A

Academia, 105
ACT. *See* Author-conference-topic model (ACT)
Adjacency list, 61
Adjacency matrix, 61
Akaike information criterion (AIC), 207, 209, 210
Algorithm construction, 162
Algorithmic historiography, 287, 293
Anomaly detection, 39, 47
Assortativity, 36, 43
Author–article combinations, 151, 152, 163
Author-conference-topic model (ACT), 236, 241, 244, 245
Author name disambiguation, 140, 147
Author-topic model, 240, 244, 245

B

Balance, 15, 172, 174, 183, 185
Betweenness centrality, 70–73, 77, 172, 228
Bibliometric indicators, 130
Binary data, 194, 195, 197, 199–202, 204, 205, 210, 211
Bootstrapping, 151, 269, 272
Brant test, 202, 204
Burst detection, 325, 330

C

Career trajectories, 332–336
Categorical data, 201, 210–212
Centrality measures, 59, 70, 71, 73, 79, 228
Choropleth map, 328, 329

Citation impact, 128–136, 195, 201, 205, 210, 259–279
Citation networks, 4, 6, 7, 21, 22, 28, 36, 39, 42, 62, 74–79, 83–98, 137, 254, 286, 290, 291, 293–294, 297–299, 307–313
Cities, 128, 129, 132–134, 137, 138
CitNetExplorer, 286, 289–291, 293, 294, 297–300, 307–313, 315
Classification, 3, 4, 38, 152, 178, 180, 181, 186, 194, 210, 216, 220, 252, 330
Classification techniques, 220
Closeness centrality, 71–73, 228
Clustering, 10, 16–20, 24, 25, 29, 139, 150, 151, 179, 180, 216–220, 235, 236, 242, 248, 252–256, 292, 294–295, 299, 302, 303, 305, 309, 310, 316–317, 324, 332, 336, 338
Cohen's d statistic, 267, 268, 272
Cohen's h statistic, 275
Coherence, 169–187, 253
Collaboration networks, 4, 20, 23, 39, 42–43, 59, 62, 66–75, 77, 133, 139
Community detection, 3–33, 79, 236, 244, 331, 332, 338, 339
Complex systems, 104, 105, 107
Confidence intervals, 259–279
Co-occurrence relations, 285, 286
Count data models, 194, 195, 205–210

D

Damping factor, 77, 85–89, 91, 96
Data mining, 38, 215, 216, 220
Degree centrality, 45, 71–73, 78

Density, 40, 44, 60, 66, 138, 173, 175, 182, 185, 295, 304, 323
 Disparity, 172, 173, 182, 184, 185
 Diversity, 169–187, 243
 Document clustering, 218–220

E

Effect sizes, 208, 259–279
 Eigenfactor, 89, 90, 98
 Eigenvector centrality, 71–74, 77

F

False positive, 47, 149–152, 154–156, 158, 159, 161, 162
 Fractional counting, 262, 295–296, 301–303
 F-scores, 48, 51
 Future links, 36, 38

G

Geography, 127–129, 134–136, 138, 139, 159, 165, 166, 171
 Geography of citation impact, 128, 129, 134–136
 Geospatial analysis, 322, 327–329
 Gephi, 58, 223, 224, 226, 228, 229, 290–293, 315, 323, 329, 332
 Gibbs sampling, 241
 Government, 105, 106, 120, 121, 196, 219, 322
 Graphs, 35, 36, 45, 58, 61, 66, 73, 138, 218, 219, 236, 242, 244, 276, 278, 288–290, 292, 293, 298, 313, 323, 326, 327, 336
 Graph theory, 58

H

h-index, 75, 78, 84, 148, 196–198, 200, 208
 HistCite, 290, 291, 293, 294
 Homonyms, 148–151, 153, 154, 159, 163
 Hook, 67, 68
 Hyperparameters, 237, 239

I

Industry, 105, 106, 108, 110, 117, 118, 120–122, 133, 323
 Information retrieval, v, 38, 43, 216, 217, 220, 228, 230, 236, 237, 244, 251, 252, 303–306, 308
 Intensity, 60, 171, 173–176, 182

Interdisciplinarity, 39, 70, 73, 172, 177, 180
 International collaboration, 109, 128, 133–136, 140, 195, 198, 202, 208

K

Katz predictor, 45–46
 k-cores, 299
 Keyword extraction, 218–219
 Keyword index, 156–158
 Knowledge diffusion, 169–187
 Knowledge integration, 169–187

L

Latent Dirichlet Allocation (LDA), 236, 238–245, 248, 253, 254
 Library and Information Science (LIS) articles, 94, 97, 129, 134, 159, 166, 193–195, 217, 218, 305
 Life cycle, 103–123
 Linguistic annotation, 221
 Link prediction, 35–53
 LIS articles. *See* Library and Information Science (LIS) articles
 Logit model, 195, 197–204, 210, 211

M

Map equation, 3–33
 Marginal effects, 198–200, 210, 275
 MATLAB, 84, 91, 92, 94–98
 Mean percentile ranking, 264, 271, 274, 277, 279
 Missing links, 36–39
 Mobility, 128, 129, 136, 139–141
 Multicollinearity, 196

N

Naïve Bayes model, 150, 236
 Natural language processing (NLP) software, 216, 218, 219, 221, 237, 244, 245
 Negative binomial model, 194, 205, 207–212
 Network analysis, v–vii, 6, 18, 35, 36, 51, 57–79, 290, 292, 315, 323, 330–332, 336
 Networks, vi, vii, 3–33, 35, 36, 38, 39, 42–44, 51, 52, 57–79, 83–98, 107, 108, 117, 120, 130, 133, 137, 187, 205, 228, 229, 244, 252, 254, 285–317, 322, 323, 325, 329–332, 339
 NLP software. *See* Natural language processing (NLP) software

O

Odds ratios, 198, 199, 202, 203, 210, 211, 275
 Ordered data, 184, 201–204, 211
 Ordinal regression, 201–205
 Overdispersion, 206–209, 211

P

PageRank, 14, 21, 23, 32, 46, 50, 51, 62, 71, 77–79, 83–98, 218, 244, 331, 332
