

Index

A

absolute space, 6
adjacency matrix, 17
affine transformation, 226
agent based model, 29
agent based modelling, 244
apply, 60
archaeological cultural geography, 12
archaeological model, 32
archaeological models, 38
atom model, 27
auto-correlation, 73, 197
axes of orientation, 172

B

Bayesian statistics, 19
betweenness centrality, 189
Bonacich's power centrality, 189
bootstrapping, 94
border, 149, 153, 162
boundary, 153, 162

C

carrying capacity, 24, 39
cellular automata, 28, 242
central place, 24
centrality, 188
climate model, 27
closeness centrality, 189
cluster analysis, 155
clustered point patterns, 135
cognitive map, 223
cognitive perception, 220

command line software, 45
communication, 194
communication axes, 172
complete spatial randomness, 136
complex models, 28
complexity, 36
condition, 50
coordinate reference system, 53
coordinate transformation, 57, 214, 226
cost functions, 182
Cox point process, 131
cultural border, 152
cultural distances, 163
cultural landscape, 10
cultural space, 152
culture, 26, 151

D

data frame, 49
decomposition, 83, 96
deductive predictive models, 125
degree centrality, 189
Delaunay graph, 173, 185
delaunay graph, 228
density, 70, 75
density cluster analysis, 159
density ridge approach, 180
detour, 182
diffusion, 38, 39
distance between events, 72
distance decay, 195, 205
distance decay functions, 203
distance diagrams, 198

E

economic space, 165
 empty circle density, 81
 Euclidean norm, 16

F

F-function, 136
 fall-off curve, 205
 first law of geography, 26, 97, 203
 first-order properties, 130, 131
 Fisher-Kolmogoroff-Petrovsky-Piscounoff,
 38
 function, 50
 fuzzy categories, 221
 fuzzy set, 70
 fuzzy sets, 221

G

G-function, 136
 Gabriel graph, 174
 geo-archaeology, 11
 geo-data, 53
 geodetic projection, 54
 geographical model, 32
 geographical space, 7
 Gibbs point process, 131
 graph theory, 16
 graphic device, 51
 GRASS, 216
 gravity, 24
 gravity law, 194
 gravity model, 207
 grid topology, 76

H

Haggett, 32
 HANDY, 39
 histogram, 68
 homo economicus, 29
 homogeneous point process, 131

I

ideal type, 30
 inductive predictive models, 117
 interaction, 170, 193
 interaction measures, 196
 interpolation, 97
 inverse distance weighting, 99
 isotrope point process, 131

J

J-function, 139

K

K-function, 138
 kernel density estimation, 71, 77, 180, 246
 Kolmogorov–Smirnov test, 134
 kriging, 100

L

L-function, 138
 landscape, 9, 213
 landscape archaeology, 10, 12, 13
 landscape perception, 213
 latent models, 24
 least cost path, 182, 185
 levels of measurement, 17
 Library of Congress, 31
 library of congress, 31
 linear algebra, 15
 linear model, 89
 local network level, 176
 logic, 13
 loop, 50, 59
 Lotka–Volterra model, 29

M

matrix, 15
 maximum likelihood, 88
 membership function, 221
 metric neighbours, 178
 metric space, 6
 model, 1
 conclusive model, 35
 Empirical models, 34
 Theoretical models, 34
 model classification, 34
 model fit, 89, 90
 model theory, 31
 model usage, 37
 modelling community of practice, 33
 molecule model, 27
 moving window, 180

N

neighbourhood graph, 173, 176
 network analysis, 169
 New Archaeology, 1
 Neyman–Scott point process, 131

O

overfitting, 92

P

Peirce, 33
 Peucker-Douglas algorithm, 180
 physical landscape, 10
 point pattern, 31, 57, 129
 point pattern types, 135
 point process, 129, 238
 point process intensity, 131
 Poisson point process, 131
 polar coordinates, 214
 post-processual archaeology, 3
 predator-prey model, 29, 39
 predictive modelling, 116
 principal component analysis, 133
 project folder, 53
 projection, 57
 propositions, 13

Q

quantifier, 14
 quantitative revolution, 31

R

R script, 52
 random numbers, 235
 random point patterns, 135
 random point processes, 129
 random walk, 187
 regional network level, 172
 regression, 87
 regular point patterns, 135
 relative space, 6
 relative-neighbour graph, 174
 reshape, 62
 Ripley's k , 138
 rubber sheeting, 226

S

second-order properties, 130, 135
 sensual perception, 215
 set, 13
 settlement archaeology, 11
 simple point process, 131
 simulation, 233
 social space, 7, 149

source criticism, 4
 space, 6, 8
 spacing, 8
 spatial interaction, 194
 spatial representation, 8
 SpatialGridDataFrame, 56
 SpatialPointDataFrame, 55
 sphere-of-influence graph, 174
 SQL, 64
 SQM classification, 35
 SQM-classification, 35
 Stachowiak, 31
 stationary point process, 131
 Steiner tree, 182
 Strauss point process, 131, 241
 structured point processes, 129
 supra-regional network level, 171

T

Tarski, 31
 territorial trap, 150
 territoriality, 150
 territory, 149
 third-order properties, 130
 third-order properties, 144
 time series, 73
 topographic position index, 111
 transitional object, 183
 transportation, 170
 truth table, 14
 two cultures, 2

V

validation, 187
 variogram, 100, 202
 vector, 15
 vector space, 15
 Velten, 35
 view-shed, 215
 visibility, 215
 Voronoi graph, 98, 162, 184

W

wave of advance, 38
 weighted Voronoi graph, 165, 184

X

X-tent model, 165
