 69, 116, 124
 parametric, 68, 117, 124
 polytopic, 70
 region, 50, 51, 123
 statistical bounds, 50, 120
 structured, 68
 unstructured, 69
 Uncertainty description, 124
 Uncertainty modelling, 111, 117, 123

W

Williams-Zipser, *see* recurrent network fully
