

---

# Index

- k*-means, 3, 8, 9, 11, 13, 16, 17
- k*-nearest neighbor, 115, 117, 135, 166
  
- aggregation, 53–57, 59, 67, 68, 72
- anomaly detection, 91, 95, 96, 99–101, 109
  
- bioinformatics, 50, 115
- bipartite graph, 38, 39
- bolstered resubstitution error, 120–125, 127–131, 133
- boosting, 153, 155–157, 160–163, 173
  
- cancer classification, 115, 117
- cascading, 165–173, 175–178
- categorical data, 31–35, 37, 39, 41, 43, 45, 47
- classifier ensemble, 35, 165
- cluster ensemble, 3, 4, 7, 26, 27
- cluster ensembles, 31, 72
  - accuracy-diversity trade-off, 35
  - consensus function, 32, 35–37
- clustering
  - k*-means, 32, 49, 53–57, 59–61, 64–66, 71, 73, 79–81, 159
  - k*-modes, 32
  - COOLCAT, 33
  - modes, 36
- consensus function, 72
- consistency index, 3, 19, 20, 25, 26
- copula, 115, 117, 122, 125–129, 133
  
- dataset complexity, 115, 117, 120, 121, 129–133
  
- decision tree, 137, 165–173, 175, 177
  
- entropy, 33, 92, 119
- evidence accumulation clustering, 3, 14–16, 27
  
- feature selection, 116
  
- GARCH, 153–156, 160, 161, 163
- gene expression, 4, 49, 64, 66, 115–118, 120, 133
- grading, 165–173, 177, 178
- graph partitioning problem, 35, 37
  
- hierarchical clustering, 3, 13, 20, 32, 65, 73
- high dimensionality, 31, 51
  
- intrusion detection, 91–94, 97, 98, 103, 104, 107, 110
  
- Jaccard distance, 15, 36, 38, 39
  
- Markov blanket, 118
- METIS, 15, 37, 72
- multiple classifier system, 91, 94, 98, 100
  
- Naïve Bayes, 135, 140
- neural network, 72, 135, 137, 153, 155, 157, 158, 161, 163, 173
- nominal data, 165–170, 175, 176
- normalized mutual information, 3, 17, 24, 25, 40, 65
  
- one-class classifier, 91, 101, 104–106, 108, 110

- RANDCLUST, 53, 64–67
- random projections, 12, 49–51, 54, 59, 65, 67, 68
- random subspaces, 35
- stacking, 135, 136, 138, 140–143, 145–147, 150, 165–173, 177, 178
- stochastic discrimination, 35
- support vector machine, 105, 135, 145, 165
- time series, 135–138, 140–143, 145–147, 150, 153–155
