

Index

A

- ABI 87, 186, 195
- Advanced Measurement Approaches (AMA)
 - internal measurement approach 38–39
 - loss distribution approach 39–40
 - operation requirements 59–65
 - operational risk management and 65–72
 - overview 37–38
 - scorecard approach 40–42
- Anderson-Darling quadratic tests 99, 131n14
- Assessment of Operational Risk Management
 - business resilience and continuity plans 84
 - identification of risk 84
 - internal control framework 84
 - organizational framework 82–83

- policies and procedures 83–84
- strategy and tolerance 82
- Audits 15, 28–30, 34, 62, 64, 78, 80, 84

B

- BancoPosta 146–150, 152–153, 158–159, 163, 166, 177, 178n1, 190
- Basel Accords 35, 75, 96, 117, 125, 128
- Basel Committee on Banking Supervision (BCBS) 31, 37–38, 44, 59
 - AMA and 4, 184–189
 - BancoPosta model and 146
 - bank specific assessment 13, 18
 - LDA and 97
 - ORM and 2, 5, 13, 69
 - PSMOR and 69

- qualitative requirements 64
 - quantitative requirements 64–65
 - RAF and 197, 199
 - rank correlation and 104–105
 - Basel II 30, 33, 58, 64–65
 - Basic Indicator Approach (BIA)
 - 30–32, 35, 47, 58, 65, 68, 78, 185–186
 - Bayesian methods 123–129
 - Bias
 - anchor 121
 - availability 120–121
 - motivational 121
 - reporting bias 105
 - Black swan events 44
 - Block Maxima 55
 - Body severity distribution
 - estimating parameters of 52–53
 - goodness-of-fit test 53–54
 - overview 51–52
 - Buggé, Vincenzo viii
 - Business Environment and Internal Control Factors (BEICF) 42, 45–46, 59, 65, 126
- C
- Capital Requirements Regulation (CRR) 9, 30–33, 35, 42, 64
 - Capobianco, Claudia viii
 - Cavallo, A. 109
 - Chavez-Demoulin, V. 110, 113–115
 - Clemen, R.T. 121

Kolmogorov-Smirnov (KS) quadratic
 tests 166, 168

L

Leone, Paola xv
 Likelihood function 52–53
 Likelihood ratio test 99, 131n12
 Log-likelihood 113, 115
 Loss Distribution Approach (LDA)
 46–57
 bank requirements 47–48
 body severity distribution 51–54
 frequency distribution 48–50
 overview 46–47
 severity and frequency convolution
 56–57
 severity distribution 50–51
 tail severity distribution 54–56
 Loss Distribution Approach (LDA)
 bank requirements 47–48
 Bayesian method and 126–128
 Block Maxima 55
 calculating capital requirement
 and 3, 16, 95–97, 120, 130n1
 estimate of log-normal distribution
 parameters 52–53
 frequency distribution 48–50
 goodness-of-fit test of the distribu-
 tion 53–54
 overview 39–40, 46–48, 150–151
 Peaks Over Threshold (POT)
 55–56
 process steps 97–110
 risk measurements integration and
 152

- severity and frequency convolution 56–57
- severity distribution 50–51
- tail severity distribution 54–56
- Losses
 - expected losses (EL) 39, 103, 145, 147, 173
 - external loss 3, 12, 27, 42, 86, 125
 - Internal Loss Multiplier 185, 188–189
 - internal losses 27, 41–45, 48, 51–52, 97, 125, 147, 154, 161, 173, 187–188
 - Unexpected Losses (UL) 103, 145, 147, 173, 177
- Low-Frequency, High-Impact (LFHI) events 44

- M
- Mapping 5, 7, 11, 27, 32, 42–44, 46
- Matarazzo, Vitantonio *xvi*
- Maximum Likelihood Estimator (MLE) 52–53, 168
- Mean Excess 99, 112, 131nn9–10, 166–167, 177
- Model risk 80
- Monte Carlo simulation 56, 100, 102, 145, 150, 152, 172–173
- Moscadelli, M. 99, 105, 109
- Multidimensional operational risk 11, 13, 18, 196

- P
- Pasqualina Porretta *xv–xvi*
- Peaks Over Threshold (POT) 55–56
- Peaks over threshold method 111–114
- Pearson chi-squared test 99
- Perry, J. 116–117
- Pillar framework 67, 195, 202
- Poisson distribution 40, 48, 50, 58, 88n6, 98, 108, 112–113, 120, 127, 129, 157–158
- Preliminary assesments 78–79
- Probability Weighted Moments (PWM) 168
- Pure operational risk 10–11, 18, 121

- Q
- Quantile-Quantile Plot (Q-Q Plot) 50, 53, 56, 162–163, 170

S

Scenario analysis 117–123
 Self-assessment 26–27
 Severity distribution 173
 Shifted models 52, 108–109
 Single Loss Approximation (SLA)
 method 169–170, 177, 191
 Single Supervisory Mechanism
 Regulation (SSRM) viii, 14, 17,
 184
 Sklar, M. 104
 Spearman correlation coefficient 104,
 132n19
 Standard Measurement Approach
 (SMA) model viii, 4, 15, 17,
 42, 59, 184, 185–186, 188–
 195, 201–202
 Supervisory Authorities 10, 34–35,
 37–39, 41, 60, 64, 67–68, 74, 76
 Supervisory Review Process (SREP)
 assessment of operational risk
 82–85
 model risk 75
 Operational Risk Management
 25–26, 75–76
 organizational framework 82–83
 overview 72–76
 phases of 72–73
 policies and procedures 83–84

preliminary assessment 78–81
 reputational risk 75
 risk management and 146–147
 SMA and 195, 202
 strategy and tolerance 82
 structured RAF and 200
 Systems-ICT risk 80

T

Tail severity distribution 54–56
 Teply, P. 116, 121
 Transversal operational risk 10–11,
 18, 27, 69
 Truncated models 109, 116, 127
 Tversky, A. 120

V

Value at Risk (VaR)
 calculating 16, 40
 calculation of 57–59
 Extreme Value Theory and
 114–115
 historical loss data analysis and
 147, 153
 LDA and 40, 47–48, 102–103,
 108–109
 Monte Carlo method and 56
 Operational VaR 190–192
 severity distribution and 173
 Single Loss Approximation (SLA)
 and 169–170, 177
 Vellella, Mario xvi
 Vuong test 109

W

Watchorn, E. 120
 Weibull distribution 88n7, 116, 127
