

Index

INDEX FOR RECT VOL. 229

- Absorption, mercury, **229**: 5
- Agbogbloshie (Ghana) scrap yard, e-waste water pollution, **229**: 22
- Agbogbloshie (Ghana), e-waste recycling (illus.), **229**: 23
- Alzheimer's disease, main features, **229**: 11
- Alzheimer's disease link, mercury, **229**: 10
- American kestrels, DE-71 (PBDE isomer) NOAEL & LOAEL (table), **229**: 125
- Amyotrophic lateral sclerosis, description, **229**: 11
- Amyotrophic lateral sclerosis, mercury link, **229**: 6, 10
- Anthropogenic sources, cadmium, **229**: 53
- Aquatic avian species in China, PBDE egg TRVs (diag.), **229**: 129
- Aquatic birds, PBDE TRV derivation, **229**: 121
- Aquatic birds, PBDE TRV, **229**: 125
- Aquatic environmental effects, e-waste disposal, **229**: 19 ff.
- Aquatic life effects, heavy metals, **229**: 26
- Aquatic life, organic pollutant effects, **229**: 28
- Aquatic mammals, deriving PBDE TRVs, **229**: 115
- Aquatic mammals, PBDE TRV derivation, **229**: 115
- Aquatic mammals, TRV for PBDEs, **229**: 119
- Aquatic organism toxicity, PBDEs, **229**: 28
- Aquatic organisms, e-waste contaminant effects, **229**: 25
- Aquatic organisms, lead & cadmium toxicity, **229**: 27
- Aquatic species in China, PBDE TRVs (diag.), **229**: 129
- Aquatic species, clomazone toxicity, **229**: 44
- Autoimmune effects, mercury, **229**: 6
- Biotic processes, chlormazone, **229**: 40
- Bird toxicity, of DE-71 (PBDE isomer), **229**: 121
- Birds, PBDE TRVs (table), **229**: 127
- Cadmium effects, chlorophyll & carotenoids, 60, 61
- Cadmium effects, on fatty acid composition, **229**: 63
- Cadmium effects, on free amino acids & proline, **229**: 62
- Cadmium effects, on genetic material, **229**: 63
- Cadmium effects, on key organic osmotica, **229**: 65
- Cadmium effects, on plant growth (table), **229**: 56
- Cadmium effects, on protein levels, **229**: 61
- Cadmium effects, photosynthesis, **229**: 69
- Cadmium effects, plant growth regulators, **229**: 67
- Cadmium effects, plant metal uptake, **229**: 64
- Cadmium toxicity, to aquatic organisms, **229**: 27
- Cadmium, described, **229**: 52
- Cadmium, environmental sources, **229**: 52
- Cadmium, natural vs. anthropogenic sources, **229**: 52
- Cadmium, oxidative defense system effects, **229**: 66
- Cadmium, plant accumulation, **229**: 54
- Cadmium, plant effects, **229**: 59
- Cadmium, plant morphology effects, **229**: 55
- Cadmium, plant pigment effects, **229**: 59
- Cadmium, plant water relations effect, **229**: 70
- Cadmium, protein and protease effects, **229**: 61
- Cadmium, soil and plant behavior, **229**: 54
- Cadmium-enriched environments, plant growth effects, **229**: 51 ff.

- Cadmium-enriched environments, plant metabolic effects, **229**: 51 ff.
- Carotenoid effects, cadmium, **229**: 60
- Chemical behavior, elemental mercury, **229**: 2
- Chemical forms, mercury, **229**: 2
- Chemical washing, during food processing, **229**: 101
- Chemistry, clomazone, **229**: 36
- Chemodynamics, chlomazone, **229**: 37
- Chlorophyll effects, cadmium, **229**: 59
- Clomazone toxicity, aquatic species, **229**: 44
- Clomazone toxicity, to non-target species, **229**: 45
- Clomazone, air & volatilization, **229**: 39
- Clomazone, biotic processes, **229**: 40
- Clomazone, chemistry & physicochemical properties, **229**: 36
- Clomazone, description, **229**: 36
- Clomazone, environmental chemodynamics, **229**: 37
- Clomazone, environmental degradation, **229**: 39
- Clomazone, environmental fate & toxicology, **229**: 35 ff.
