

Index

A

Advanced Traveller Information Systems (ATIS), 305, 306, 308, 312
Air travel demand, 279–283, 288
Anti-lock Braking Systems (ABSs), 83, 84, 91
Artificial Bee Colony (ABC), 327–331, 333, 336
Artificial neural networks (ANN), 233–238, 243, 246, 250
ASRS warehouse, 95, 96
Asymmetric factor model (AFM), 267, 268, 270

B

Back-propagation and face recognition, 203, 206
Bar rolling, 244, 245
Big data, 258
Brain–computer interface, 153–156, 158, 159
Breast MRI, 49, 55, 59
Bus lines, 379

C

Collusion, 32, 34
Containers drayage, 351–353, 358
Continuous feature discretization, 210, 212
Convolutional neural network (CNN), 197–199, 201, 203, 204
Correlation, 37–42, 45–47
Correlation approach, 263

D

Data fusion, 131, 139, 307, 310, 312
Depth camera, 131, 132, 134, 137, 139
2D histogram, 187, 188, 190–192

Differential evolution and tabu search, 61
Distance-based clustering, 178, 181
Driver drowsiness, 130, 131, 135, 136, 137, 139
Diversity, 15, 16, 19, 20
Driving simulator, 307, 309, 311
Dual lane, 343

E

Edible bird nest, 165, 166
EEG pattern classification, 154
Emergency corridors, 292
Entropy, 38, 42, 43, 45, 46, 47
Equilibrium Problems with Equilibrium Constraints, 25, 34
Evaluation, 316, 317, 320
Evolutionary algorithms, 95–97, 99, 100
Evolving tree, 141–146, 148, 150

F

Failure mode and effect analysis, 165, 166, 169, 175
Fast, 177
Feature selection, 16, 19–22
Flexible constraints, 302
fMRI, 154, 155, 160, 161
Freeways, 339, 340
Fuzzy Lambda-Tau (FLT) technique, 105
Fuzzy logic, 278, 280, 283–288, 339, 340, 349
Fuzzy optimization, 377
Fuzzy programming, 302
Fuzzy reasoning, 285
Fuzzy sets, 292, 294, 295
Fuzzy system theory, 316, 317

G

GABLT technique, 106, 107
 Genetic algorithm, 108, 365, 367, 368
 Genetic programming, 37–39, 42, 47,
 223–225, 227, 229
 Genotypic diversity, 37, 38, 42, 43, 45–47
 Goal programming, 378–380, 386
 Goat milk powder, 236

H

High dimensional data, 223, 225, 228, 230

I

Image and signal processing, 157
 Independent component analysis, 153, 156,
 158, 159, 161, 224
 Indoor localization, 3, 4
 Intravascular ultrasound, 187–189
 Intrusion detection, 210

J

Job shop scheduling, 97

K

k-nearest neighbor, 188, 191

L

Level Set Active Contour, 49, 50, 59
 Liver fibrosis, 15–17
 Logistic regression classifier (LRC), 197, 198

M

Machine learning, 16
 Machine learning algorithms, 204, 207
 Magnetic sensor localization, 3–5, 9
 MATLAB, 238
 Matrix factorization, 265–269, 273
 Medical informatics, 19
 Metaheuristics, 366
 Modeling, 378, 379
 Monotonicity property, 165, 166, 168, 175
 Morphological thinning, 49, 52, 59
 Motor imagery, 153, 159–161
 Multimodal optimization problems, 61
 MultiObjective Evolutionary Algorithms, 26
 Multi-objective optimization, 118, 120
 Multi-objective Variable Neighborhood
 Search, 117, 119, 120, 126

Multi-sensor, 131

Multi-sensor data fusion, 129, 131, 139
 Multiple Classifier System, 16, 19, 22, 13

N

Nash Equilibrium, 29, 29, 35
 Nearest neighbour, 71, 72, 75
 Network design, 291, 292, 296
 network security, 209, 210, 257, 258
 Neural network, 15, 16, 18, 19, 21, 23, 129,
 135, 136
 Nonlinear data projection, 223, 224, 226
 Nonlinear programming, 106

O

Online learning, 141, 142
 Optimization, 83, 84, 86–88, 90, 328, 329,
 332, 336, 366, 367, 373

P

Pareto iterated local search, 117, 119, 120,
 122, 126
 Particle swarm optimization, 9–12, 50, 54, 55,
 62, 67–69, 139
 Pattern classification, 71, 72, 80
 Pattern recognition, 154
 People recommendation, 267, 268
 phenotypic diversity, 38, 42, 43, 45, 46, 47
 Pickup delivery, 353, 354, 359, 361
 PSO image clustering, 51, 53, 54, 56, 59, 59

R

Radial basis function, 233, 236, 240
 Radial basis function neural network, 73
 Radio frequency signal, 187–190, 192
 Ramp metering, 340, 342, 345, 348, 349
 Real-time experiments, 83, 84, 90
 Reliability indices, 106, 107, 109, 111, 112,
 114
 Route choice modeling, 311, 312
 Routing problems, 365–367

S

Sammon's non-linear mapping (NLMR), 3, 5,
 8, 9, 11, 12
 Sammon's mapping, 3, 5, 7–9
 Seeded region growing, 49, 50, 51, 53–56, 59
 Signal settings optimization, 299
 Signal timings, 328, 331–333, 336

Simulated annealing, 83, 84, 86–91
Single-input-rule-modules connected fuzzy inference system, 165–167, 169, 175
Single machine scheduling, 117, 118, 125
Social graph, 265–268, 270, 273, 274
Social recommender systems, 266, 274
Solubility index, 233, 234, 236, 238, 240
SQLIA detection, 258, 259
Stated Preference, 305–307
Sustainability, 315–319, 321–324

T

Takagi-Sugeno fuzzy models, 83, 84, 86, 87, 90, 91
Team orienteering problem, 365–369, 371, 374
Text document clustering, 141, 142, 145, 146, 148, 150
Time windows, 353, 355, 358
Traffic, 340, 341, 345, 349
Traffic signal control, 342, 343

Trained fuser, 20, 22, 23
Transportation, 25, 32
Trip distribution, 279, 280, 284, 288
Trip generation, 279–281, 283–285, 288
Tumour segmentation, 49, 50, 53, 59

U

Uncertainty, 292, 302

V

Variable Neighborhood Search, 351
Vehicle routing, 351, 353, 357
Visualisation, 224, 226, 230

W

Wear, 244–246, 248–252
Wireless sensor networks, 178, 179, 186
