

Index

A

Abnormal breast, 278
Accuracy, 230, 240, 242, 243, 248, 251
Adaptive segmentation, 186, 188, 189
Aedes Aegypti, 110, 113
ANFIS, 111, 123–125
Artificial neural networks, 123
Automatic segmentation, 230

B

Back propagation, 168
B-cell, 113
Boltzmann univariate marginal distribution algorithm, 234, 238, 251
Breast cancer, 255–268, 270, 273–275, 285
Breast region, 255, 256, 258, 259, 275, 276
Breast thermograms, 255, 267, 270, 273, 275, 276

C

Chl-a, 142, 144
Chlorophyll, 137, 139, 141, 142, 145–148, 154, 155, 159, 160
Classification, 164, 165, 167–169
Clustering, 209–211, 214–217, 219–223, 225
Color, 186, 188, 192, 193, 204
Color-based segmentation, 119, 120
Computer-aided diagnosis, 230
Connected component, 193
Content retrieval, 104, 105
Conventional techniques, 164
Coronary arteries, 230
Critical phase, 115

Crossover, 197
Cuckoo search, 55, 59, 70

D

Data clustering, 169, 170
DB index, 174–177, 181
Decision rules, 187
Dengue, 110, 116
Dengue diagnosis, 116
Dengue fever, 110, 111, 113, 119
Dengue symptoms, 114
Dengue treatment, 116–118
Dengue virus, 110, 112, 113
Dengue warning signs, 115, 117, 118
DENV, 110
Depth map generation, 177
Depth reconstruction, 177
DF, 115, 116
DHF, 115, 116
Directional filters, 241
Dunn index, 174, 175, 177

E

Eddy(ies), 138, 139, 142, 146, 147, 150–152, 155
Edge detection, 193, 203
Edge magnitude, 55, 56, 58, 59, 64, 65, 83
Elongation, 230–232, 241
Evolutionary computation, 233
Evolutionary computing, 55, 56, 58, 59, 64, 66, 123
Exhaustive search, 241

F

False-positive fraction, 232
 Feature, 291–293, 297, 299–304, 306, 307, 316
 Febrile phase, 114
 Firefly algorithm, 4, 5, 19
 Fitness function, 192, 196, 198
 FSIM, 69, 72–75
 Fuzzy clustering, 189
 Fuzzy c-means (FCM), 111, 122, 168, 170–172, 211–213, 215, 216, 218, 219, 221–225, 256, 277, 278, 280, 283
 Fuzzy fusion, 186, 195, 196, 200, 203
 Fuzzy logic, 88, 90–93, 123
 Fuzzy set, 169, 170, 172

G

Gabor filters, 230–232, 240, 247
 Gaussian filters, 230
 Genetic algorithm (GA), 24, 25, 28–32, 34, 49, 59, 72, 186, 190, 195, 196, 230, 234
 GLCM, 55–58, 64, 65, 76
 Gravitational search algorithm (GSA), 25, 29–33, 35, 49
 GSA-GA, 25, 29–35, 44, 49

H

Haematocrit, 115, 118
 Hematocrit, 116, 118, 119
 Hemocytometer chamber, 117
 Homogeneous regions, 192, 194
 Hottest region, 255, 256, 258, 259, 275, 277–282, 285
 Human skin, 186
 Hybrid intelligent technique, 255, 275, 277, 278
 Hybrid models, 172
 Hybrid soft computing technique, 119, 121

I

IDM, 69, 76, 79
 IgG, 113
 IgM, 113
 Illumination conditions, 186
 Image, 291, 292, 300–303, 305, 306, 316
 Image example, 88
 Image processing, 165
 Image segmentation, 1–5, 19, 23–25, 32, 44, 49, 165–168, 172, 177, 180
 Inter-class variance, 242

Interpolation, 291–295, 297–299, 301, 302, 304–311, 314, 315
 Intuitionistic fuzzy c-means, 172
 Intuitionistic fuzzy sets, 169, 170, 172, 174

