Subject Index

- accessibility 153, 159, 163, 166
activity-travel 119–120, 123–126, 132, 139
agglomeration economies 408, 414, 429,
436–437
ANOVA 408, 415, 423, 435, 437
aspace 122
autoregressive 390–391
- bandwidth 104, 113, 114
Bayesian estimation 473–476
bias 17, 45–49, 63–72
 asymptotic 23, 26
 attenuation 70
 OLS omitted variable 17–21, 23–24, 27
 omitted variable, as function of spatial
 dependence 24
 omitted variable, for the SDM 18
 omitted variable, for the SLM 26
 omitted variable, least squares expression
 20, 23
 omitted variable, sensitivity to 27
Canada 363–367, 369
- Canadian Community Health Survey 366, 376
Central Business District (CBD) 233–235,
249–250
centrographics 139, 141–143
cervical cancer screening 363, 365–367, 369,
376, 377
China 442, 445–459
cluster analysis 109–114
clusters 287–289, 295, 301, 303, 306
college-educated 288, 291–292, 296–297, 302,
306
common factor test 476, 479
commuter rail 204, 205, 207–209, 213
commuting time gender gap 195, 196, 199,
200, 202, 209, 210, 213, 214
- comparative 442, 445–447, 451, 456, 460
compositional effects 201, 213
congestion 199, 203, 205, 207–209, 213, 214
contagion 329, 332, 334
contemporaneous exposure 349, 360
contextual effects 201, 213
contingent valuation methods 172
convergence 441–446, 459, 460, 465–466,
468, 470, 476–480
cross-sectional 366, 376
crowding out 311–318, 320–325, 327–329,
331–334
cultural background 377, 378
cultural norms 340, 344
- Dartmouth Atlas 340
demographic 364, 366, 367, 372, 377
density 149–151, 154, 156, 159–167
density gradient 234, 239–242, 250
distribution 442, 444–445, 450, 452, 455, 456,
460
doughnut effect 107, 109, 112
Durbin-Wu-Hausman test 426, 432
- economic growth 444–445, 448, 458
economic integration 311, 312, 316–317, 322,
324, 391, 331, 334
EDA 121, 123
emerging markets 319, 327, 331
employment density 233–235
employment density function 234, 238–239
employment subcenters 234
EMU 316, 327, 334
endogeneity 59–72, 288, 296–297, 304, 417,
427, 437
ESDA 121, 122, 443
EU 327–329, 334
exogeneity 417, 426, 436

