

Index

A

Absolute indicators, 59
Academic diamond, 5, 11
Academic trace, 73
Activity index, 136
Adjusted count, 28
AERES, 33
Age dependent h -index, 68
Age of citation, 240
Age structure, 22
Aging, 23
Aging of scientific information, 23, 197, 226
Aging of scientific literature, 227
A-index, 80
Annual impact index, 105
Arithmetic mean, 15
Assessment of research, 5, 13, 29
Attractivity index, 137

B

Basic research, 5, 31
Bibliometrics, 5, 20
Binary logistic model, 258
Bivariate Waring distribution, 239
Boltzmann, 242
Bradford's law, 21
Brain drain, 213

C

Cauchy distribution, 166
Central area index, 72
Central limit theorem, 17, 166, 272
Chance, 12
Characteristic scores and scales, 72

Citation analysis, 221
Citation networks, 23
Citations, 22, 25, 60, 61, 72, 222, 235
Cluster, 9, 22
Coauthors, 29
Coauthorship, 21, 70
Cobb–Douglass, 213
Coefficient of variation, 111
Communication, 4, 23
Competition, 11
Complex, 27
Complexity, 256
Composite indexes, 57
Composite publication index, 133
Concentration, 113
Concentration–dispersion effect, 172, 173
Contact conversion, 208
Continuous g -index, 76
Core, 22
Core journals, 178
Correlation, 13
Coulter, 24
Count data models, 258
Crisis, 7

D

Death stochastic process, 226
Degree h -index, 87
Demand, 12
Diffusion of ideas, 207
Disparity, 113
Dispersion, 18
Dissemination, 31
Dissipative structures, 7, 8
Dissipative systems, 4

Distribution, 29
 Distribution function of obsolescence, 225
 Distribution of Pareto, 174
 Diversity, 113
 Diversity index of Lieberman, 115

E

Economic growth, 6, 214
 Economic system, 4
 Education level, 13
 Effectiveness, 14
 Efficiency, 14
 EKW-count, 28
 English–Czerwon method, 34
 Entropy, 7, 120, 242
 Epidemic models, 200
 Evolution, 4
 Expected information content of Theil, 123
 Expenditure efficiency index, 134
 Expert evaluation, 29
 Extreme perfectionism index, 73

F

First citation distribution, 223
 Flow, 7, 8, 257
 Fluctuation, 7
 Fokker–Planck equation, 253
 Frequency approach, 168
 Frequency approach to scientific production, 161
 Frobenius–Perron theorem, 36
 FSS-indexes, 139
 Fundamental research, 212

G

Gamma distribution, 225
 Gamma function, 175
 Garfield, 21
 Gaussian distributions, 16, 163, 272
 GDP, 211–213, 269
 Generalized α -index, 75
 Generalized Waring distribution, 168
 Generalized Zipf distribution, 259
 Geometric distribution, 231
 Gh-index of Galam, 68
 GIGP distribution, 167
 G-index, 76
 Gini, 111
 Gini's coefficient of inequality, 112
 Gini's mean relative difference, 111
 Globalization, 5

Global maps of science, 25
 Gnedenko–Doebelin theorem, 18, 164, 167, 272
 Goffman–Newill model, 202
 Government, 11, 12
 Growth function, 196
 Growth of knowledge, 213

H

Halo effect, 32
 Hard laws, 158, 164
 HCM-count, 28
 Heavy tail, 18, 165
 Herfindahl–Hirschmann index, 113
 H-index, 63, 64, 87, 245
 Hirsch core, 71
 Homeostatic feature, 9
 Horvath's index of concentration, 114
 Human capital, 214
 Human factor, 255
 Human resources, 11, 211, 212
 Hyperauthorship, 22
 Hyperbolic relationships, 158, 161