K

Kapur's entropy, 24–26, 32, 35, 36, 38–40, 44, 47
 KDD, 168
 Kernel-based algorithms, 180
 K-means, 111, 119–123, 168, 169
 Knowledge rules, 137, 139–141, 145–149, 151, 153, 154, 156, 159
 Kurtosis, 128

L

Labeling problem, 186
 Leishmans stain, 117, 119
 Length filtering, 243
 Leukopenia, 115, 118

M

Mathematical morphology, 231
 Maximum response, 231
 Membership grade, 186
 Mesoscale Oceanic Structures (MOS), 137–142, 145–149, 151, 153, 159, 160
 Microscope, 117, 119
 Microscopic blood smear image, 119, 121, 126
 Modeling, 291–299, 301, 304, 305, 309–314, 316
 MODIS, 137–139, 141, 144, 145, 147, 149–152, 159
 Multilevel thresholding, 2–4, 24–30, 32, 49, 54, 55, 58, 64, 66–68, 83
 Mutation, 197

N

Nature-inspired algorithms (NAs), 24, 25, 27, 29, 32, 35, 44, 49
 Neural network, 277, 278, 281–283
 Noise, 186

O

Objective function, 234
 Ocean satellite images, 137, 140
 Optimal threshold, 187
 Otsu, 24–27, 32, 35, 41, 43–46, 48

P

Parameter optimization, 230
 Particle swarm optimization, 60, 71
 Pattern, 307
 PFC, 291–316
 Platelet counting, 119
 Platelet segmentation, 119, 120
 Population, 197, 198
 Precision, 200
 Probabilistic, 291, 292, 316
 Probability distribution, 234
 Probability map, 187, 192–194, 198
 PSNR, 69, 79

Q

Qualitative analysis, 203

R

Recall, 200
 Receiver operating characteristic, 230
 Recognition, 291, 292, 300, 304, 306
 Recovery Phase, 115
 REFII, 88, 90–92
 RFCM, 172, 174–176, 181
 RGB, 88, 89, 92, 93, 96, 104, 106
 RIFCM, 174–176, 181
 Rough C-Means, 170
 Rough set, 169, 170, 172

S

Satellite image, 165, 168–170, 172, 173, 176, 177, 181
 SeaWiFS, 137, 139, 141, 142, 144, 145, 147, 149–151, 155, 159
 Seed expansion, 188, 192
 Segmentation, 87, 89, 92, 93, 105, 255, 258, 259, 273–280, 283, 285
 Shock, 115, 118, 119
 Skewness, 128
 Skin color model, 186, 204
 Skin histogram, 187, 192, 194
 Skin probability estimation, 189

Skin segmentation, 186, 189, 199
 Social Spider Optimization, 4, 5, 19
 Spatial, 209, 214–216, 218, 219, 221–223, 225
 Spatial filter, 192
 SSIM, 69, 72–75
 SST, 138, 141, 142, 145, 149–152
 Statistical analysis, 201
 Support vector machines, 123
 Swarm techniques, 4

T

T-cell, 113
 Temperature, 137–139, 141, 142, 145–149, 154, 155, 159, 160
 Texture, 186, 188, 190, 192–195, 198, 204
 Thermal imaging, 255, 265, 266, 270
 Thickness, 230–232, 241
 Threshold, 165, 166
 Thresholding, 230
 Threshold segmentation, 2
 Thrombocytopenia, 115, 119
 True-positive fraction, 232

U

Uncertainty, 209–212, 226
 Uncertainty-based image segmentation, 166
 Univariate marginal distribution algorithm, 234, 236
 Upwelling, 138, 142, 146, 147, 150–152, 159
 Upwellings, 138, 142, 155, 159

W

Wake, 146, 150–152, 155
 Wakes, 138, 142, 151
 Width estimation, 230

X

X-ray coronary angiograms, 230
