

Index

A

Allometric scaling, 42, 54
Allometry, 54
Astronomy, 41
Atmospheric convection, 59, 61
Atmospheric eddy continuum, 31, 95
Atmospheric warming, 75
Autocorrelation function, 47, 49

B

Bell curve, 7, 41, 44
Berry's phase, 80
Binomial distribution, 44
Bivariate power laws, 54
Bohmian mechanics, 98
Boltzmann, 54, 64
Broadband, 14, 16, 22, 57, 76
Brownian, 41, 42, 109

C

Catastrophic, 33, 41, 44, 46, 47, 53, 124
Central limit theorem, 44, 47, 123
Circulation speed, 79, 84, 87, 91
Classical mechanical laws, 80
Classical physics, 81, 95, 99
Climate change, 33, 49, 75
Climate fluctuations, 57, 108
Climatological parameters, 65
Coherent structures, 17, 18, 22, 31, 50
Collective organization, 51, 53
Complex systems, 3, 47, 52, 55
Computed solutions, 24, 25, 77, 78
Cooperative existence, 20, 48, 52, 78
Critical exponents, 51, 53
Critical phenomena, 42, 50, 52, 59
Critical points, 16, 50, 54
Cumulative probability distributions, 46

D

Deterministic chaos, 20, 22, 23, 25, 28, 77, 85, 97
Distribution of errors, 44

E

Eddy continuum, 31, 32, 56, 63, 79, 82, 95, 100, 107, 109, 118, 122, 123, 133
Eddy fluctuations, 24, 56, 78, 80, 82, 84, 100, 109, 122
Electromagnetic energy, 81
El Nino, 22, 58, 76
ENSO (El Nino/Southern Oscillation) cycle, 22, 76
Entanglement, 95, 102
Equilibrium systems, 51, 53
Exponential distribution, 47
Extreme events, 15, 28, 29, 32, 47, 49, 53, 64, 94, 108, 110, 111, 117, 124, 132, 133

F

Fat long tail, 31, 86, 121–123, 133
Feigenbaum, 1, 32, 87–93, 124, 133
Fibonacci, 8–12, 18, 32, 52, 55, 64, 82, 87, 92, 93, 100, 107, 110, 123
Fine-scale fluctuations, 3
Fine structure constant, 94, 121, 124, 133
Finite precision, 1, 19, 20, 24, 26, 33, 75, 77, 78
Finite variance, 7, 44, 49
Fluid mechanics, 97
1/f noise, 15, 28, 42, 47, 49, 53, 58, 62, 108, 123
Fractal space-time, 2, 7, 31, 42, 56, 65, 78, 98, 122, 133
1/f spectra, 47, 58

G

- Gaussian distribution, 7, 31, 41, 44–47, 121, 122, 133
- General systems theory, 2, 31, 42, 56, 63, 65, 75, 78, 79, 86, 98, 107, 108, 111, 115, 118, 121, 122, 133
- Golden mean, 8, 11, 19, 31, 32, 52, 56, 64, 65, 84, 92, 100, 107, 110, 121, 124

H

- Hierarchy, 4, 10, 31, 47, 80, 122, 123, 133
- Hurst effect, 49
- Hydrodynamics, 47, 51, 64

I

- Implicit order, 77
- Inadequate model, 7, 42, 45
- Integrated network, 3
- Interannual variability, 22, 76, 121, 134
- Intermittency, 32, 57, 60, 77, 85, 89, 124
- Inverse power-law, 14, 16, 21, 22, 76, 78, 98, 107–110, 115, 117

K

- Kepler ratio, 51
- Kepler's third law, 78, 80, 99
- Kolmogorov, 4, 30, 46, 52, 56, 84
- Kurtosis, 85, 86

L

- Large eddy, 19, 24, 77, 79, 81–84, 86–89, 91, 93, 94, 98, 101, 110, 124, 133
- Law of the wall, 84, 88
- Linear secular trends, 121, 134
- Logarithmic spiral, 8, 32, 56, 82, 84, 98, 100, 109, 123
- Long-range correlations, 14, 22, 49, 52, 53, 108, 110, 121
- Long-term memory, 42, 49, 58, 62, 109

M

- Meteorological parameters, 3, 4, 14, 17, 19, 32, 42, 49, 57, 64, 76, 122
- Microscopic details, 15, 53
- Multifractal, 14, 19, 23, 29, 30, 76, 122

N

- Natural climate variability, 75
- Newton's inverse square law, 78, 99
- Noise and fluctuation, 41, 43
- Non-differentiable, 48

- Non-Euclidean, 3, 5, 6, 48, 76
- Nonlinear systems, 25, 30, 43
- Nonlocal connection, 101
- Normal curve of error, 41, 44, 45
- Normalized standard deviation, 84, 131

O

- Omori law, 6, 45

P

- Pareto distribution, 46
- Particulate size distribution, 66
- Penrose, 13, 26, 32, 82, 83, 91, 96, 98, 100, 101, 123, 133
- Period doubling, 86–91, 93
- Phase transitions, 16, 50, 53, 54, 59
- Phyllotaxis, 8, 55, 56
- Power-law relations, 42, 54
- Power spectra, 1, 2, 14, 19, 20, 31, 49, 52, 56, 58, 75, 76, 84, 107, 109, 121, 122, 130, 131, 134
- Precipitation, 42, 51, 58–61, 117

Q

- QBO, 22, 75
- Quantumlike chaos, 75, 78, 121, 123
- Quantum mechanics, 79–82, 84, 95–98, 100, 102
- Quantum systems, 32, 64, 79–81, 84, 90, 95, 100, 102, 121, 124, 132, 134
- Quantum wavefunction, 95

R

- Random fluctuations, 18, 19, 41, 42, 51
- Round-off error, 23, 24, 75, 77

S

- Scale factor, 14, 15, 17, 19, 78, 109, 122
- Scale-free, 48, 51, 52, 54
- Scale invariance, 2, 14, 15, 19, 21, 47, 52, 58, 60, 122
- Scale transformation, 48
- Self-organized criticality, 42, 52, 53, 57, 64
- Self-similarity, 2, 3, 6, 8, 14, 19, 21, 47, 49
- Spatiotemporal correlations, 16, 20, 75, 98, 123
- Stable mean and finite variance, 7, 44
- Statistical normal distribution, 32, 41–43, 47, 64, 78, 85, 110, 123, 124, 130, 132, 134
- Statistical physics, 54
- Subatomic dynamics, 64, 80, 84, 100
- Symmetry principle, 3, 49