I

I-index, 77
 Impact, 26
 Index, 55, 58, 59
 Indexes for stratified data, 126
 Index of dissimilarity, 118
 Index of Gini, 124
 Index of imbalance of Taagepera, 119
 Index of inequality of Coulter, 129
 Index of Kuznets, 125
 Index of net difference of Lieberman, 127
 Index of personal success, 84
 Indicator, 5, 6, 14, 27, 32, 56, 59
 Inequality, 24, 112
 Information, 8, 26
 Information production systems, 34
 Informetric, 5, 20
 Informetric distributions, 184
 Infrastructure, 12
 Inhomogeneous birth process, 227
 Innovation, 5
 Instability, 7
 Intellectual infection, 203
 Intellectual structure, 8
 Interval scale, 15
 Invention, 4
 Invisible colleges, 22
 Invitation paradox, 182
 IQ_p -index, 78

J

Jaccard distance, 89
 Jaccard index, 89
 Journal paper citedness, 131
 Journal paper productivity, 132

K

Knowledge, 13
 Knowledge-based economy, 4
 Knowledge landscapes, 5, 21, 24
 Knowledge maps, 24
 Knowledge production, 10

L

Latent characteristics, 27
 Latent variables, 14, 15, 272
 Law of Bradford, 178
 Law of Lotka, 161, 165, 166, 172, 174, 179
 Law of Pareto, 220
 Law of Zipf, 161, 176
 Law of Zipf–Mandelbrot, 177
 Law of Zipf–Pareto, 243
 Leimkuhler, 182
 Leimkuhler curve, 180
 Limited dependent variable models, 258
 Lobby index, 88
 Logistic function, 225
 Lorenz curve, 123, 145, 147, 180
 Lotka, 72, 168
 Lotka–Volterra models, 200
 LV-count, 28

M

Macroindicators, 60
 Management, 6
 Manpower efficiency index, 134
 MAPR-index, 105
 Master equation, 197, 252, 253
 Material structure, 8
 Mathematical methods, 13, 19
 Mathematical models, 4
 Mathematics, 4, 19, 274
 Matthew effect, 180, 181
 Matthew index, 181
 Mean, 18
 Mean structural difference index, 133
 Measurement, 5, 14, 15, 19
 Measurement scales, 19
 Median, 15
 Merton, 181
 Mesoindicators, 60

Microindicators, 59
 MII-index, 66
 M-index, 71
 Mixed Poisson distribution, 197, 224
 Mixed Poisson model, 224
 Mode, 15
 Mode 1 of knowledge production, 101
 Mode 2 of knowledge production, 101
 Multifactor analysis, 19
 Multiple authorship, 68
 Multivariate Waring distribution, 238

N

Nagel's index of equality, 110
 Negative binomial distribution, 168, 197, 225, 235
 Negative entropy index, 122
 Network, 9, 22
 Network centrality, 88
 Network theory, 87
 Nominal scale, 15
 Noncontact conversion, 208
 Non-Gaussian, 18, 19, 163
 Non-Gaussian distributions, 16, 18, 164–166, 272
 Non-Gaussianity, 5
 Nonlinear, 4
 Nonstationary birth process, 234
 Normal count, 28
 Nucleation model, 196
 Number of elite scientists, 172
 Number of successful papers, 85

O

OECD, 33
o-index, 74
 Ordinal scale, 15
 Organization, 7
 Organization theory, 275
 Ortega hypothesis, 172

P

Pareto diagram, 125
 ParetoII distribution, 174
 Patents, 22
 Patents–papers index, 134
 Peer evaluation, 32
 Peer review, 34, 58
 Perfectionism index, 73
 Performance, 34
 Performance management system, 13

