21st Century Learning Centers Program
4-H Study of PYD
5Cs + 1

A

Academic domain
Active forms of learning
Activity Observation Instrument (AOI)
Adolescence
Adolescent development
Adolescents' cognitive capacity
Affective engagement
Afterschool Alliance (ASA)
After-school and youth programs
 caring and supportive relationships
 efficacy and mattering
 structure
After-school Corporation
After-school programs
 black box of
 challenges
 effectiveness of
 indicators of success
 issues to consider
 participants
 plethora of activities
 professionalization
 small budgets
 understanding how to do
 understanding what to do
Applied domains
At-risk youth, prevention program

B

Behavioral engagement
Breadth
 assessing

C

Caring
Carnegie Corporation
Carnegie Council on Adolescent Development
Case study
 evaluation of
Causal effect
Center for Teen Empowerment
Child Trends
Cognitive engagement
Collaboration
Communication
Conceptual clarity, multiple methods
Construct measurement
Context-specific mastery experiences
Creating effective programs
Culturally-informed theories

D

Developmental exercise
Developmental nutrients
Developmental theories
Dorchester Bay Youth Force

E

Effective learning
 principles of
Efficacy
Emotion Regulation Questionnaire
Empathy measures
Engagement
 importance of
 in program activities
 in youth programs
 measuring
 sustained
Eric database

Evaluation-related initiatives
 Expanded learning
 ExpandED Schools
 Experience sampling techniques (ESM)
Explicit targeting of skill
 Extended learning

F

Five Cs model, *See also* 5Cs + 1
Focus on skills
 Forum for Youth Investment

G

Gang-involved youth
 Gender intensification hypothesis
 Gender schema theories
 Gender-based demands
 Girls on the Run
 evaluation efforts
 recommendations
 Granger, Robert

H

Harvard Family Research Project (HFRP)
Higher quality afterschool program
 Homeless youth
 How and why questions
How to think about youth

I

Improve it to move it approach
 Improving performance
 Informal and experiential learning
 Informing policy
 Intensity
 assessing
 Interactive exercises
 Inter-disciplinary discussion
 Invariance measurement

K

Key social emotional skills
 Knowledge

L

Latch-key issues
 Life-stage outcomes
Lower quality afterschool program
 Low-income children

M

Mattering
 Mature afterschool systems
 Most in-need youth

Motivational beliefs and gender
 Move to improve approach
 Multitrait-multimethod approach

N

Nashville, school-day experience
 National Afterschool Association
 National Collaboration for Youth
 National Institute on Out of School Time
 (NIOST)
 National Institute on Out-of-School Time
 (NIOST)
 National Research Council (NRC)
 features
 recommendations
 National Youth Development Information
 Center (NYDIC)
 No Child Left Behind policy
 Non-cognitive skills
 Non-program-based challenges

O

Oklahoma, school-day experience
 Out of-school programs
 Out-of-school time (OST)
 organizations

P

Participation
 indicators of
 measuring
 Peer to-peer relationships
 Peer-to-peer socialization process
 Person-centered analysis
 Phenomenological Variant of Ecological
 Systems Theory (PVEST)
 Physical activity-based positive youth
 development (PA-PYD) program
 Point-of-service setting
 Positive and sustained relations
 Positive interpersonal relationships
 Positive youth development (PYD)
 and after-school relationship history
 bridging programs and youth
 building on the tenets of
 champions' opportunities
 current opportunities to move to practice
 developmental assets framework
 expanding commitments
 external assets
 internal assets
 moving towards change
 policy and practice recommendations
 promoting

Positive Youth Development Evaluation Project
 Practice-derived evidence
 Practitioner-researcher-policy maker partnerships
 Program effectiveness
 Program engagement
 Program improvement staff
 Program models
 limitations of
 Program quality
 effects on outcomes
 measuring quality
 observational tools
 Program recommendations
 Program-based challenges
 Project-based learning
 Promising Practice Scale (PPS)
 Prove it or lose it model
 Proving to improving programs
 PsychInfo database

Q

Quality
 Quality program
 Quality, Engagement, Skills, Transfer (QuEST) model, *See also* [QuEST model](#)
 Quasi-experimental (QE) designs
 QuEST model

R

Reactive coping

S

S.A.F.E. (Sequenced, Active, Focused, and Explicit) training
 S.A.F.E. (Structured, Active, Focused, Explicit) features
 Self-report surveys
Sequenced activities
 Setting-level characteristics
 Skill assessment
 Skill-building activities
 Social address approaches

Social and Emotional Learning (SEL) Challenge
 behavioral measures
 belief measures
 Social and emotional skills
 Social justice orientation
 Socio-emotional domain
 Supportive relationships

T

Teacher learning communities
 Theoretically-predicated changes
 Theory for skill development and transfer
 Theory-based empirical work
 Traditional K-12 education
 Transfer

U

U.S. education policy and practice
 Under-served youth

V

Variable-centered analysis

W

What we know
 What we need to address
 What, after-school field
 William T. Grant Foundation

Y

Youth
 net stress (engagement) level
 opportunities for
 vulnerability level of
 Youth development programs
 Youth Empowerment model
 Youth experience
 Youth Force, *See* [Dorchester Bay Youth Force](#)
 Youth practitioners
 Youth Program Quality Assessment (YPQA)
 Youth Risk Behavior Surveillance (YRBS) survey
 Youth skill building activities
 Youth's developmental ecology
 Youth-adult relationships
