

# Index

## Symbols

1-octen-3-ol 146, 147, 157  
2,4-diacetylphloroglucinol 93, 98

## A

*A. carbonarius* 189  
*A. niger* 188  
*A. ochraceus* 174  
*A. parasiticus* 174  
ABC transporter 214  
actinomycetes 116  
acyl homoserine lactones 247  
adsorption 180  
aflatoxins 173  
allelochemicals 247  
Alpha-pinene 258  
    fumigant 259  
    isomer 260  
*Amanita muscaria* 117  
amino acids 210  
animal waste 178  
antibiotic, 192  
    biosynthesis genes 29  
    chromatographic system 28  
    chromatography 28  
    contaminants 27  
    DAPG 27  
    detection 28  
    direct analysis 25  
    extraction 26  
    fractionation 27  
    gene expression 31  
    liquid–liquid extraction 27  
    mutants 32  
    nontarget effects 32  
    phenazine-1-carboxylic acid 27  
    pyroluteorin 27  
    pyrrolnitrin 27

    solid-phase extraction 27  
    sorption 25, 26  
    SPE sorbents 27  
antifeedant 258, 259, 262  
antifungal compounds 135  
    *Coniothyrium* 135  
    *Penicillium* 135  
antimicrobial 244  
antimicrobial 109  
appressorium 213  
*Aspergillus flavus* 173  
auxofuran 118

## B

bacteria 158  
biocontrol 72, 271, 272  
biocontrol agents 112, 129  
    antibiosis 129  
biodiverse 270  
biodiversity 223, 269  
biofilm 246  
biofilm inhibitors 245  
biological activities 108  
biological control 23, 93  
biological control agents 246  
biosphere 270  
*Burkholderia* 74  
burnt 152, 157, 159

## C

*Centaurea* 245  
chemical defense  
    Optimal Defense  
        Hypothesis 219  
chemical defense  
    allocation cost of phenotypic defense  
        subhypothesis 220
