

Index

- Agglomerative algorithms, 169
- amazon ec2, 97
- Application Layer, 14

- Beowulf cluster, 12
- bernoulli, 204
- binning, 204
- block, 42
- Body-Area Network, 9

- Cascading, 105
- cascading, 37
- Categorical Data Clustering, 170
- checksum, 45
- class prior, 204
- cloud computing, 26
- Cluster Computing, 11
- clustering, 168
- collaboration, 13
- Collaborative filtering, 280
- collective layer, 14
- Community-based, 281
- Cognitive Cost, 278
- Connectivity Layer, 13
- Content-based, 279
- crawler, 34

- data-centered architectures, 14
- datanode, 41
- Demographic, 281
- Density-Based Clustering, 169
- Divisive Algorithms, 169
- Drell, 37
- DrQL, 37

- Ethernet, 20
- euclidean distance, 168

- event-based architectures, 15

- Fabric Layer, 13
- fitted, 235
- forecasted value, 235
- forecasting, 231
- framework, 35

- gaussian, 204
- getIterator, 81
- Grid Computing, 11
- grid middleware, 14
- Grid-Based Clustering, 169

- hadoop, 34
- Hadoop streaming, 69
- HBase, 36
- HdfsTextFile, 81
- heartbeat, 44
- Hierarchical algorithm, 169
- home networks, 9
- homogeneity, 12

- independent variable, 231

- jobtracker, 47

- k-means, 172
- Knowledge-based, 281

- least squares, 234
- lineage, 76
- linux, 69
- Lists, 195
- locality-aware, 75

- Manhattan Distance, 168

- map, 47
- mapper, 47
- mapreduce, 34, 47
- Matrices, 195
- mean, 200
- mesos, 97
- middleware, 12
- model fitting, 234
- Model-Based Clustering, 169
- Monetary Cost, 278
- multi-class classification, 197

- namenode, 41
- namespace, 41
- NDFS, 34
- Nutch, 34

- object distributed shared memory, 76
- object-based architectures, 14
- openness, 20

- partition clustering, 168
- pig, 76
- pipe, 69
- pipeline, 46
- predicted, 235
- prediction, 231
- price-performance, 35
- probability density function, 199
- probability mass function, 199
- probability model, 202

- random variable, 199
- RDD, 75
- Recommender Systems, 275
- reduce, 47
- regression, 231
- replication, 42
- Resilient Distributed Datasets, 75
- resource, 6
- resource layer, 13

- scalding, 105
- Scaliding, 37
- sensor network, 10
- Sets, 195
- shared virtual memory, 76
- spark, 75
- standalone, 97
- standar deviation, 201
- structure estimation, 198
- system architecture, 14

- tasktracker, 55
- transformed, 234

- ubiquitous computing, 25

- variance, 201
- vectors, 195

- YARN, 97

- Zookeeper, 37
