

Index

A

Air lasing, 122
Airy beam, 200–210
Amplified spontaneous emission, 122, 123,
126, 128, 131, 134, 139, 141, 144
Angular spectrum, 152, 164
Anomalous dispersion, 8, 147–164, 190
Asymptotic solutions, 33, 85, 88

B

Blowing up solutions, 77–94

C

Carrier-envelope-phase (CEP)
CEP stability, 99, 102–103, 116, 118
initial CEP, 98, 103, 106–108, 112–118
Carrier wave shock, 194–200
Coherent radiation, 103, 122
Conical emission, 148, 151, 152, 154,
156–159, 164, 203
Conical waves, 202

D

Dynamic stability, 85

F

Few-cycle pulses
circularly polarized, 98, 99, 108–112, 118
generation, 98–103, 108, 115, 118
Filaments, 9, 10, 15, 16, 20, 55, 98, 103–109,
111–118, 121–144, 148, 150, 153,
158, 161–163, 182, 203, 204,
207, 209

Fused silica, 99, 101, 102, 124, 148, 150–152,
156–160, 162, 163

H

High frequency approximation, 79, 111
Hyperbolic systems, 3

I

Ionization, 2, 15, 16, 21–24, 28–34, 47–53,
55–58, 74, 98, 99, 101, 106, 108,
112, 122, 126, 127, 133, 151, 169,
182, 190, 192, 203

L

Langmuir waves, 77–94
Laser filament, 28, 55, 118, 122, 123, 126, 127,
130, 132–134, 136–140, 142–144,
168
Light bullet, 2, 149, 150, 161–164, 200
Local and global well-posedness, 60, 79, 83
Lower bounds for rate of blow-up, 85–92

M

Maxwell–Schrodinger equations, 175
Maxwell wave equation, 24–33, 44, 64–65, 70,
72, 74, 174, 176, 186–187
Mid-infrared (Mid-IR/MIR), 122, 139, 148,
153, 155, 164, 194
Modified Kadomtsev–Petviashvili equation
(MKP), 3, 4, 186, 187, 190, 191,
193

N

Near and mid-infrared wavelengths, 164
 Nonlinear envelope equation (NEE), 191–193,
 199, 200, 204
 Nonlinear optics, 28, 33, 167, 182, 185, 191,
 204, 206
 Nonlinear Schrodinger equation, 149, 163, 191
 and variants, 80
 Nonlinear short pulse propagation, 13, 185

O

Optical parametric amplification (OPA),
 99–101, 103, 118, 158

P

Population inversion, 123, 128, 132, 135, 138,
 143
 Pulse self-compression, 147–164

R

Ring-Airy beam, 209–211

S

Self-similar solutions, 10, 63, 85, 87
 Slowly varying envelope approximation
 (SVEA), 28, 35–38, 48–51, 168,
 173, 179–181

Supercontinuum generation, 150–154, 159,
 164, 199, 203

SVEA. *See* Slowly varying envelope
 approximation (SVEA)

T

Terahertz (THz)
 elliptical polarized, 108–111, 118
 polarization control, 108, 109
 waveform, 97–118

U

Unidirectional pulse propagation equation
 (UPPE), 2, 10, 168, 186–191, 193,
 194, 199

W

Wave collapse, 93

Y

Yttrium Aluminum garnet (YAG), 148,
 151–156, 159–161

Z

Zakharov system, 77–94
