

- Ambrosone L → Colafemmina G
- Baglioni P → Berti D
- Berti D, Keiderling U, Baglioni P:
Supramolecular structures formed
by phospholipidnucleosides: Aggrega-
tional properties and molecular
recognition 64
- Burrows HD → Da G. Miguel M
- Caboi F → Muria S
- Ceglie A → Colafemmina G
- Cinelli G → Colafemmina G
- Colafemmina G, Palazzo G, Ceglie A,
Ambrosone L, Cinelli G, Di Lorenzo V:
Restricted diffusion: An effective tool
to investigate food emulsions 23
- Da G. Miguel M, Burrows HD, Lindman
B: Polymer-surfactant association as
seen by fluorescence 13
- Di Lorenzo V → Colafemmina G
- Dias R → Lindman B
- Eskilsson K → Lindman B
- Keiderling U → Berti D
- Khan A → Marques EF
- Landh T → Zhou L
- Larsson K → Larsson M
- Larsson M, Wollmer P, Larsson K: The
alveolar surface is lined by a coherent
liquid-crystalline phase 28
- Leal C → Lindman B
- Lindman B → Da G. Miguel M
- Lindman B → Nylander T
- Lindman B, Melnikov S, Nylander T,
Eskilsson K, Miguel M, Dias R, Leal C:
DNA-lipid systems. An amphiphile
self-assembly and polymer-surfactant
perspective 52
- Ljusberg-Wahren H → Muria S
- Marques EF, Khan A: Effect of a bile salt
on the aggregation behaviour of a
double-chained cationic surfactant –
the cationic-rich dilute region of the
didodecyldimethylammonium bro-
mide (DDAB)-sodium taurodeoxy-
cholate (SYDC)-water system 83
- Melnikov S → Lindman B
- Miguel M → Lindman B
- Monduzzi M → Muria S
- Muria S, Caboi F, Monduzzi M,
Ljusberg-Wahren H, Nylander T:
Acyl migration and hydrolysis
in monoolein based systems 41
- Nilsson Å → Zhou L
- Ninham BW: Physical Chemistry: The
loss of certainty 1
- Nylander T → Lindman B
- Nylander T → Muria S
- Nylander T, Lindman B: Foreword V
- Olsson U → Rasmusson M
- Palazzo G → Colafemmina G
- Rasmusson M, Olsson U: From bilayers
to micelles in a dilute surfactant
system: A phase with a perforated
bilayer network 74
- Söderman O → Topgaard D
- Silvander M: The performance
of sterically stabilized liposomes –
a review 35
- Sternby B → Zhou L
- Topgaard D, Söderman O: A NMR self-
diffusion study of the porous structure
of starch granules 47
- Wollmer P → Larsson M
- Zhou L, Landh T, Sternby B, Nilsson Å:
Hydrolysis of cubic liquid crystalline
phase of glycerol monooleate by hu-
man pancreatic lipase 92
