

# Bibliographical Tree

# Complete Bibliography of H. Fröhlich

The asterisked references denote his most influential works.

## Books, Authored and Edited

(i)*	1936	' <i>Elektronentheorie der Metalle</i> '. (Electron Theory of Metals): Springer Verlag, Berlin. Reprinted, Ann Arbor, USA, 1943. Republished by Springer 1969.
(ii)*	1949	'Theory of Dielectrics'. Oxford: Clarendon Press (2nd Edition. 1958; subsequently translated into Russian and Japanese).
(iii)	1983	'Coherent Excitations in Biological Systems'. (eds Fröhlich, H. and Kremer, F.). Springer Verlag, Berlin, Heidelberg, New York, London, Paris, Tokyo.
(iv)	1988	'Biological Coherence and Response to External Stimuli'. (ed Fröhlich, H): Springer Verlag, Berlin, Heidelberg, New York, London, Paris, Tokyo.

## Published Papers, Review Articles, Book Contributions and Reports

(1)	1930	<i>Zum Photoeffekt an Metalle</i> (Photoelectric Effect in Metals), <i>Ann. Physik</i> <b>7</b> , 103–128 ( <i>Doctoral Thesis</i> , University of Munich).
(2)	1931	<i>Der Schroteffekt nach der Quantenmechanik</i> (Shot Effect in Quantum Mechanics), <i>Z. Physik</i> <b>71</b> , 715–719.
(3)	1932	<i>Theorie der Sekundärelektronenemission aus Metallen</i> (Theory of Secondary Emission from Metals), <i>Ann. Physik</i> <b>13</b> , 229–248.
(4)	1932	<i>Lichtabsorption und selektiver Photoeffekt</i> (Light Absorption and Selective Photoelectric Effect), <i>Z. Physik</i> <b>75</b> , 539–543.

The erratum of this chapter can be found under DOI [10.1007/978-3-319-14851-9\\_8](https://doi.org/10.1007/978-3-319-14851-9_8)

(5)	1932	<i>Bestimmung der Energiezustände der Metallelektronen aus den optischen Konstanten</i> (Determination of Energy Levels of Metallic Electrons from their Optical Constants), <i>Die Naturwissenschaften</i> <b>20</b> , 906.
(6)	1933	<i>Über die Lage der Absorptionsspektren photochemisch verfärbter Alkalihalogenidkristalle</i> (Position of the Absorption Spectra of Photochemically Coloured Alkali Halide Crystals), <i>Z. Physik</i> <b>80</b> , 819–821.
(7)	1933	<i>Über die Absorption der Metalle im Sichtbaren und Ultravioletten</i> (Absorption of Metals in the Visible and Ultraviolet), <i>Z. Physik</i> <b>81</b> , 297–312 ( <i>Habilitationsschrift</i> , University of Freiburg).
(8)	1933	(with H.A. Bethe) <i>Magnetische Wechselwirkung der Metallelektronen: Zur Kritik der Theorie der Supraleitung von Frenkel</i> (Magnetic Interaction of Metallic Electrons: Criticism of Frenkel's Theory of Superconductivity), <i>Z. Physik</i> <b>85</b> , 389–397.
(9)	1935	The Number of Free Electrons in a Metal, <i>Proc. Cambridge Phil. Soc.</i> <b>31</b> , 277–280.
(10)	1935	<i>Berechnung der Austrittsarbeit im Sommerfeldschen Metallmodell</i> (The Calculation of the Work Function in Sommerfeld's Model of a Metal), <i>Phys. Z. Sov.</i> <b>7</b> , 509–510.
(11)	1935	<i>Über den inneren Photoeffekt an Halbleitern</i> (Inner Photoelectric Effect in Semiconductors), <i>Physikalische Z. Sov.</i> <b>8</b> , 501–510.
(12)	1936	(with W. Heitler) <i>Über die Einstellzeit von Kernspins im Magnetfeld</i> (Time Orientation of Nuclear Spins in a Magnetic Field), <i>Phys. Z. Sov.</i> <b>10</b> , 847–848.
(13)	1936	(with W. Heitler) Time Effects in the Magnetic Cooling Method—II: The Conductivity of Heat, <i>Proc. Roy. Soc. (London) Ser. A</i> <b>155</b> , 640–652.
(14)	1937	(with W. Heitler and E. Teller) Time Effects in the Magnetic Cooling Method, <i>Proc. VII Intern. Congr. Refrigeration</i> (The Hague and Amsterdam, 1936), pp. 1–2. Utrecht: International Institute of Refrigeration.
(15)	1937	Quantum Mechanical Discussion of the Cohesive Forces and Thermal Expansion Coefficients of the Alkali Metals, <i>Proc. Soc. (London), Ser. A</i> <b>158</b> , 97–110.
(16)*	1937	Theory of Electrical Breakdown in Ionic Crystals (I), <i>Proc. Roy. Soc. (London), Ser. A</i> <b>160</b> , 230–41.
(17)	1937	<i>Die spezifische Wärme der Elektronen kleiner Metallteilchen bei tiefen Temperaturen</i> (Electronic Specific Heat of Small Metal Particles at Low Temperatures), <i>Physica</i> <b>4</b> , 406–412.
(18)	1937	<i>Zur Theorie des <math>\lambda</math>-Punktes des Heliums</i> (Theory of the $\lambda$ -point of Helium), <i>Physica</i> <b>4</b> , 639–644.
(19)	1938	(with W. Heitler) Magnetic Moments of the Proton and the Neutron, <i>Nature</i> <b>141</b> , 37.
(20)*	1938	(with W. Heitler and N. Kemmer) On the Nuclear Forces and the Magnetic Moments of the Neutron and Proton, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>166</b> , 154–177.
(21)	1938	A Solution of the Schrödinger Equation by a Perturbation of the Boundary Conditions, <i>Phys. Rev.</i> <b>54</b> , 945–947.