- Clomazone, metabolic pathway in soybeans (diag.), **229**: 44
- Clomazone, microbial breakdown pathway (diag.), **229**: 41
- Clomazone, photolytic degradation (diag.), **229**: 40
- Clomazone, physicochemical properties (table), **229**: 37
- Clomazone, photolysis & hydrolysis, **229**: 39
- Clomazone, plant effects, **229**: 43
- Clomazone, plant mode-of-action, **229**: 42
- Clomazone, soil interactions, **229**: 37
- Clomazone, structure (illus.), **229**: 36
- Clomazone, toxicology, **229**: 42
- Clomazone, water behavior, **229**: 38
- Contaminants present, e-waste, **229**: 24
- Contaminants present, in e-waste (table), **229**: 24
- DE-71 (PBDE isomer) NOAEL & LOAEL, American kestrels (table), **229**: 125
- DE-71 NOAEL & LOAEL, mink (table), **229**: 119
- DE-71 toxicity, to birds, **229**: 121
- DE-71 toxicity thresholds (diag.), **229**: 127
- Detergent washing, during food processing, **229**: 101
- Distribution, mercury, **229**: 5
- Elemental mercury, chemical behavior, **229**: 2
- Environmental chemodynamics, clomazone, **229**: 37
- Environmental degradation, clomazone, **229**: 39
- Environmental effects, e-waste disposal, **229**: 19 ff.
- Environmental fate, clomazone, **229**: 35 ff.
- Environmental sources, cadmium, **229**: 52
- Enzyme inhibition, mercury, **229**: 10
- Ethyl mercury, thimerosal in vaccines, **229**: 4
- E-waste contaminant effects, on aquatic organisms, **229**: 25
- E-Waste contaminants (Korle Lagoon), vs. sediment quality guideline values (table), **229**: 25
- E-Waste export, to developing countries, **229**: 20
- E-Waste generated, globally, **229**: 20
- E-Waste in Ghana, quantity imported (diag.), **229**: 21
- E-Waste management, in Ghana, **229**: 21
- E-Waste pollution issue, Ghana, **229**: 20
- E-Waste quantity imported, into Ghana (diag.), **229**: 21
- E-waste recycling, Agbogbloshe (Ghana) (illus.), **229**: 23
- E-Waste recycling, in Ghana, **229**: 22
- E-Waste water pollution, Agbogbloshe (Ghana) scrap yard, **229**: 22
- E-Waste, aquatic environmental effects, **229**: 19 ff.
- E-waste, contaminants present (table), **229**: 24
- E-waste, contaminants present, **229**: 24
- E-Waste, toxic chemicals present, **229**: 20
- FFate in the body, mercury (diag.), **229**: 5
- Fatty acid composition, cadmium effects, **229**: 63
- Food (fruit & vegetable) processing methods, pyrethroid insecticide residue effects (table), **229**: 92–99
- Food blanching, pesticide residue effect, **229**: 104
- Food freezing, pesticide residue effect, **229**: 104
- Food juicing, pesticide residue effect, **229**: 102
- Food processing & pesticides, described, **229**: 90
- Food processing effects, from boiling & cooking, **229**: 103
- Food processing of vegetables & fruit, peeling, **229**: 102
- Food processing, described, **229**: 91
- Food processing, washing with chemicals or detergents, **229**: 101
- Food processing, washing with salt solutions, **229**: 101

- Food processing, washing with tap water, **229**: 91
- Food washing effects, hydrophilic pesticide residues, **229**:100
- Free amino acid effects, cadmium, **229**: 62
- Fruit processing, pyrethroid insecticide residue effect, **229**: 89 ff.
- Genetic material effects, cadmium, **229**: 63
- Ghana, e-waste disposal effects, **229**: 19 ff.
