

Index

- ($TV\tilde{Y}$) formula, 109
- 1-Gevrey
 - asymptotic expansion, 136, 144, 162, 250
 - formal diffeomorphism, 170
 - formal series, 126, 130
 - uniform asymptotic expansion, 137, 282
- 1-summable
 - diffeomorphism, 168, 282
 - formal fundamental solution, 56
 - series, xvii, xviii, 122, 143–145, 150, 154, 155, 159, 262, 266
- Ω -continuuable, 173, 174, 180, 188, 205
- Ω -resurgent
 - diffeomorphism, 193, 273
 - function, 173
 - series, 173, 174, 182, 192
 - singularity, 205
 - symbol, 226, 232, 268
- k -summable series, x, 144
- s -Gevrey, 250, 251

- adjoint representation, 50
- admissible family of matrices, 110
- Airy
 - equation, 58, 246
 - function, 247, 250–252
- alien
 - derivation, xii, 52, 218, 242, 261
 - operator, xi, 207, 211, 213, 216, 220, 263
- analytic continuation, ix, xi, xiv, 5, 122, 133, 138, 148, 173–176, 178, 183, 185, 194, 208
 - of a pair, 6, 179
 - of solutions of differential systems, 11
- asymptotic, x, xviii, 122, 136, 282
 - 1-Gevrey asymptotic expansion, 136, 144, 162, 250
 - s -Gevrey asymptotic expansion, 250, 251
 - uniform 1-Gevrey asymptotic expansion, 137, 282
 - uniform asymptotic expansion, 136
- atlas, 4

- Birkhoff–Grothendieck theorem, 100
- Bolibrukh–Kostov theorem, 115
- Borel plane, xi, 56
- Borel transform, xi, 44, 56, 129, 131
 - extended, 202, 232, 256
- Borel–Laplace summation, x, 137, 138, 141, 143, 168, 282
 - extended, 213, 256
 - fine, 137
- bridge equation, xii, 267, 288, 290, 292

- character, 49
- classification
 - analytic, 270, 285, 287
 - formal, 38, 40
 - meromorphic, 38
- cocycle, 97
 - equivalent cocycles, 97
- coefficient matrix
 - of a linear system, 11
- complex analytic variety, 4
- complex projective line, 3
- composition operator, 128, 158, 275
- concatenation, 184, 196
- confluent hypergeometric equation, 255
- connection, 100, 101
 - Fuchsian, 103
 - horizontal section, 101
 - logarithmic pole, 102
 - singular point, 102
 - trace of, 102

- convergent series, ix, xvii, 123, 129, 132, 133, 137, 138, 145, 168, 203, 267, 275, 284
- convolution, xi, 131–133
 - of resurgent functions, 178, 180, 182, 188, 192
 - of singularities, 202
 - slightly extended, 253
- cotangent bundle, 98
- cyclic relation, 49
- cyclic vector lemma, 32

- Deligne-Simpson problem, 77
- determinant bundle, 98
- determining polynomials, 39
- differential
 - algebra, xvii, 44, 126
 - extension, 25
 - field, 25
 - Galois correspondence, 31
 - Galois group, 27
 - homomorphism, 25
- differential Galois group, 27
 - global, 61
 - local, 41
- directional alien derivation, 241, 289
- divergent series, ix–xi, xvii, xviii, 122–124, 139, 148, 154, 194, 285

- Écalle-Voronin invariant, 286, 287, 290
- Euler
 - equation, 139, 148, 262
 - gamma function, 123, 124, 134, 148, 201
 - series, x, 122, 139, 141, 146, 175, 211, 218, 229
- exponential torus, 42
- exponentially small, xi, 137, 162, 227, 229, 245, 247

- Fatou coordinate, 281–283
- FET theorem, 12
- field of constants, 25
- fine-summable series, 137, 139, 140, 155
- formal
 - equivalence, 40
 - fundamental solution, 39
 - integral, xiii, 265, 266, 268
 - invariants, 40
 - monodromy, 41, 42
 - series, 124, 126, 127, 129
 - solution, ix–xi, 139, 255, 262, 265, 267, 276
- formal diffeomorphism, 164
 - 1-Gevrey, 170
 - 1-summable, 282
 - resurgent, 193, 273
- formally convergent, 127
- Fuchs relation, 92, 93
- Fuchsian singular points, 14
 - characterization of, 90
- Fuchsian system, 75
 - characterization of, 93, 103
- fundamental group, 17
- fundamental solution, 11
- FUT theorem, 5

- gauge transformation, 100
- generalized monodromy data, 76
- germ
 - of holomorphic diffeomorphism, 163, 273–275
 - of holomorphic function, 5
 - of meromorphic function, 19
- Gevrey
 - asymptotic expansion, 136, 144, 162, 250, 251
 - formal series, 126, 130
 - uniform asymptotic expansion, 137, 282

- homotopy, 8
 - homotopic paths, 8
 - homotopy invariance of analytic continuation, 9
- Hurwitz zeta function, 213, 218, 230

- identity component, 31
- integrable singularity, 260
- inverse problem, 75
 - of differential Galois theory, 79
 - Tretkoff's solution, 80, 82
- iterator, 276, 277, 281

- Kimura lemma, 112
- Krull topology, 127

- Lagrange reversion formula, 166, 167
- Laplace transform, xi, 44, 133, 137, 140, 141, 143
 - extended to resurgent symbols, 232
 - of major, 205, 206
- Levelt
 - basis, fundamental solution, 89, 90
 - exponents, 92
 - filtration, 88, 89
 - valuation, 88
- Lie group, 97
- lifted horn map, 286, 287
- linear algebraic group, 28
- linear differential system, 11

- local coordinate, 4
- major, 200
 - Laplace transform of, 205, 206
- Martinet-Ramis modulus, 270
- meromorphic
 - continuation, 150, 153, 162, 175, 181, 245
 - function on \mathbb{C} , 5
- middle convolution, 78
- minor, 203, 204
- moderate growth, 14
- monodromy
 - group, 18
 - matrix, 18
 - of a connection, 104
 - representation, 18
 - theorem, 8
- normal
 - form, xi, 40, 267, 275, 276, 283
 - solution, 40
- pair (U, f) , 6
 - adjacent pairs, 6