(continued)

(22)	1939	(with W. Heitler and B. Kahn) Deviation from the Coulomb Law for the Proton, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>171</b> , 269–280.
(23)	1939	(with N.F. Mott) The Mean Free Path of Electrons in Polar Crystals, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>171</b> , 496–504.
(24)	1939	Dielectric Breakdown in Ionic Crystals, <i>Phys. Rev.</i> <b>56</b> , 349–352.
(25)	1939	Theory of Electrical Breakdown in Ionic Crystals. Part II. <i>The British Electrical and Allied Industries Research Association Technical Report</i> (hereinafter denoted as ERA Report), <i>Ser. L/T</i> <b>105</b> , 19 pp.
(26)	1939	Theory of Electrical Breakdown in Ionic Crystals (II), <i>Proc. Roy. Soc. (London), Ser. A</i> <b>172</b> , 94–106 (Based on Ref. 25).
(27)	1939	A Theoretical Study on the Behaviour of Water Molecules in Cellulose, <i>ERA Report L/T</i> <b>115</b> , 8 pp.
(28)	1939	Dielectric Breakdown in Solids, <i>Rept. Progr. Phys.</i> <b>6</b> , 411–430.
(29)	1939	(with W. Heitler and B. Kahn) Deviation from the Coulomb Law for a Proton, <i>Phys. Rev.</i> <b>56</b> , 961–962 (Reply to W.E. Lamb).
(30)	1940	(with W. Heitler and B. Kahn) Photodisintegration of the Deuteron in the Meson Theory, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>174</b> , 85–102.
(31)	1940	Electrical Breakdown in Non-Polar Crystals, <i>ERA Report L/T</i> <b>104</b> , 6 pp.
(32)	1940	The Theory of Dielectric Breakdown in Organic Solids, <i>ERA Report L/T</i> <b>112</b> , 15 pp.
(33)	1940	(with F.R.N. Nabarro) Orientation of Nuclear Spins in Metals, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>175</b> , 382–391.
(34)	1940	The Influence of Thickness and of Impurities on Dielectric Strength, <i>ERA Report L/T</i> <b>113</b> , 8 pp.
(35)	1941	On the Dielectric Strength of Mixed Crystals, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>178</b> , 493–498 (Based on Ref. 34).
(36)	1941	Dielectric Loss in Dipolar Solids. I. Solutions of Dipolar Molecules in Solid Paraffin, <i>ERA Report, L/T</i> <b>121</b> , 12 pp.
(37)	1941	Theory of the Dielectric Properties of Dipolar Solids, <i>ERA Report, L/T</i> <b>124</b> , 15 pp.
(38)	1942	Electric Breakdown in Ionic Crystals, <i>Phys. Rev.</i> <b>61</b> , 200–201.
(39)	1942	Dielectric Loss in Paraffin-Wax Solutions, <i>Proc. Phys. Soc. (London)</i> <b>54</b> , 422–428 (Based on Ref. 36).
(40)	1942	Meson Theory and the Magnetic Moments of Protons and Neutrons, <i>Phys. Rev.</i> <b>62</b> , 180.
(41)	1942	Theory of the Dielectric Properties of Dipolar Solids: Calculation of Dielectric Losses, <i>ERA Report, L/T</i> <b>132</b> , 8 pp.
(42)	1943	Theory of Dielectric Breakdown, <i>Nature</i> <b>151</b> , 339–340.
(43)	1943	Theory of the Dielectric Properties of Dipolar Solids: Influence of Dipolar Interaction, <i>ERA Report L/T</i> <b>142</b> , 12 pp.
(44)	1944	(with R.A. Sack) Dielectric Properties of Dipolar Substances, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>182</b> , 388–403 (Based, in part, on F37, F41, and F43).
(45)	1944	Theory of the Dielectric Constant and Energy Loss in Solids and Liquids, <i>J. Inst. Elec. Eng. (London)</i> <b>91</b> , 456–463.

