

Index

A

Adjacent segment degeneration 122, 127
Age 57
Airways management 59–63
Allografts 239
Anderson and D'Alonzo classification 182
Anemia 13
Ankylosing spondylitis 211–215
Anterior approach 70–72
Anterior discectomy/corpectomy and fusion 115–124
Antibiotics 6, 78
Aortic rupture 212
Arch of the atlas 107
Arthroplasty 143–145
Astrocytomas 222
Autograft 238

B

Back-shift of the spinal cord 55, 108, 282
Bernard–Horner syndrome 165
Bleeding 33, 68, 79, 136
Blood cell count 18
Bone scan 51
Brace 289–297
 rigid collars 290
 semi-rigid cervical braces 290
 skin complications 291
 soft Cervical Collars 290
 SOMI brace 289–297
Brachial plexus 71
Brain-stem injury 222
Bone graft substitutes 242

C

Cages 130, 132–135
Carotid artery 91–93
Cardiac risk index 4–6
Cardiologic problems 57
Caspar 118, 123
Ceramics 242
Cerebrospinal fluid leaks 82, 109, 123–124
Cervical sympathetic chain 90, 98
Chiari malformation 229
Chin–brow to vertical angle method 211
Chylothorax 96
Circumferential approach 72–74

Cloward Instrumentation 116–118, 266
Coagulation 20–23, 34
Combined approach 72–74
Controlled hypotension 63
Corpectomy 120
Craniovertebral junction 78
Creutzfeldt–Jakob disease 109

D

Deep vein thrombosis 35
Demineralized bone matrices 242
Dental lesions 78
Dental malocclusion 83
Detsky's modified cardiac risk index 58
Diabetes 6, 195
Discitis 199
Down's syndrome 194
Dura mater 34, 82, 123, 125, 136, 181
Dural tears 34, 123, 125, 136, 181
Dynamic plate 129
Dysphagia 209, 295
Dysponia 123

E

Electromyography 52
Ependymomas 222
Errors of level 283–286
Esophagus 87, 94, 122, 162, 186, 196
Evoked potentials 53

F

Facial artery 90
Facial nerve 97
Fractures 175–191
 Atlas 181
 Dens 182
 Hangman's fracture 184
 occipital condyle 180
 odontoid 180, 182
Fluoroscopy 182–183, 196
Friedrich syndrome 54

G

General health conditions 57
Gloves 195–196
Glottic edema 98

Graft complications 143, 165, 237–279
 Cloward Instrumentation 266
 donor site complications 243
 fibular donor site complications 268
 iliac crest 243–265
 mobilization 142, 206, 243
 multiple subtotal vertebrectomies and reconstruction 267
 Smith–Robinson fusion 266
 tibia donor site complications 268
 Greater occipital nerve of Arnold 106, 108

H

Halo fixator 67, 172, 176, 180, 289–297
 complications 180, 292–295
 contraindications 292
 safe zone 293
 pin complications 180, 294–295
 Head holder 182
 Hemangioblastomas 223
 Hematoma 164
 Hemorrhagic risk 20
 HIV 195
 Hooks 141
 Hypoglossal nerve 91, 97
 Hystory 46

I

Iliac crest 243–265
 cosmetic deformity 264
 donor site pain 244
 fractures of the ilium 249
 gait disturbance 264
 hematoma 259–264
 hernia 259
 infections 264
 nerve injury 244–249
 tumor transplantation 264
 vascular injury 249
 violation of the sacroiliac joint 249–258
 Inadequate decompression 126
 Inadequate surgery 281
 Incomplete surgery 281
 Infections 6, 78–81, 83, 193–201
 Instability 175–191, 194
 Intracranial abscess 295
 Intracranial penetration 295
 Intradural extramedullary neoplasms 223
 Intradural intramedullary neoplasms 221
 Intramedullary spinal cord metastases 223

