

# Index

## A

- Advection method
  - configuration, 135
  - drill point angle and diameter, 135
  - heat flux, 134
  - heat source, 135

## B

- Battery-powered orthopaedic hand drill, 154
- Bielomatik dual-channel, 87
- Body-centered cubic (BCC), 2
- Bone debris in drilling, 149, 153–156, 159, 162
- Bone drilling
  - bone necrosis, 118
  - cannulated drills, 118
  - drill wear, 130
  - dynamometer, 118
  - effects on size, 121
  - effects on type, 121
  - FEM, 135
  - heat accumulation
    - cortical bone, 129
    - histology analysis, 128, 129
    - K-wire, 126
    - “slow-cooker” effect, 129
    - twist drill, 126
  - Kirschner wire, 11, 12, 118
  - orthopaedic drills, 118
  - orthopaedic surgeons, 12, 13
  - orthopaedic surgery, 130
  - osteocytes, 118
  - osteonecrosis, 117
  - photomicrographs, 129
  - single-pass bone, 117
  - thermal models, 133, 134

- thermocouple fixation plate, 124
- thermocouples, 128
- thrust force vs. torque, 122
- twist vs. cannulated drills, 121
- Bone necrosis, 140, 141
- Bone temperature, 120, 122, 149, 155, 157–159, 161, 162
- Bone thermal damage criterion, 134
- Built-up edge (BUE), 161
- Burr formation, 46, 48

## C

- Carbon fiber reinforced plastic (CFRP), 3
- Chisel edge temperature, 66
- Compacted graphite iron (CGI), 4–7, 15, 77
  - drilling tool and experiment, 78–80
  - force, torque, drill wear and chip speed, 82–84
- Computer-aided design (CAD) software, 55
- Computer numerical control (CNC), 9, 119, 153
- Coordinate measurement machine (CMM), 91
- Cross Hüller machine, 100
- Cubic boron nitride (CBN), 153
- Cutting-edge temperature, 52
- Cutting fluid supply, 29, 30

## D

- Deep-hole drilling
  - air pressure, 86
  - force, torque and temperature rise, 88–90
  - HWS, 97
  - IHTM, 95, 99
  - temperature distribution and hole quality, 89, 91, 92

- Deep-hole drilling (*cont.*)  
 thermal model, 96, 97  
 workpiece temperature, 87, 107
- Drill cutting edge contacts, 52
- Drill deformation, 69, 70
- Drill failure prediction, 70–74
- Drill spatial temperature distribution, 67, 68
- Drill stress, 70–74
- Drill 3D geometry, 55, 56
- Drill temperature  
 analytical modeling, 53  
 experimental measurements, 51, 52  
 IHTM (*see* Inverse heat transfer method (IHTM))  
 inverse solutions, 63–65  
 spatial temperature distribution, 67, 68  
 temporal temperature distribution, 66, 67
- Drill thermo-mechanical analysis  
 drill deformation, 69, 70  
 stress and failure prediction, 70–74
- Drilling  
 bone (*see* Bone drilling)  
 IHTM (*see* Inverse heat transfer method (IHTM))  
 metal (*see* Metal drilling)  
 thermal aspects  
 bone, 5, 6  
 cast iron, 4, 5  
 titanium alloys, 2–4
- Dual-axis rotary table, 153
- Dual-channel MQL systems, 8
- Ductile iron (DI), 4, 5, 77, 87
- E**
- Elementary cutting tool (ECT)  
 chip thickness and shear angle, 53  
 oblique cutting angles, 55  
 oblique cutting mechanics, 58–60
- F**
- Finite difference method, 53
- Finite element method (FEM), 53, 96, 97, 99–101, 104, 107, 108, 112, 113  
 drill temperature, 53  
 thermal model of drill, 53  
 3D thermal model, 56–58
- Finite element thermal model  
 advection model, 134, 136  
 IHTM, 137–139  
 multi-hole drilling, 136, 137
- G**
- Geometrical dimension and tolerance (GD&T), 95
- Gray iron (GI), 4, 5, 77
- H**
- Heat generation, 60, 61
- Hexagonal close-pack (HCP), 2
- High-speed drilling, 78
- High-speed steel (HSS), 21–24, 26–29, 33, 46, 48
- High-throughput drilling, 84, 92
- Hole bottom surface (HBS), 96, 97, 102, 103, 108–110, 112
- Hole wall surface (HWS), 96, 97, 99, 102, 103, 106, 108, 109
- I**
- Inverse heat transfer method (IHTM)  
 bone density, 137  
 bone temperature, 15  
 convective heat transfer coefficient, 62, 63  
 cortical bone, 137  
 deep-hole drilling, 99  
 drill temperature and failure prediction, 14  
 drill 3D geometry, 55, 56  
 ECT, 53, 55–60  
 FEM thermal model, 53, 137  
 heat generation, 60, 61, 96  
 heat source, 137  
 K-wire and twist drill, 137, 139  
 single and multiple holes, 139  
 stainless steel drill, 138  
 thermocouples, 137  
 3D FEM thermal model, 56–58  
 thermal expansion, 14, 15  
 Ti drilling, 53
- K**
- Kirschner wire (K-wire), 11, 12, 15  
 high drilling temperature, 149  
 notched (*see* Notched K-wires)
- M**
- Manganese sulfide (MnS), 5
- Material removal rate (MRR), 1, 4, 7, 14, 21–24, 26, 31, 34, 40, 48
- Medin K-wire, 149
- Metal working fluid (MWF), 6
- Micro-saw cutting, 151