(continued)

(46)	1944	Phase Transitions of Solid Paraffins and the Flexibility of Hydrocarbon Chains, <i>Trans. Faraday Soc.</i> <b>40</b> , 498–502.
(47)	1944	Dielectric Properties of Dipolar Solids. Strong Dipolar Interaction and Low Temperatures, <i>ERA Report L/T</i> <b>147</b> , 12 pp.
(48)	1944	(with R.A. Sack) Theory of the Rheological Properties of Bitumens. Part I, <i>ERA Report, L/T</i> <b>150</b> , 11 pp.
(49)	1945	Theory of Dielectric Breakdown in Amorphous Solids, <i>ERA Report, L/T</i> <b>153</b> , 7 pp.
(50)	1945	Dielectric and Thermal Properties of Long-Chain Substances, <i>ERA Report, L/T</i> <b>156</b> , 7 pp.
(51)	1945	Dielectric Properties of Solids at Very High Frequencies, <i>ERA Report, L/T</i> <b>157</b> , 6 pp.
(52)	1946	Dielectric Properties of Dipolar Solids, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>185</b> , 399–414 (Based on F47).
(53)	1946	(with R.A. Sack) Theory of the Rheological Properties of Dispersions, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>185</b> , 415–430 (Based on F48).
(54)	1946	Dipolar Interaction, <i>Trans. Faraday Soc.</i> <b>42A</b> , 36–39.
(55)	1946	Theoretical Physics in Industry, <i>Nature</i> <b>158</b> , 332–334 (Royal Institution Lectures).
(56)	1946	Dielectric Properties of Solids at Ultra-High Frequencies, <i>ERA Report, L/T</i> <b>163</b> , 8 pp.
(57)	1946	Shape of Collision-Broadened Spectral Lines, <i>Nature</i> <b>157</b> , 478.
(58)	1946	Dielectric Breakdown in Amorphous Substances II, <i>ERA Report, L/T</i> <b>169</b> , 4 pp.
(59)	1947	(with R.A. Sack) Light Absorption and Selective Photo-Effect in Adsorbed Layers, <i>Proc. Phys. Soc. (London)</i> <b>59</b> , 30–33.
(60)*	1947	On the Theory of Dielectric Breakdown in Solids, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>188</b> , 521–532 (Based on F49).
(61)	1947	Energy Distribution and Stability of Electrons in Electric Fields, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>188</b> , 532–541.
(62)	1947	(with W.H. Ramsey and I.N. Sneddon) A Quantitative Discussion of the Interaction between Nuclear Particles, <i>Report on an Int. Conf. on Fundamental Particles and Low Temperatures</i> , (Cambridge, 1946). Vol I, pp. 166–175. The Physical Society. London.
(63)	1947	Decay of Negative Mesons in Matter, <i>Nature</i> <b>160</b> , 255.
(64)	1947	(with K. Huang and I.N. Sneddon) The Binding Energies of Very Light Nuclei, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>191</b> , 61–82.
(65)	1947	(with F.R.N. Nabarro) Nuclear Ferromagnetism, <i>Report on an Int. Conference on Fundamental Particles and Low Temperatures</i> , (Cambridge, 1946), Vol II, pp. 129–134. London: The Physical Society.
(66)	1948	General Theory of the Static Dielectric Constant, <i>Trans. Faraday Soc.</i> <b>44</b> , 238–243.
(67)	1948	(with H. Pelzer) Polarization of Dielectrics by Slow Particles, <i>ERA Report, L/T</i> <b>184</b> , 8 pp.
(68)	1948	(with R. Huby, R. Kolodziejski and R.L. Rosenberg) Decay and Capture of Slow Mesons in Dielectrics, <i>Nature</i> <b>162</b> , 450–451.
(69)	1949	(with J. O'Dwyer) Time Dependence of Electronic Processes in Dielectrics, <i>ERA Report, LIT</i> <b>219</b> , 8 pp.

