

List of Participants

1. Abenda Simonetta, University of Bologna, Italy
Abenda@ciram.ing.unibo.it
2. Abrahamson Mikael, Lund University, Sweden
mikab@maths.ith.se
3. Adami Riccardo, University of Roma “La Sapienza” Italy
adami@mat.uniroma1.it
4. Anders Igor, Paris, France
igor_anders@yahoo.com
5. Brugarino Tommaso, University of Palermo, Italy
brugarin@unipa.it
6. Class Waksjö, Linköping University, Sweden
class.waksjo@math.lin.se
7. Conte Robert, CEA Saclay, France (lecturer)
conte@spec.saclay.cea.fr
8. Delgado Marina, University of Madrid, Spain
mdelgado@alum.math.uc3m.es
9. Greco Antonio, University of Palermo, Italy (editor)
greco@gremat.math.unipa.it
10. Kamp Van der Peter, University of Amsterdam, the Netherlands
peter@few.vu.nl
11. Kockelkoren Julien, CEA Saclay, France
kockel@spec.saclay.cea.fr
12. Lafortune Stéphane, University of Montréal, Canada
lafortus@crm.unomtreal.cn
13. Loris Ignace, University of Brussels, Belgium
igloris@vub.ac.be
14. Magri Franco, University of Milano, Italy (lecturer)
magri@vmimat.mat.unimi.it
15. Martinez Torres David, University of Madrid, Spain
dmartinez@arrakis.es

16. Morgante Anna, CEA Saclay, France
morgante@llb.saclay.cea.fr
17. Musette Micheline, University of Brussels, Belgium (lecturer)
mmusette@vub.ac.be
18. Peruzza Rosanna, University of Palermo, Italy
peruzza@dipmat.math.unipa.it
19. Rinaldi Emanuela, University of Messina, Italy
rinaldi@dipmat.unime.it
20. Satsuma Junkichi, University of Tokyo, Japan (lecturer)
satsuma@poisson.ms.u-tokyo.ac.jp
21. Sciacca Vincenzo, University of Palermo, Italy
sciacca@dipmat.math.unipa.it
22. Sergyeyev Artur, University of Kiev, Ukrainian
arthurser@imath.kiev.ua
23. Seta Luciano, University of Palermo, Italy
seta@dipmat.math.unipa.it
24. Tokihiro Tetsuji, University of Tokyo, Japan
toki@poisson.ms.u-tokyo.ac.jp
25. Verhoeven Caroline, University Brussels, Belgium
cverhoev@vub.ac.be
26. Winternitz Pavel, University of Montréal, Canada (lecturer)
wintern@crm.umontral.ca
27. Zaliy Alexander, Kiev University, Ukrainian
Zaliy@imath.kiev.ua
28. Zanoni Alberto, University of Pisa, Italy
zanoni@posso.dm.unipi.it

Index

- N*-soliton solution 4, 137, 145, 156, 164
- ψ -series 14, 49
- singular part transformation 18, 19

- AKNS equation 32, 61
- AKNS system 59, 61

- Bäcklund
 - parameter 139, 150, 157, 160
- Bäcklund parameter 3, 5, 26
- Bäcklund transformation 3, 18, 49,
137, 139, 144, 147, 150, 152–154
 - auto– 3, 59, 138–140, 154, 155, 157,
159–161
 - bilinear 49, 59, 157
 - hetero– 3–5, 10, 26, 31, 35, 36, 44, 46,
59, 156, 158
- Bianchi
 - diagram 151, 160
 - permutability theorem 151, 160, 165
- birational transformation 72, 140–142,
157
- Boussinesq equation 20, 35, 54, 143,
149
 - modified 59
- branch 14
- Broer-Kaup equation 20, 59, 61

- characteristic 69, 138
- classical
 - method 69
- closed form 2
- complex Ginzburg-Landau equation
65

- d’Alembert equation 4, 10, 21, 30, 31
- Darboux covariance 144, 145
- Darboux transformation 138, 140, 144,
152, 154, 155
 - binary 39, 145, 164
 - classical 144
- differential Groebner basis 50
- differential part 6
- diophantine conditions 17
- direct
 - method 69

- elliptic function 17, 140
- expansion variable 11, 147, 148

- family 142, 148, 149
- family of movable singularities 14
- Fordey-Gibbons equation 45
- Fuchs indices 15

- general analytic solution 52, 66

- hierarchy 19, 157
- Hirota-Satsuma equation 20, 37, 41,
54, 158
- homographic
 - group 12, 140, 148
 - invariants 12

- indices 142
- indicial equation 15
- integrability 5, 137, 138, 142, 149
- isospectral 5
- Ito equation 7

- Kadomtsev-Petviashvili equation 143
 Kaup-Kupershmidt equation 20,
 43–45, 54, 61, 145, 156, 158, 159,
 161
 Korteweg-de Vries
 hierarchy 7
 Korteweg-de Vries equation 12, 18, 33,
 59, 61, 151
 fifth order 156
 modified 57, 61, 148, 154
 KPP equation 15, 60, 69
 Kundu-Eckhaus equation 68
 Kuramoto-Sivashinsky equation 2, 5,
 8, 16, 18, 49
- Lax pair 5, 18, 138, 140, 143
 Lax representation 5
 order 6
 Riccati representation 6, 149
 scalar representation 6
 string representation 6
 zero-curvature representation 6
 Liouville equation 4, 10, 30, 56, 57, 61
 Lorenz model 18
- microdifferential operator 6
 Miura transformation 35, 149, 158
 Moutard transformation 146, 165
- no-logarithm condition 15
 nonclassical
 method 69
 nonlinear Schrödinger equation 7, 59,
 61, 67
 nonlinear superposition formula 137,
 151, 153, 156, 157, 160, 161, 164
- one-soliton solution 4, 152, 163
- Painlevé
 analysis 10, 142, 147, 148
 equation 176
 equation P2 72, 73
 equation P4 73
 equation P6 74
- equation (P1) 7
 equation (P6) 75
 equations 19, 140
 Gambier classification 140
 property 10, 139
 test 10, 11, 138, 140, 142
- Rössler system 18
 reduction 62, 65, 66, 69, 156
 resonances 15, 142
 resummation 20
- Sawada-Kotera equation 20, 43, 44, 46,
 54, 61, 145, 149, 156, 158, 160
 Schlesinger transformation 19
 Schur polynomials 190
 Schwarzian 12
 sine-Gordon equation 3, 4, 6, 8, 10, 18,
 20, 55, 61, 139, 148, 154
 singular manifold
 equation 30, 33, 35, 36, 52, 54, 57, 59,
 152
 method 19, 20, 27, 69, 138
 variable 11, 138, 142
 singular part operator 16, 138,
 147–149
- solution
 exact 2, 18
 global 2
 local 2
 spectral parameter 5, 26, 145, 150
- tau-function 8, 19, 138, 149, 160, 164,
 165
- truncation
 equations 27
 method 19, 20, 27, 138, 142, 147,
 148, 150, 153
 variable 27
- two-soliton solution 153, 156, 161,
 163–166
- Tzitzéica equation 20, 38, 61, 146, 149,
 165
- vacuum 4, 145, 152, 153, 156, 163–166