- Minimum quality lubrication (MQL), 5  
 Minimum quantity lubrication (MQL)  
   cast iron drilling, 77, 78  
   CGI (*see* Compacted graphite iron (CGI))  
   deep-hole drilling (*see* Deep-hole drilling)  
   dry and air-only drilling, 92  
   graphite, 77  
   gray cast iron, 77  
   spindle speed, 93  
   thermal and mechanical effects, 86  
 Modified K-wires, 149, 150  
 Modified thermal dose method, 146
- N**  
 Nanoindentation, 45–47  
 Notched K-wires  
   design, 150–153  
   manufacturing, 153, 154
- O**  
 Oblique cutting model in ECT, 58–60  
 Orthopaedic drill  
   cortical bone, 119  
   feed rate, 119  
   fixation, 123  
   in-vivo tests, 130  
   K-wires and cannulated drills, 118  
   metal drills, 130  
 Osteonecrosis, 117
- R**  
 Root mean square (RMS) error, 64, 65
- S**  
 Slotted K-wire, 149  
 Spheroidal graphite iron, 5  
 Spiral point drill, 55, 56
- T**  
 Thermal conductivities  
   WC-Co tool, 61  
 Thermal damage model  
   drilling sequence, 143, 144  
   multi-hole drilling, 141, 142  
   slow cooker effect, 145  
   thermal dose, 141  
   time intervals, 142, 143  
   twist drill *vs.* K-wire, 142  
 Thermal dose, 140, 141  
 3D advection model, 108, 136  
 3D FEM thermal model, 56–58, 134, 136  
 3D heat carrier model, 108  
 Ti-6Al-4V drilling, 22–24, 26, 28, 34, 35, 38,  
   45, 48, 49  
 Titanium (Ti), 2–4  
 Titanium drilling  
   advanced materials, 49  
   burr formation, 46, 48  
   chip light emission  
     hardness, 38, 39  
     HSS drill, 33  
     microstructure, 34, 37  
     morphology, 34–36  
     WC-Co spiral point drill, 33  
   electron microprobe analysis, 44, 45  
   high-speed drilling  
     cutting fluid supply, 29, 31  
     drill wear, 31–33  
     feed and cutting speed, 31  
     uncoated WC-Co spiral point drill, 28  
   low-speed drilling  
     cutting speed and coolant, 25–27  
     drill types, 28  
   metallurgical studies, 49  
   morphology, 49  
   MRR, 21  
   nanoindentation, 45, 46  
   XRD, 41, 43
- W**  
 Workpiece temperature, 87, 88, 90, 92  
   deep-hole drilling, 95, 115  
   distribution, 113  
   HBS, 102  
   IHTM, 97  
 Workpiece thermal distortion, 107  
 Workpiece thermal expansion, 107, 111, 113
- X**  
 X-ray diffraction (XRD), 41–44  
 X-ray spectroscopy (EDS), 32