(continued)

(70)	1950	(with J. O'Dwyer) Time Dependence of Electronic Processes in Dielectrics, <i>Proc. Phys. Soc. (London) Ser. A</i> <b>63</b> , 81–85 (Based F69).
(71)	1950	(With H. Pelzer and S. Zienau) Properties of Polar Materials, <i>ERA Report, LT</i> <b>221</b> , 12 pp.
(72)*	1950	(with H. Pelzer and S. Zienau) Properties of Slow Electrons in Polar Materials, <i>Phil. Mag.</i> <b>41</b> , 221–242 (Based on F71).
(73)	1950	Conduction Electrons in Non-Metallic Solids, <i>Research (London)</i> <b>3</b> , 202–207.
(74)	1950	(with F. Seitz) Notes on the Theory of Dielectric Breakdown in Ionic Crystals, <i>Phys. Rev.</i> <b>79</b> , 526–527.
(75)	1950	(with J.H. Simpson) Intrinsic Dielectric Breakdown in Solids, <i>Adv. in Electronics</i> <b>2</b> , 185–217.
(76)	1950	Theory of the Superconducting State, I. The Ground State at the Absolute Zero of Temperature, <i>Phys. Rev.</i> <b>79</b> , 845–856.
(77)*	1950	Isotope Effect in Superconductivity, <i>Proc. Phys. Soc. (London), Ser. A</i> <b>63</b> , 778.
(78)	1951	Theory of the Superconducting State: II. Magnetic Properties at the Absolute Zero of Temperature, <i>Proc. Phys. Soc. (London), Ser. A</i> <b>64</b> , 129–134.
(79)	1951	Crystal Structure and Superconductivity, <i>Nature</i> <b>168</b> , 280.
(80)	1951	Superconductivity and the Effective Mass of Electrons, <i>Nature</i> <b>168</b> , 280–281.
(81)	1952	Theory of the Superconductive State, <i>NBS Circular 519</i> , 'Low Temperature Physics', pp. 1–3, Washington: US Dept. of Commerce (Proc. NBS Semicentennial Symposium on Low Temperature Physics, Washington, 1951).
(82)	1952	Transitions de Rotation dans les Solides (Rotational Transitions in Solids). <i>Comptes rendus de la 2e Reunion de Chimie Physique</i> , Paris, pp. 231–234.
(83)	1952	On the Theory of Dielectric Breakdown in Ionic Crystals, <i>ERA Report, LT</i> <b>277</b> , 14 pp.
(84)**	1952	Interaction of Electrons with Lattice Vibrations, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>215</b> , 291–298.
(85)	1953	Superconductivity and Lattice Vibrations, <i>Physica</i> <b>19</b> , 755–764 (Proc. Lorentz-Kamerlingh Onnes Centenary Conference on Electron Physics, Leiden, Netherlands, 1953).
(86)	1953	(with R.L. Platzman) Energy Loss of Moving Electrons to Dipolar Relaxation, <i>Phys. Rev.</i> <b>92</b> , 1152–1154.
(87)	1953	Electrons in Dielectrics, <i>Proc. Intern. Conference of Theoretical Physics</i> , Kyoto and Tokyo (1953), pp. 805–809 (Science Council of Japan).
(88)	1953	Remarks on the Theory of Superconductivity, <i>Proc. Intern. Conference of Theoretical Physics</i> , Kyoto and Tokyo (1953), pp. 909–915 (Science Council of Japan).
(89)	1954	On the Theory of Superconductivity: the One Dimensional Case, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>223</b> , 296–305.
(90)*	1954	Electrons in Lattice Fields, <i>Advances in Physics</i> <b>3</b> , 325–361.

(continued)