- Ghana, e-waste management, **229**: 21
- Ghana, e-waste pollution issue, **229**: 20
- Ghana, e-waste recycling, **229**: 22
- Heavy metal effects, on aquatic life, **229**: 26
- Heavy metals, described, **229**: 52
- Human exposure sources, mercury, **229**: 3
- Human exposure, to mercury, **229**: 3
- Human poisoning events, methyl mercury, **229**: 4
- Hydrolysis, clomazone, **229**: 39
- Inorganic mercury, in breast milk, **229**: 6
- Insecticide residue effects, from vegetable & fruit processing, **229**: 89 ff.
- Iraqi poisoning event, methyl mercury, **229**: 4
- Kawasaki disease, mercury link, **229**: 6
- Lead toxicity, to aquatic organisms, **229**: 27
- Mammals, PBDE TRVs (table), **229**: 127
- MeHg toxicity, effects described, **229**: 7
- MeHg, selenium effects, **229**: 8
- MeHg, thiol interactions, **229**: 7
- Mercury chelators, structures (illus.), **229**: 9
- Mercury exposure, humans, **229**: 3
- Mercury forms, human exposure, **229**: 3
- Mercury link, amyotrophic lateral sclerosis, **229**: 6, 10
- Mercury link, Kawasaki disease, **229**: 6
- Mercury toxicity, metallothionein effects, **229**: 8
- Mercury toxicity, mitochondrial effects, **229**: 8
- Mercury toxicity, molecular mechanism, **229**: 7
- Mercury toxicity, neurodegenerative effects, **229**: 1 ff.
- Mercury toxicity, reactive oxygen species, **229**: 8
- Mercury toxicity, symptoms, **229**: 6
- Mercury vapor, toxicity, **229**: 6
- Mercury, absorption and distribution, **229**: 5
- Mercury, Alzheimer's disease, **229**: 10
- Mercury, and neurodegenerative diseases, **229**: 10
- Mercury, autoimmune effects, **229**: 6
- Mercury, chemical forms and properties, **229**: 2
- Mercury, enzyme inhibition, **229**: 10
- Mercury, fate in the body (diag.), **229**: 5
- Mercury, neuronal degeneration, **229**: 7
- Mercury, toxicity, **229**: 5
- Metabolic pathway in soybeans, chlomazone (diag.), **229**: 44
- Metal uptake in plants, cadmium effects, **229**: 64
- Metallothionein effects, mercury toxicity, **229**: 8
- Methyl mercury, human poisoning events, **229**: 4
- Methyl mercury, nature & origin, **229**: 2
- Microbial breakdown pathway, clomazone (diag.), **229**: 41
- Minamata disease, mercury poisoning event, **229**: 4
- Minks, DE-71 (PBDE isomer), NOAEL & LOAEL (Table), **229**: 119
- Mitochondrial effects, mercury toxicity, **229**: 8
- Molecular mechanism, mercury toxicity, **229**: 7
- Natural sources, cadmium, **229**: 53
- Neurodegenerative toxicity, defined, **229**: 1
- Neurodegenerative diseases, mercury, **229**: 10
- Neurodegenerative effects, mercury toxicity, **229**: 1 ff.
- Neuronal degeneration, mercury, **229**: 7
- Non-target species toxicity, clomazone, **229**: 45
- Organic osmotica effects, cadmium, **229**: 65
- Organic pollutant effects, on aquatic life, **229**: 28
- Oxidative defense system effects, cadmium, **229**: 66
- PBDEs (polybrominated diphenyl ethers) toxicity, to aquatic organisms, **229**: 28
- PBDE congener profile, wild lake fish (diag.), **229**: 130
- PBDE egg TRVs, for Chinese aquatic avian species (diag.), **229**: 129
- PBDE residues, in wild fish from China (diag.), **229**: 132
- PBDE residues, in wild fish from Chinese lakes (table), **229**: 131
- PBDE toxicity reference values, birds & mammals, **229**: 111 ff.