- exponential distribution 38
- externalities 466–467, 469, 470, 472, 474, 476, 479–480
 - spatial 149, 165, 172
- financial integration 316, 322, 327, 331
- first nature 407, 408, 413, 415, 423, 431, 436–437
- gaussian mixture models 112
- GDP density 413, 417, 422, 429, 431, 436–437
- gender 287–292, 295–301, 302, 305–306
- generalized covariance 77–78
- generalized kriging 80
- generalized random field 75–77
- GeoDA 122
- geographically weighted regression (GWR) 93, 95, 104, 105, 173, 189, 234, 242
- spatial error model (GWR-SEM) 174, 223
- geovisualization 121–124, 134, 138, 142–144
- GIS 121–122, 125–126
- growth 465–466, 468, 470–478, 480
- health
 - care 364, 365, 377, 382–385, 387, 389–390, 394, 400–401
 - determinants 366, 377
 - geography 364
 - outcomes 340, 343–344, 347, 351–352, 355–357, 359–360
 - services 364, 365
 - status 339–345, 347, 349, 355–357, 359–360
- hedonic price model 173
- heterogeneity 94–96, 114, 172, 242–243
- high-technology 287–293, 301–303, 305–306
- home bias 312, 314
- household responsibility hypothesis 197, 212
- housing price index 175, 180
- human capital 287–289, 292, 294, 301, 302, 306
- Ile-de-France 233–250
- imitation behaviour 340, 344
- immigrants 363–369, 372, 373, 376–378
 - women 364–366, 370, 372, 373
- inconsistency 59–60
- Indiana 340, 342, 345–346, 348, 350–354, 357, 359, 361
- inequality 441–443, 445–450, 460
- inferential 445, 456–458, 460
- innovation 287–288, 294
- instrumental variables 69, 71, 173, 177, 190, 221–224, 301, 303, 392
- interest rates 311–334
- intraclass correlation coefficient (ICC) 210
- job sprawl 198, 213
- jobs-to-people 384
- kernel 64, 66, 139–142
- k-means 112
- knowledge 287–294, 296, 306
- Knox County, Tennessee 171, 173, 179, 189
- Lagrange Multiplier 98–102, 182, 239, 243
- land conversion 151, 152, 154–156
- land cover information 180
- land use 119–120, 123–125, 134, 137, 143–144
 - policy 157, 159, 167
- landscape pattern 151, 155–157, 160, 164
- language ability 369, 373, 376
- lifetime exposure 360
- likelihood ratio test 33–36
- LISA 93
- loanable funds 313, 314, 317
- local 8–9, 12
- local estimation 93, 94, 95, 104–107, 109, 114, 242
- location quotient 385, 393, 395, 397, 398, 400
- Markov 444, 450–451, 455–457
- measurement error 60–61, 70–71
- medical specialists, MD, RN 385–387, 390, 394–399
- migration 361–362, 381, 384, 387–388, 397, 400–401
- maximum likelihood 94, 97, 100, 318, 344
- monocentric cities 233–234
- Monte Carlo 60, 63–72, 94, 98, 105, 108, 114
- Moran scatterplot 421
- Moran's I test 420
- morbidity 339, 342, 343, 347, 360
- mortality 339, 340, 343, 347–349, 351–356, 359–361
- multicollinearity 409

- multilevel 365, 367, 370, 372–374, 376
 - logistic regression 367, 370, 372–374, 376
- model 195, 200, 202, 205, 212
- natural amenities 157
- neighbourhood 365–367, 372–378
- neighbourhood effect 366, 369
- nonparametric 95, 98, 104
- Oaxaca-Blinder decomposition 289, 295, 297, 306
- OECD 312, 315, 319, 321, 324, 329–330, 332
- omitted variables – also see bias 60–68
- open source 122, 126, 127
- open space 171–190
- ordinary least squares 62–63
- panel data 318
- parameter stability 93, 94, 102
- peer influence 344
- peri-urban 149–167
- planning policies 234–235
- point pattern 141
- Poisson distribution 37
- polycentric cities 233
- private-vehicle commuters 198, 202
- productivity 287–288, 291–293, 296, 302
- provinces 418, 420, 422, 429, 437
- pure geography 408
- random-intercepts model 201, 210
- regression 389–390, 392, 394, 396
- Ricardian equivalence 311, 313–314
- RMSE 63–72
- rurality 348, 351–354, 357, 358, 360, 386–387, 389, 397–398
- SALE 94, 98, 104
- scale 441, 444, 450, 452
- screening 363, 365–367, 369, 376–378
- second nature 407, 410, 415, 423, 425, 426, 436–437
- semivariogram 394–395
- seniors 384–385, 396, 400
- service capacity 350
- simultaneity 60, 68–71
- smart growth 171
- Southeast 381, 384, 396, 400
- space-time 442–443, 447, 452, 455–457, 460
- spatial autocorrelation – also see spatial dependence 94–96, 172, 429, 431, 437, 438, 465–481
- spatial autoregressive model – also see spatial lag model 22, 61–62, 344, 353, 355, 358
 - instrumental variables 392–395
- spatial Chow test 429, 432
- spatial concentration 287–307
- spatial dependence 172
 - in disturbances and regressors 23
 - OLS bias 18
 - OLS estimates 18, 20, 24
 - omitted variables bias 23
