Rationale for Bibliographic References

This bibliography contains additional references for readers who wish to study particular areas in more detail than that provided in the Further Reading and References at the end of each chapter. Readers should note that appropriate Further Reading for each chapter is included at the end of each chapter and this bibliography does not duplicate these references. Note that the reference numbers 1–61 are not referred to in the main text as this is a list of books which is additional reading to that referred to directly in the book, and provides more detail in each of the topic areas below.