Performance measurement, 14
 Performance of research organizations, 14
 Periphery journals, 178
 PI-indexes, 83
 P-index, 70, 78
 Poisson distribution, 197, 248
 Poisson model of citation dynamics, 221
 Poisson process, 218, 222, 249
 Poisson regression model, 259
 Population, 17
 Power law, 158, 184, 187, 212, 257
 Price, 22, 170, 171, 204
 Price distribution, 245, 247
 Price model of knowledge growth, 204
 Probability density function, 17
 Process, 14
 Productivity, 6, 187
 Proportionality index of Nagel, 129
 PS-index, 86
 Psychological motivation flow, 8
 Publications, 29, 60, 158

Q

Qualitative measurements, 16
 Quality, 13
 Quality management system, 13, 14
 Quantitative measurements, 16

R

Random branching process, 217
 Random motion, 27
 Random variables, 17
 Range, 15
 Rank, 13, 176
 Rank approach to scientific production, 161, 176
 Ranking, 36
 Ratio scale, 15
 Redundancy index of Theil, 122
 References, 5
 Regression models, 258
 Relative citation rate, 138
 Relative indicators, 59
 Relative prominence index, 132
 Relative subfield citedness, 131
 RELEV method, 57, 130
 Reproduction–transport equation, 210
 Research, 4, 12
 Research activity, 13
 Research community, 255
 Research fields, 24
 Research networks, 87

Research organization, 4, 12, 29, 58, 255
 Research performance, 6
 Research production, 25, 26, 219
 Research productivity, 13, 26
 Research publications, 22, 27, 60
 Research system, 4, 17, 213, 271
 Research work, 26
 RHCR-index, 132
 R-index, 80
 RPG-index, 107
 RPS-index, 86
 RT-Index of fragmentation, 119
 RTS-Index of concentration, 115

S

Schutz coefficient of inequality, 109
 Science, 4, 6, 11, 160, 255, 257
 Science Citation Index, 160
 Science dynamics, 21
 Science systems, 7
 Scientific community, 256
 Scientific competition, 5
 Scientific conferences, 6
 Scientific elite, 144, 145, 170, 171
 Scientific fields, 23
 Scientific hyperelite, 145, 147
 Scientific information, 5, 6
 Scientific journals, 6

 Scientific organizations, 23
 Scientific production, 157, 241
 Scientific productivity, 8, 14, 252
 Scientific publication, 6
 Scientific publications, 160
 Scientific research, 6, 22
 Scientific superelite, 145
 Scientific system, 7
 Scientometrics, 5, 20
 Scores, 29
 SEIR model, 204
 Self-citations, 23, 65
 Self-organization, 7
 SEP, 33
 Shooting stars, 224
 SIC-index, 132
 SIR-model, 201
 Sleeping beauties, 224
 SMIP indicator, 141
 Social evolution, 5, 6
 Social structure, 6, 8
 Social system, 17, 257
 Society, 6, 10, 17

Soft laws, 158, 164
Solow model, 213
Square root law of Price, 144
Stable non-Gaussian distributions, 165
Standard deviation, 15
Statistical characteristics, 5
Statistical laws, 158, 182
Straight count, 28
Stratified data, 126
Strength of elite, 147

T

Tapered h -index, 67
Technological progress, 6, 214
Technology, 6, 11, 211
Technology leaders, 6
Technology level, 211
Temperature, 27, 243
TG-count, 28
Theil's index of entropy, 121
Thermodynamics, 7, 27
Thermodynamic system, 7
Time series, 21, 22
T-index, 106
TPP-index, 108
Triple helix, 4, 10, 11
Truncated Waring distribution, 232
Two-sided h -index, 75

U

Units, 26

V

Variation, 111
Variational approach, 242
Variety, 113

W

Waring distribution, 197, 227, 248, 259
Webometrics, 20
Weibull distribution, 225, 241
Wilcoxon deviation from the mode, 109
Workers, 26

Y

Yule distribution, 197, 217, 220, 221, 231
Yule process, 196, 218, 225

Z

Zipf, 18, 163, 164, 242
Zipf distribution, 164, 170, 231, 272
Zipf law, 183
Zipf–Mandelbrot law, 183
Zipf–Pareto law, 165