(91)	1954	(with C. Kittel) Remark on the Paper 'Heat Conduction in Semiconductors', by G. Busch, <i>Physica</i> <b>20</b> , 1086 (Proc. Amsterdam Conf. on Semiconductors, 1954).
(92)	1954	Dielectric Polarization in Polar Substances. Remark on a Paper by F.E. Harris and B.J. Alder, <i>J. Chem. Phys.</i> <b>22</b> , 1804–1806.
(93)	1955	Superconductivity, <i>Proc. 10th Solvay Conference. Electrons in Metals, Bruxelles, 1955</i> , (ed. R. Stoops), pp. 287–313. New York, London: Interscience.
(94)	1955	(with H. Pelzer) Plasma Oscillations and Energy Loss of Charged Particles in Solids, <i>ERA Report, LT</i> <b>322</b> , 14 pp.
(95)	1955	(with H. Pelzer) Plasma Oscillations and Energy Loss of Charged Particles in Solids, <i>Proc. Phys. Soc. (London) Ser. A</i> <b>68</b> , 525–529 (Based on F94).
(96)	1955	Theory of Secondary Electron Emission from Solids, <i>Proc. Phys. Soc. (London), Ser. B</i> <b>68</b> , 657–60.
(97)*	1956	(with B.V. Paranjape) Dielectric Breakdown in Solids, <i>Proc. Phys. Soc. (London), Ser. B</i> <b>69</b> , 21–32 (Partly based on F83).
(98)	1956	(with B.V. Paranjape, C.G. Kuper and S. Nakajima) The Influence of Interelectronic Collisions and of Surfaces on Electronic Conductivity, <i>Proc. Phys. Soc. (London), Ser. B</i> <b>69</b> , 842–845.
(99)	1956	Remark on the Calculation of the Static Dielectric Constant, <i>Physica</i> <b>22</b> , 898–904.
(100)	1956	(with S. Doniach) Plasma Interaction and Conduction in Semiconductors, <i>Proc. Phys. Soc. (London), Ser. B</i> <b>69</b> , 961.
(101)	1957	<i>Pertes Debye dans les Solides Ioniques</i> . (Debye Loss in Ionic Solids), <i>Arch. Sci. (Geneva)</i> <b>10</b> , 5–6.
(102)	1958	Speculations on the Masses of Particles, <i>Nucl. Phys.</i> <b>7</b> , 148–149.
(103)	1959	A Survey of the Theory of Dielectrics, <i>Arch. Sci. (Geneva)</i> <b>12</b> , 5–8 (Proc. 8e Colloque Ampère).
(104)	1959	(with G.L. Sewell) Electric Conduction in Semiconductors, <i>Proc. Phys. Soc.</i> <b>74</b> , 643–646.
(105)	1959	Phenomenological Theory of the Energy Loss of Fast Particles in Solids, In <i>Max Planck-Festschrift</i> , (ed. W. Frank), pp. 277–284. Berlin: VEB Deutscher Verlag der Wissenschaften.
(106)	1960	Space-Time Reflexions, Isobaric Spin and the Mass Ratio of Bosons, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>257</b> , 147–164.
(107)	1960	Light Quanta and Heavy Bosons, <i>Proc. Roy. Soc. (London), Ser. A</i> <b>257</b> , 283–290.
(108)	1960	Space-Time Reflexions, Light Quanta and Heavy Bosons, <i>Helv. Phys. Acta</i> <b>33</b> , 803–828 (W. Pauli Memorial Issue).
(109)	1961	The Theory of the Superconductive State, <i>Rept Progr Phys</i> <b>24</b> , 1–23.
(110)	1961	The Structure of Momentum Space, the Neutrino and the Pauli Principle, <i>Nucl. Phys.</i> <b>26</b> , 324–337.
(111)	1961	New Heavy Bosons, <i>Proc. Phys. Soc. (London)</i> <b>77</b> , 1223.
(112)	1961	Hot Electrons, <i>ERA Report, LT</i> <b>414</b> , 11 pp.
(113)	1961	On Dielectric Breakdown in Non-Polar Semiconductors, <i>Sov. Phys. Solid State</i> <b>3</b> , 491.

(continued)

