

# Index

## 4M Strategy, 328

activators, 37

active transport, 153

adaptation, 14, 32, 77, 193, 215, 231,  
284, 286, 288, 289, 291, 292, 293,  
297, 326

AIDS treatment, 378

Alliance for Cellular Signaling, 237, 380

APC, 243, 244, 246, 259, 273, 274, 306,  
307, 308, 309, 314, 317

apoptosis, 149, 236, 325, 349, 350, 351,  
352, 353, 354, 355, 356, 357, 358,  
359, 366, 367

apoptosome, 352

applications of Systems Biology, 396

arthritis, 6

ATP, 13, 20, 21, 25, 45, 74, 88, 123,  
125, 130, 134, 173, 199, 240

attractors to repellers, 312

Axin, 259

Bayesian networks, 144

bifurcation diagram, 305, 312, 313, 315,  
316, 317, 318, 319

BIG SCIENCE, 399

Biochemical Systems Analysis, 69

Biochemical Systems Theory, 130

bioengineering control, 31

biofuels, 398

bioinformatics, 122, 390, 391, 392

biological characteristics, 71

biological function, 7

Bioquant, 399

biosynthesis, 15, 32, 33, 34, 35, 37, 45,  
46, 47, 48, 49, 51, 52, 60, 61, 65, 66,  
202

bistability, 84

bottom-up, 144, 149, 205, 236, 396

branched-chain amino acid, 45, 47, 49

BRENDA, 37

*brucei*, 393

calcium signal transduction, 85, 87

cAMP, 89, 218, 219, 220, 221, 222, 235,  
243, 244, 246, 247, 248

cancer, 6, 259, 268, 378

cartoon, 4

casein kinase, 274

caspace, 352, 353, 356, 357, 358, 366,  
367

catalytic cycle construction, 37

causality, 132, 134, 138, 391

CD95, 349, 351, 352, 353, 354, 355,  
356, 357, 358, 359, 366, 367, 372

cell cycle, 3, 8, 127, 134, 150, 171, 216,  
235, 236, 242, 243, 244, 245, 246,  
247, 248, 249, 255, 279, 280, 286,  
287, 292, 298, 305, 306, 307, 308,  
311, 312, 313, 314, 315, 316, 317,  
319, 320, 325, 326, 329, 330, 332,  
334, 337, 339, 340, 342, 343, 389,  
391, 396

Cell cycle, 305

cell cycle checkpoints, 316

cell cycle model, 24

cell division, 15, 242, 305, 306, 308,  
312, 316, 319

cell function, 7

cell growth, 150, 245, 247

cell sizer, 329, 336, 337

cell survival, 149

CellDesigner, 380, 381

cellular network, 32

challenges of Systems Biology, 392

chaos, 84

chemiosmotic coupling, 130

chemotaxis, 206, 216, 231, 375

ChIP (Chromatin Immuno  
Precipitation), 295

chromophores, 87

Cleland's classification, 38

Cln3, 336, 337, 338, 345

complexity, 5

computational fluid dynamics, 380

computational modeling, 163

Computational models, 166, 168

computational tools, 26, 378

connection coefficients, 145

connectivity, 131, 132, 135, 194, 241,  
360

constraints based modeling, 27

Control Analysis, 143
