

Index

A

Abundance ratios, 8, 46, 149, 150, 151, 152
Asymptotic directions, 79, 80, 91, 187, 188, 193
Atmospheric effects, 100, 105–106

B

Bremsstrahlung, 27, 28, 31, 32, 34, 36, 40, 115, 135, 136, 137, 139, 140

C

Charged particles, 17, 18, 36, 37, 38, 40, 41, 50, 51, 63, 67–69, 79, 80, 81, 89, 181, 183, 184
Charged particle transport, 63–76
Chromosphere, 29, 32, 35, 135, 145, 157, 158
CME-driven shock, 3, 5, 14, 16, 46, 144, 148, 152, 157, 158, 180
Collapsing magnetic trap, 57–58
Combined Greens-function, 188–189
Compressional acceleration, 46, 57–58
Convolution, 189, 190
Coronal mass ejection, 1, 27, 37–42, 45, 63, 96, 117, 180
Coronal shock acceleration, 9, 159–161, 176
Cosmic ray particle transport, 79–93
Cutoff rigidities, 80, 91–93, 192
Cyclotron resonance, 51, 52
Cyclotron waves, 52, 59

D

δ -injections, 186, 189, 190, 193, 196
Differential intensity spectrum, 196
Diffusive shock acceleration (DSA), 15, 41, 53–58
Diffusive transport, 71–72, 161
Discontinuity, 91, 92, 159
Downstream propagation (DSP) model, 159, 161–164, 169, 170, 173
Dynamo, 79

E

Earth's atmosphere, 95, 97–100, 103, 105, 106, 181, 186
Earth's Magnetic field, 79–83, 86–88, 90, 92, 97, 100, 107, 184, 196
Earth's magnetosphere, 19, 66, 79–93, 114, 182, 187, 188, 192, 193, 194, 196
Electric field acceleration, 47–49
Electrodynamical coupling, 29
Electromagnetic fields, 45, 47, 48, 69, 80
Electromagnetic waves, 33, 52, 69–70
Electron beams, 33–34, 36
Electron intensities, 120, 121, 122
Energetic particles, 1–23, 41, 63–64, 69, 98, 114, 134, 159, 185–189
Energy spectra, 4, 11, 12, 13, 19, 22, 118–120, 149, 150, 167, 168, 169, 173, 183, 189
Eruptive activity, 27–41

F

First adiabatic invariant, 67–69
 Focused transport, 70–71, 185
 Forecasting tools, 23, 113–130
 Forward modeling, 181, 185–189

G

Gamma-ray, 28, 31, 34, 38, 133–151, 157–173
 Gamma(γ)-ray emission, 27, 34, 134–138, 140–145, 149, 169
 Geomagnetic field, 80, 82, 84, 85, 87, 88, 89, 92, 95, 96, 104, 180, 186
 Geomagnetosphere, 79, 80, 81, 82, 83, 87, 88, 89, 91, 92, 93, 96
 Gradual SEP events, 2, 3, 5–11, 46, 60, 64, 180
 Ground-based measurements, 95–109
 Ground level enhancement, 11–12, 97, 114, 124, 158, 179–196
 Gyrosynchrotron, 31–33, 39, 115
 Gyrosynchrotron radiation, 31–33, 115

H

Hard X-ray, 28, 30, 31, 32, 35, 36, 38, 115, 135, 137, 138, 139, 140, 141, 142, 143, 148, 151, 152
 Hazard assessment, 20–22
 Heliosphere, 6, 9, 12–16, 38, 40, 64, 71, 190
 Historical microwave data, 115–118
 Human health, 19–20
 Human health effects, 19–20

I

Impulsive flare, 3, 29, 40, 134, 137, 138, 139, 140
 Impulsive SEP events, 2, 3, 151
 Intensity time-profiles, 13, 171, 194
 Interplanetary magnetic field, 3, 14, 64–66, 69, 87, 89, 166, 182, 185, 186, 187
 Interplanetary medium, 63–76, 180, 189, 193
 Interplanetary particle distribution, 186–188
 Interplanetary transport, 72, 77, 181, 185, 192, 193
 Inversion methodology, 179–196
 Inversion model, 72, 75, 76
 Ionosphere, 19, 83, 86, 87, 114