- PBDE TRV derivation, aquatic birds, **229**: 121
- PBDE TRV derivation, for aquatic mammals, **229**: 115
- PBDE TRV, for aquatic birds, **229**: 125
- PBDE TRV, for aquatic mammals, **229**: 119
- PBDE TRV, mammals & birds (table), **229**: 127
- PBDE TRVs, Chinese aquatic species (diag.), **229**: 129
- PBDEs, described, **229**: 112
- PBDEs, ecological risk assessment, **229**: 130

- Peeling of vegetables & fruits, pesticide residue effect, **229**: 102
- Pesticide residue effect, from boiling or cooking food, **229**: 103
- Pesticide residue effect, from food blanching or freezing, **229**: 103
- Pesticide residue effect, from food juicing, **229**: 102
- Pesticide residue effects, food washing, **229**: 100
- Pesticide residue effects, from fruit & vegetable peeling, **229**: 102
- Photolysis, clomazone, **229**: 39
- Photolytic degradation, clomazone (diag.), **229**: 40
- Photosynthesis effects, cadmium, **229**: 69
- Physicochemical properties, clomazone (table), **229**: 37
- Physiochemical alterations in plants, cadmium, **229**: 59
- Physiochemical effects, cadmium (table), **229**: 56
- Pilot whale contamination, mercury, **229**: 4
- Plant accumulation, cadmium, **229**: 54
- Plant alterations, cadmium, **229**: 59
- Plant behavior, cadmium, **229**: 54
- Plant effects, clomazone, **229**: 43
- Plant growth effects, cadmium (table), **229**: 56
- Plant growth regulators, cadmium effects, **229**: 67
- Plant metal uptake, cadmium effects, **229**: 64
- Plant mode-of-action, clomazone, **229**: 42
- Plant pigment effects, cadmium, **229**: 59
- Plant trait effects, cadmium, **229**: 55
- Plant water relations effect, cadmium, **229**: 70
- Polybrominated diphenyl ethers (PBDEs), toxicity reference values, **229**: 111 ff.
- Proline effects, cadmium, **229**: 62
- Properties, clomazone, **229**: 36
- Protease activity effects, cadmium, **229**: 61
- Protein level effects, cadmium, **229**: 61
- Pyrethroid insecticides, residue changes from food processing, **229**: 89 ff.
- Pyrethroid residue effects, from food processing methods (table), **229**: 92–99
- Reactive oxygen species, mercury toxicity, **229**: 8
- Risk assessment, PBDEs in Chinese lakes, **229**: 130
- Salt solution washing, during food processing, **229**: 101
- Sediment quality guideline values, vs. e-waste contaminants (table), **229**: 25
- Selenium effects, MeHg, **229**: 8
- Soil behavior, cadmium, **229**: 54
- Soil interactions, clomazone, **229**: 37
- Soybean metabolic pathway, clomazone (diag.), **229**: 44
- Thimerosal in vaccines, ethyl mercury, **229**: 4
- Thiol interactions, MeHg, **229**: 7
- Toxic metals, in e-waste, **229**: 20
- Toxicity of Hg, neurodegenerative effects, **229**: 1 ff.
- Toxicity reference values (TRV), development process, **229**: 114
- Toxicity reference values, for PBDEs, **229**: 111 ff.
- Toxicity symptoms, mercury, **229**: 6
- Toxicity thresholds for DE-71, wildlife (diag.), **229**: 127
- Toxicity, mercury vapor, **229**: 6
- Toxicity, mercury, **229**: 5
- Toxicology, clomazone, **229**: 35 ff., 42
- TRV (toxicity reference values), development process, **229**: 114
- Vegetable processing, pyrethroid insecticide residue effect, **229**: 89 ff.
- Volatilization, chlomazone, **229**: 39
- Water behavior, clomazone, **229**: 38
- Wild fish from Chinese lakes, PBDE residues (diag.), **229**: 132
- Wild fish in Chinese lakes, PBDE congener profile (diag.), **229**: 130
- Wild fish residues in China, PBDE (table), **229**: 131
