Development/Statskontoret
(SAFAD), 73

T

Target populations, 265–272
Technical view of OD, 221
Technological barriers, 348, 349
Technological context, open government,
336, 337
Technology acceptance model (TAM),
212–214
Television-assisted instruction (TAI), 247
Temperature Condition Index, 192
Text4Baby, 270, 271
Thessaloniki Urban Agglomeration (TUA), 181
Top-down perspective, 200
Transactions, 283
Trans-disciplinary approach, 200
Trans-disciplinary effort, phases of, 200
Transparency, 197, 198, 200, 204–214, 300,
307–309, 314, 315
 approaching design for, 301–304
 balancing privacy with, 333, 334
 collective intelligence scenario-based
 design, 305–307
 components, 303
 design and route-to-PA project, 304, 305
 discussion, 319–325
 evaluation plan and pilots description
 of pilot sites, 211, 212
 research approach, 212, 213
 user level, 213, 214
 future actions, 214–216
 limitations and directions for future
 research, 325, 326
 methods and results
 scenarios and pilot sample
 details, 307
 workshops, 307–309
 open government, 337, 338
 options to overcome barriers, 311–314
 overcoming barriers, 309–311
 requirements and user involvement,
 201–203
 ROUTE-TO-PA platform, 203–210
 architecture, 204
 SPOD, 204–208
 TET, 208–210
 social-collaborative needs, 316–318
 societal activity model, 203

 understandability, usability and decision-
 making needs, 316–319
 user needs, information, 314, 315
 Transparency-enhancing toolset (TET), 199,
 200, 208–210, 215
 example, 216
 “plug-and-play” architecture, 210
 status and exploitation, 210
 technical features, 209, 210
 Transparency maturity model, 303
 Transparent government, 333