(114)	1963	Introduction to the Theory of the Polaron, In <i>Polarons and Excitons</i> , (eds. C.G. Kuper and G.D. Whitfield), pp 1–32. Edinburgh and London: Oliver & Boyd. (Scottish Universities' Summer School, 1962).
(115)	1963	(with Ch. Terreaux) Isobaric Spin Algebra, <i>Nucl Phys</i> <b>42</b> , 21–26.
(116)	1963	On Isobaric Spin Space, <i>Nucl Phys</i> <b>45</b> , 609–631.
(117)	1963	Low Mobility Materials and Debye Dielectric Loss due to Electrons, <i>ERA Report</i> , <b>5003</b> , 8 pp.
(118)	1963	(with S. Machlup and T.K. Mitra) Low Mobility Materials and Debye Dielectric Loss due to Electrons, <i>Phys. Kondens. Materie</i> <b>1</b> , 359–366 (Partly based on F117).
(119)	1963	Electron-Phonon Interaction, Superconductivity, and the Third Law of Thermodynamics, <i>Phys Letters</i> <b>7</b> , 346–347.
(120)	1964	(with A.W.B. Taylor) The Boltzmann Equations in Electron-Phonon Systems, <i>Proc. Phys. Soc. (London)</i> <b>83</b> , 739–748.
(121)	1965	Geometrical Interpretation of Electrodynamics, <i>Progr. Theoret. Phys. (Supplement, Extra Number)</i> , pp. 1–13 (Commemorative Issue for the 30th Anniversary of the Yukawa's Meson Theory).
(122)	1965	(with Ch. Terreaux) Quasi-Superconductive Transitions in Strong Magnetic Fields, <i>Proc Phys Soc (London)</i> <b>86</b> , 233–236.
(123)	1966	Macroscopic Wave-Functions in Superconductors, <i>Proc. Phys. Soc. (London)</i> <b>87</b> , 330–332.
(124)	1966	Generation of Dual Transformations through Fields in Electrodynamics, <i>Progr Theoret Phys</i> <b>36</b> , 636–647.
(125)	1966	Superconductivity and the Many Body Problem, In <i>Perspectives in Modern Physics</i> , (ed. R.E. Marshak), pp. 539–552. New York: Interscience (Essays in honour of Hans A. Bethe).
(126)	1966	Limits of the Band Model and Transitions to the Metallic State, In <i>Quantum Theory of Atoms, Molecules and the Solid State</i> , (ed. P.O. Löwdin), pp. 465–468. New York: Academic Press (A Tribute to John C. Slater).
(127)	1967	Dielectric Instabilities. In <i>Ferroelectricity</i> (ed. E.F. Weller), pp. 9–15. Amsterdam:Elsevier. (Proc Symposium on Ferroelectricity, Michigan, 1966) (Dedicated to the memory of P.W. Debye).
(128)	1967A	Contradiction between Quantum Hydrodynamics and the Existence of Particles, <i>Physica</i> <b>34</b> , 47–48.
(129)	1967	Microscopic Derivation of the Equations of Hydrodynamics, <i>Physica</i> <b>37</b> , 215–226.
(130)	1968	Proposal of Crucial Experiments for Superconductors with Incomplete Inner Bands, <i>Phys Letters, Ser A</i> <b>26</b> , 169–170.
(131)	1968	Superconductivity in Metals with Incomplete Inner Shells, <i>J Phys C (Proc Phys Soc), Ser 2</i> , <b>1</b> , 544–548.
(132)	1968	(with T.K. Mitra) Superconductivity and the Magnitude of the Electron-Phonon Interaction, <i>J Phys C</i> <b>1</b> , 548–549.
(133)	1968	Bose Condensation of Strongly Excited Longitudinal Electric Modes, <i>Phys.Letters, Ser. A</i> <b>26</b> , 402–403.
(134)*	1968	Long-Range Coherence and Energy Storage in Biological Systems, <i>Int. J. Quantum Chem.</i> <b>2</b> , 641–649.

(continued)

(135)	1968	Localized <i>versus</i> Band Model of Electrons in Solids, <i>Helv Phys, Acta</i> <b>41</b> , 838–839 (G. Busch <i>Festschrift</i> ).
(136)	1968	Theoretical Problems in Superconductivity, <i>Phys Bull</i> <b>19</b> , 209–212 (Jubilee Article).
(137)	1968	Storage of Light Energy and Photosynthesis, <i>Nature</i> <b>219</b> , 743–744.
(138)	1969	Quantum Mechanical Concepts in Biology, In <i>Theoretical Physics and Biology</i> , (ed. M. Marois), pp. 13–22. Amsterdam: North Holland Publ. Co. (Proc. 1st Int. Conference on Theoretical Physics and Biology, Versailles, 1967).
(139)	1969	General Remarks on the Connection of the Laws of Micro and Macrophysics. <i>J. Phys. Soc. Japan (Suppl.)</i> <b>26</b> , 189–195 (Proc. Int. Conf. on Statistical Mechanics, Kyoto, 1968).
(140)	1969	Proposed Model Experiments on the Storage of Light Energy in Photosynthesis, <i>Nature</i> <b>221</b> , 976.

## Unpublished Papers

- c.1939/40: Chain-Reactions in Uranium (with W. Heitler)—*see Appendix to Chapter 4*
- 1941: Fission produced by Cosmic Ray Neutrons (with W. Heitler)—*UK Public Record Office*
- 1968: Theoretical Physics & Biology—*commissioned by 'Science' magazine*
- 1968: Measurement and the  $n$ -Body Problem—*partly based on [F139]*
- 1968: A Novel Representation of Maxwell's Equations
- 1976: Bilocal Extension of Electrodynamics
- 1977: Report on Microwaves & Cancer—*for the World Health Organisation*
- 1986: Magnetic Currents in the Dirac Theory—*see Appendix 2 to Chapter 6*