L

Langmuir waves, 33, 34
 Large gradual SEP events, 5–11, 60

Long duration γ -ray events, 136, 141–143, 145, 158, 173, 174
 Lorentz force, 36, 38, 47, 49, 67, 68, 80–81, 97

M

Magnetic flux rope, 38, 39
 Magnetic polarities, 39
 Magnetic structuring, 28
 Magnetohydrodynamic, 2, 41, 56, 159
 Magnetospheric electric currents, 86–87
 Mean free path, 57, 71, 74, 99, 102, 162, 185, 186, 189, 190, 191, 194, 196
 Microwave flux density, 114, 116, 117, 119, 120, 129
 Mitigation procedures, 20, 22–23
 Mitigation strategies, 17, 22
 Multi-spacecraft observations, 12–14

N

Neutron monitor data, 105, 108
 Neutron monitor detector, 100–106
 Neutron monitors, 2, 22, 91, 95–109
 Neutron monitor station, 96, 97, 98, 100, 104, 106, 107, 108, 109
 Neutron monitor yield function, 103–104
 Nuclear gamma-ray emission, 27
 Numerical techniques, 72

P

Parallel diffusion coefficient, 9
 Particle acceleration, 2, 10, 14–15, 27–37, 40–42, 45–60, 115, 129, 152, 169, 173, 174, 175, 176
 Particle cascade, 99–100
 Particle effects, 18
 Particle transport equations, 69–70
 Peak proton intensity, 6, 11
 Perpendicular diffusion coefficient, 9
 Photon energies, 31, 134–136, 141
 Photosphere, 28, 29, 36, 38, 39, 41, 145
 Pion-decay, 34, 134, 135, 136, 137, 139, 140, 142, 151, 152, 158, 174, 176
 Plasma emission, 31, 33–34, 39
 Propagation, 13, 19, 54, 63, 64, 68, 74, 79, 89–91, 114, 159–165, 170, 173, 185, 189
 Proton acceleration, 158, 167–168, 172–173, 176
 Proton differential intensity, 73
 Proton fluxes, 116, 117, 146
 Proton injection rate, 165, 166, 167, 171, 172

- Proton intensity, 5, 6, 11, 12, 116, 117, 120, 171, 189
- Proton spectra, 4, 119, 129, 139, 164, 169, 173, 194
- Proton transport, 159, 161, 169–170, 173
- R**
- Real-time predictions, 23, 130
- Real-time tools, 113
- Relativistic gamma-ray events, 133–152
- Remote sensing, 16, 22, 180
- Reservoir region, 12, 13
- Resonant wave acceleration, 50–53
- S**
- SEP effects, 17–19
- Shock-accelerated particles, 9, 56, 71, 75, 141
- Shock acceleration, 7, 9, 11, 15, 41, 46, 47, 53–57, 152, 158–161, 176, 181
- Shock drift acceleration, 40, 53
- Shock modelling, 168
- Shock passage, 12, 13, 73, 74, 165
- Shock surfing acceleration, 53
- Shock waves, 2, 7, 27, 28, 36, 37, 40–42, 54, 70, 141, 144–145, 158, 180
- Simulation model, 159, 161, 176
- Snowstorm effect, 18
- Soft X-ray, 7, 29, 30, 31, 114, 129, 140, 141, 142, 143, 146, 147, 149, 151, 152
- Solar activity, 27, 42, 66, 87, 100, 106, 124
- Solar atmosphere, 28, 31, 32, 34, 40, 115, 134, 137, 141, 144, 145, 151, 152, 158
- Solar corona, 16, 28, 33, 36, 37, 39, 42, 45, 53, 143, 181
- Solar cosmic ray, 96, 97, 105, 106, 181, 186
- Solar cycle 23, 11, 12
- Solar energetic particle events, 27–42, 63–64, 72–76, 100, 114, 134, 137, 145–151
- Solar energetic particles, 1–23, 45, 124, 134
- Solar flare, 1, 2, 3, 7, 16, 22, 29–36, 40, 53, 63, 135, 137, 138, 158, 180
- Source plasma temperature, 12
- Space weather, 1–23, 96, 118, 130, 176, 181
- Spectrometer, 96, 98, 102, 107–108, 134, 182, 184
- Stochastic acceleration, 46, 58–60, 158, 174
- Suprathermal seed populations, 8
- Sustained emission events, 137–141
- T**
- Tsyganenko model, 88, 89
- V**
- Validation, 184, 194–196
