

Index

A

Anderson impurity model, 2, 121, 125, 163, 164
Antiferromagnetic Hubbard model, 40
Auxiliary master equation, 123, 167, 171–173

B

Bethe lattice, 98, 99, 102–105, 109, 110, 112, 113, 115
Born Markov approximation, 139
Boundary conditions, 78, 79, 81, 90, 91
Buffer layer approach, 125, 168, 170–172

C

Casuality property, 89

D

Density matrix, 12–14, 26, 65, 66, 70, 75, 76, 82, 92, 93, 101, 123, 127–130, 132–134, 136–139, 150, 153, 157, 158, 160, 169, 180, 181
Diagrammatic perturbation theory, 74, 77, 83, 85, 86
Dynamical mean-field theory, 2, 6, 8, 16, 20, 25, 29, 33, 63, 65, 66
Dynamical phase transition, 33, 34, 37–39, 100

E

Eigenstate Thermalization Hypothesis (ETH), 66
Equation of motion, 80, 81, 84, 87, 92, 177–179

F

Fermi liquid, 7, 38, 47, 65, 107, 112, 115
Fermionic operators, 12, 30, 147, 154, 159, 160, 176
Fluctuation-dissipation theorem, 67, 69, 71

G

Gibbs ensemble, 36, 65–67, 76
Green's function, 2, 3, 21–23, 36, 63, 65, 66, 71, 73, 77–80, 83–88, 90–92, 94–98, 100, 101, 113, 121, 123–125, 157, 158, 161–166, 169, 171, 173, 176–178, 182–184
Gutzwiller approximation, the, 2, 6, 8–11, 13, 15, 20, 24, 26, 33, 34, 37–39, 41, 43

H

Hubbard model, 8, 9, 12–14, 16, 19–21, 24–29, 31–34, 37, 40, 42–44, 85, 86, 95, 96, 102–106, 109, 110, 115

I

Impact ionization, 108, 109, 111
Impurity solvers, 101, 102
Interaction quench, 37, 51

K

Kadanoff-Baym equation, 91, 93, 100
Keldysh contour, 75, 76, 161, 162
Keldysh formalism, 2, 63, 65, 69, 70, 74, 93, 95

L

Langreth rules, 88, 89, 162, 165, 179
 Lindblad equation, 123–125, 133, 135–138,
 145, 146, 148, 150, 153, 154, 157, 160,
 166, 168, 172, 173, 176, 181

M

Markoniav reservoir, 123, 124, 138, 169, 171
 Master equation, 2, 3, 121, 123, 125, 126, 134,
 135
 Mott-transition, 8, 23, 24, 26, 29, 32–35, 38,
 39, 64, 101–104, 108, 112

N

Non-equilibrium Green's function, 2
 Non-equilibrium superconductors, 41

O

Out-of-equilibrium protocols, 33

P

Paramagnetic phase, 102, 109–111

Photo-doped Mott-insulators, 101, 115

Pseudospin representation, 46–48

Q

Quantum quench, 16, 19, 33, 38, 40, 42, 43,
 50, 54, 122

Quantum regression theorem, 158, 182

R

Reduced density matrix, 123, 127, 130, 132,
 133, 137–139, 158

S

Self-energy, 20, 23, 24, 83, 84, 86, 87, 94–98,
 100, 103, 113

Steady-state, 73, 94, 124, 126, 137, 156, 180

Strongly correlated electron materials, 7

Superfermion representation, 124, 150, 153,
 155–157, 161, 176, 180, 182

W

Wick's theorem, 84, 85, 161