## Conference Contributions—Unpublished

- 1975: Present state of Research on Long Range Coherence in Biological Systems (*Proc. 5th Int. Conf. on Theoretical Physics and Biology, Versailles*)
- 1981: Coherent Excitations in Biological Systems (*Proc. 1st Int. Seminar on the Living State, New Delhi, India*)
- 1986: On Deterministic Chaos and the Difficulty of Reproducing Certain Biological Experiments (*Proc. 3rd Int Seminar on the Living State, Shillong, India*)
- 1987: Coherence in Biology (*Proc. Int. Seminar on Biophysical Aspects of Cancer, Charles University, Prague, Czech Republic*)
- 1988: Stabilization of Non-linear Excitation in Biological Systems (*Proc. Int. Final Conf. on Theoretical Physics and Biology, Versailles*)
- 1990: Connection of Macro and Microphysics (*Proc. 1st Int. Conf. on Consciousness within Science, San Francisco*)

## Unpublished Lectures

- 1950: Statistical Mechanics, *Purdue University, USA (Spring Semester)*
- 1953: Electrons in Crystals, *Purdue University, USA (Spring Semester)*
- 1956: The Many-Body Problem, *Purdue University (Spring Semester)*
- 1956: The Polaron, *Purdue University, USA (Fall Semester)*
- 1964/5: Lectures on Solid State Physics, *Theoretical Physics Institute, University of Stuttgart, Germany (Summer Semester)*
- 1966: Foundations of Solid State Physics: a New Presentation, *Lorentz Institute, Leiden, Netherlands*
- 1968: The Connection between Microscopic and Macroscopic Physics, *Theoretical Physics Institute, University of Alberta, Canada*
- 1969: 4 Lectures on the Connection of Micro and Macrophysics, *Theoretical Physics Institute, University of Stuttgart, Germany (Summer Semester)*
- 1971: 3 Lectures on the Derivation of the Boltzmann Equation, *Theoretical Physics Institute, University of Stuttgart, Germany, (Summer Semester)*
- 1976: Order and Organization in Physics and Biology, *Faculty Lecture, University of Liverpool to celebrate his 70th birthday the preceding December*

**Note:** Pages with photographs, facsimiles of publications or other documents are underlined

## A

Abercromby Square, Liverpool, [91](#), [145](#), [146](#)  
*Abitur*, [7](#)  
Absorption  
  Debye, [96](#)  
  of light by small dielectric samples, [96](#), [97](#)  
  of light by small metallic particles, [34](#), [97](#)  
  Lorentz formula for, [96](#)  
  resonance, [96](#)  
Academic Assistance Council (AAC), [27](#), [29](#),  
  [34](#), [35](#), [52](#), [53](#), [64](#), [74](#)  
Acoustic plasmons, [155](#), [160](#)  
Alberta (Canada), [227](#), [252](#)  
Alpbach (Tyrol), [174](#)  
Ambipolar thermal conduction, [44](#)  
Anomalous magnetic moment, [58](#), [132](#)

## B

Bargmann-Wigner equations, [200](#)  
BCS theory of superconductivity, [115](#),  
  [127–131](#), [153](#), [158](#), [160](#), [167](#), [168](#),  
  [171](#)  
Bell Labs, [69](#), [120](#)  
Bilinear covariants, [198–199](#), [201](#)  
Bilocal extensions of  
  Dirac theory, [138](#), [199–202](#), [204–212](#)  
  electrodynamics, [138](#), [251](#)  
Binding energy of alkali metals, calculation of,  
  [44](#)  
Binding energy of light nuclei, [73](#)  
Biological coherence, [194–195](#)  
  biophotons, [187](#), [198](#)  
  brain-waves, application to, [187–190](#)  
  cancer as defective coherence, [198](#)  
  experimental reproducibility of non-thermal  
  effects, [186](#), [191](#)  
  experimental support, [185](#)  
  flux quantization in biosystems, [192](#)

  limit cycles, [188](#)  
  long-range, frequency-specific attraction  
  between coherent systems, [182](#), [183](#),  
  [187–188](#)  
  non-linear, non-equilibrium model for a  
  dynamic coherent excitation,  
  [177–179](#), [180](#), [182](#)  
  non-thermal effects, [182](#), [190](#), [191](#)  
  non-thermal effects of ultra-weak  
  microwave irradiation, [192](#), [193](#)  
  orderly functioning as a discriminant of  
  aliveness, [176](#)  
  pre-War considerations based on dielectric  
  properties of cells, [174–175](#)  
  Raman investigations, [186](#), [191](#)  
  stabilisation by elastic, deformation, and  
  contact inhibition, [176–177](#), [196](#),  
  [198](#)  
  static coherent excitation, [184](#), [187](#)  
Biological functionality, [182](#), [190](#)  
Biophotons, [187](#), [198](#)  
Bloch bandwidth, [110](#)  
Bloch effective mass, [102](#), [103](#), [105](#), [110](#)  
Bloch states, [112](#)  
Boltzmann equation  
  collision integral, [170](#)  
  electron-phonon systems, [170](#)  
Bose-Einstein condensation, [128](#), [129](#),  
  [172–173](#), [178–179](#)  
Brain waves, model for, [187–190](#)  
Bristol, University of  
  Conference on the Metallic State (1935),  
  [32](#), [34](#), [36](#)  
  Fröhlich's appointment as lecturer and  
  promotion to Reader, [2](#), [74](#)  
  Miscellaneous, [2](#), [32](#), [34–36](#), [38–41](#), [45](#), [47](#),  
  [50](#), [52](#), [61](#), [64–66](#), [73](#), [74](#), [76](#), [82](#), [83](#),  
  [85](#), [174](#), [225](#), [228](#)

