

Index

A

Adipokines, 2, 6
Airway obstruction, 42, 43, 45
Airway remodeling, 42, 44
Antioxidant, 73
Arterial pressure, 12, 14, 18–21
Asthma, 42–45, 79
Atrial fibrillation, 10, 16, 17, 20
Atypical bacteria, 90

B

Biochemical markers, 1–7
Bronchi, 43–45, 50
Bronchial smears, 51, 52, 54–59

C

Carcinomas, 50, 53, 54, 57, 58
Cardiovascular disease (CVD), 24
Chlamydia pneumoniae, 90–92
Co-infection, 90–92
Culture, 78, 80, 90, 92

D

Depression, 24, 26, 28, 29
Diaphragm, 32, 37–39

E

Echocardiography, 11, 12, 35
Education, 87, 88
Emotion, 24, 26–28, 88
Epidermal growth factor receptor (EGFR), 49–59
Exercise, 32–39, 90

F

Fatigue, 32, 35, 37–39
Flu, 85
Frequency-domain analysis, 12, 17, 18, 20

H

Head-down bed rest (HDBR), 32, 33, 35–39
Head-up bed rest (HUBR), 32, 33, 35–39
Heart rate variability (HRV), 9–21, 24–28

HIT-a, 51, 57, 59

Hypokinesia, 33, 35, 38

I

Immunization, 79–81, 84, 87, 88
Infection, 78, 80, 89–92
Inflammation, 2, 3, 6, 64, 65, 71–73, 90
Inflammatory disease, 42

L

Lung cancer, 49–59

M

Meconium aspiration syndrome (MAS), 64, 70, 72–74
Mood disturbance, 26–28
Mortality, 1–7, 10, 11, 20, 78, 80
Multidetector computed tomography (MDCT), 41–45

N

N-acetylcysteine (NAC), 63–74
Neurocardiac regulation, 28
Non-small cell lung carcinomas (NSCLC), 50–55, 57, 58

O

Oxidative damage, 64–69, 73, 74

P

Parasternal (PS), 11, 32–38
Pathogen detection, 90
Pertussis vaccine, 79–81
Pharyngeal swabs, 90
Prevention, 77–81, 84
Prophylaxis, 77–81, 83–88

R

Right heart catheterization, 11, 12, 15
Risk factors, 4, 7, 24

S

Scalene, 32, 37–39
Smoking, 2, 3, 51, 53, 54, 58, 59
Somatosome, 50

Sternocleidomastoid (SCM), 32, 34–38
Stress, 2, 23–29, 64
Sudden cardiac death, 10, 20, 21
Surfactant, 63–74
Systolic pulmonary, 12, 14, 15, 18–20

T

Targeted molecular therapy, 50, 51, 59
Time-domain analysis, 11, 16–18

V

Vaccine, 78–81, 86, 87
Volume of interest (VOI), 43

W

Whooping cough, 77–81