J

Jefferson fracture 181–182
 Jugular vein 88, 94, 122

K

Karnofsky index 38
 Kidney disease 59
 Kyphosis 122, 126

L

Laminectomy and fusion 134–138
 Laminoplasty 135, 138

Laryngeal nerves 97
 Lasegue test 49
 Lateral position 73
 Lhermitte's test 49
 Leukopenia 17
 Liver disease 59
 Lymphocytopenia 17
 Long strut graft 271–274
 Lumbar drain 149
 Lung disease 58

M

Malnutrition 6
 Mayfield 68, 182
 Meningiomas 224
 Meningitis 196
 Microscope 77
 Middle cervical fascia 88
 Monoclonal gammopathy 19
 Motor neuron 49
 Minerva cast 176, 289–297
 Minimally invasive cervical spine surgery 35–37, 148–150, 283
 Monoclonal gammopathy 19
 Multiple myeloma 20
 Multiple subtotal corpectomies 124–127
 Multi level stenosis 54

N

Neck pain 45–48
 Needle biopsy 159–160
 Nerve injury 62, 71, 209, 244–249
 Nerve sheath tumors 224
 Neutrophilia 17
 Nonunion 269–270
 Nutrition conditions 57

O

Occipito-cervical decompression 207
 Occipito-cervical dislocation 181
 Ocular complications 68
 Omoyoid muscle 88
 Orthoses 289–297
 Ossification of the posterior longitudinal ligament 115
 Osteoinductive growth factors 243
 Osteomyelitis 193–201
 Osteotomy 212–214

P

Pachymeningitis 164
 Paradoxical spinal cord infarction 164
 Paralysis of C5 root 109, 135, 139
 Paraneoplastic myelopathy 54
 Parsonage–Turner syndrome 54
 Pharyngeal injury 83, 95
 Pharynx 78, 83, 95
 Physical examination 48
 Pneumonia 80
 Plate 130
 Platelet count 17
 Platysma 88
 Polycythemia 15
 Polytrauma 178

Posterior approach 67–70, 105–110
Posterior Instrumentation 139–143
Presternocleidomastoid approaches 87–100, 124
Prone position 67–70
Psychological state 57
Pulmonary ventilation 63

Q

Quantification of risk 47–48

R

Radiotherapy 31
Reduction in the white blood cell count 16
Retromandibular vein 90
Retrosternocleidomastoid approach 100–102
Rheumatoid arthritis 203–211
Romberg maneuver 50
Roy–Camille plates 207
Rigid plate 129

S

Safe zone 293–295
Salivary duct 95
Screw
 breakage 130, 142
 excessive length 130, 142
 loosening 130, 142, 143, 182, 203
 malpositioning 130, 142, 181
 violation of the endplate or disk space 130
Sign through your initials program 285
Sign your site program 285
Sign, Mark, and X-ray program 286
Skin complications 291–294
Smith–Robinson 118–123
Smoke 7
Soft palate dehiscence 206
SOMI brace 176, 289–297
Spinal-cord injury 78, 98, 108, 206
Spinal metastases 29–37
Spondylitis 193–201
Staphylococcus aureus 6, 194, 197
Submandibular approach 84
Syringomyelia 229–235

decompression of subarachnoid space 231
epidural decompressive surgery 231
posterior fossa decompression 232–234
scar tissue adhesion 231
shunting procedures 231–232
Swan neck 209, 282

T

Tetraplegia 178
Thoracic duct 96
Thromboembolic risk 23
Thromboprophylaxis 24
Thyroid gland 96
Thyroid vessels 94
Tracheal rupture 162, 212
Tracheostomy 196
Transmandibular approach 83
Transoral approach 77–82
Transverse ligament 176
Traumas 175–191
Thrombocytopenia 20–21
Tuberculosis 47

U

Ulcers 291
Universal protocol 286
Upper cervical spine injuries 179

V

Vagus nerve 89
Valsalva test 49
Vascular lesions 78, 93–94, 99, 108, 110, 121, 162, 168, 180, 182, 186, 188, 206, 209–211
Venous air embolism 68
Vertebral artery injury 78, 93–94, 108, 121, 162, 168, 180, 181, 186, 206, 209

W

White blood cell count 17
Wiring 141
Wound infection 198
Wrong-site surgery 283–286