**C**

- Cancer, role of coherent excitations in, 196–198
- Cells (biological), 98, 171, 175, 177, 181, 182, 184–186, 192, 196–198
- Chain-reactions in Uranium, 64, 82
- Chaos (deterministic), 189, 192
- Charge-density waves, 128
- Čerenkov radiation, 115
- Classical hydrodynamics, 163–165
- Clausius-Mossotti formula, 95
- Coherence
  - in biology, 175, 176, 182, 184, 190, 192, 194, 195, 197
  - in superconductors, 113, 127, 129–131, 167
  - in superfluid He<sup>4</sup>, 161, 162, 166, 170
- Coherent excitations in biological systems, 192, 194–195, 196–198
- Connection of micro and macro physics
  - concepts required, 165, 169, 203
  - contact with BCS, 168
    - extension to the non-local, phonon-induced electron-electron interaction, 171
  - equation of state and calculation of material-specific quantities, 165
  - macroscopic wave-functions and their exact wave-equations, 161, 166, 168, 171, 172
  - Navier-Stokes equations, derivation of, 163–165
  - off-diagonal-long-range order, 161, 166, 171
  - quantum hydrodynamics, 162
  - reduced density matrices, 161, 162
  - strategy to be adopted, 165
  - superconductivity, 166–168
  - superfluidity, 171–174
- Constitutive relations (in electrodynamics), 165
- Contact inhibition, 177, 196, 198
- Continuous reflections, 132, 202
- Cooper pairs, 128, 130, 167
- Cosmic rays, 66, 73
- Coulomb
  - field, 101, 102, 114, 115, 176
  - inter-electronic interaction, 98, 112–114, 122, 124, 129, 130, 131, 159
  - dipolar, 93, 176, 177, 181, 196
  - law, deviations from, 58, 60
- CP* invariance, 132
- Creation and annihilation operators, 122
- Critical temperature (superconducting), 118, 126–130, 158, 160, 167
- Curie temperature, 56

**D**

- Debye dielectric loss, 110
- Debye equations, 95
- Debye frequency, 128, 153
- Debye temperature, 71, 128
- Dember effect, 32
- Density matrix, 161, 162
  - reduced, 165–167, 170–172, 202, 214
- Deuteron
  - fine-structure of, 58
  - photodisintegration of, 60
- Dielectric theory
  - decay of slow mesons in dielectrics, 73
  - dielectric breakdown
    - amorphous materials, 67, 68, 72
    - criterion for, 46, 50, 71, 72, 101
    - Fröhlich's theory, 44–47, 48, 49, 50, 56, 67
    - inter-electronic collisions and hot electrons, 67, 70
    - intrinsic breakdown, 44
    - mixed crystals of polar materials, 44
    - negative temperature coefficient of, 55, 67
    - non-polar materials, 52, 55, 66, 71
    - organic materials, 55, 67
    - polar crystals, 44
    - thermal, 67
    - thin samples, 47, 56
    - von Hippel's approach to, 44–46
  - dielectric loss, 66, 93, 95
    - Debye, 95
    - resonance, 96
  - energy loss of charged particles in dielectrics, 99
  - ferroelectric soft modes, 2, 98, 160
  - Lyddane-Sachs-Teller relation, 1, 54
  - polaritons, 2, 97
  - size and shape dependent effects, 96, 97, 177, 181, 184, 196
  - Theory of Dielectrics*, 53, 93, 94, 98
  - theory of the static dielectric constant, 93, 95
    - Lorentz-Kirkwood method, 93
    - Onsager formula for, 95
    - Kirkwood formula for a polar liquid, 95
    - time-dependent processes, 93, 95
  - Dipolar interaction, 93, 176, 177, 181, 196
  - Dirac bilinear covariants, 137, 138, 198, 199–201, 204
  - Dirac equation, 58, 199
  - Dirac particles, 138, 200–202, 228
  - Dirt physics, 11, 30
  - Dissipative system, 175, 181, 190
