

Index

A

absolute configurations 16
action mechanism 200, 208, 280
activity 7
A half-leaf method 112
aldimine 11
amino acid analogue 7
amino acids 71
2-aminobenzothiazole 71
2-amino-4-methylbenzothiazole 218
amino-oligosaccharin 295, 296, 297
 α -aminophosphonate enantiomers 73
analgesic 192
analysis method 208
animal antiviral chemicals 2
anionic emulsifier 210
antibacterial agents 36
antibiotics 7
anticancer 192
anticancer agents 7
anticonvulsant 192
antidepressant 192
antifreezing agent 211
antifungal 192
anti-HIV 192
antihyperglycemic agent 36
antiinflammatory 192
antimicrobial 192
anti-pathogenic composition 3
anti-plant-virus-agents 4
antiproliferation activities 69

antipyretic agents 36
anti-TMV immune system 254
antitubercular 192
antitumor chemotherapy 71
antitumour 7
antiulcer 192
antiviral activities 164
antiviral chemotherapy 71
aromatic amine 15
asymmetric catalysts 7
asymmetric synthesis 80
8-azaguanidine 3

B

benzaldehyde 20
benzimidazoles 2
benzothiazole 7
 α -Benzylphosphonates 132
(*R*)-binaphthylphosphoric acid 15
boron trifluoride diethyl etherate 55
Botrytis cinerea 21

C

calcium lignosulfonate 213
Cambridge Crystallographic Data
Center 60
capillary electrophoresis mode 183
Cauliflower mosaic virus 1
cDNA synthesis 122
cellular metabolism 1
chiral α -aminophosphonates 4
chiral aminophosphonates 8

chiral Bronsted acid 8
 chiral chromatography 80
 chiral cyanoacrylates 4, 95
 chiral imines 7
 chiral ligands 8
 chiral stationary phases 72, 74
 chiral thiourea 153, 154, 160
 chiral thiourea derivatives 4
 Chiralpak AD-H 74
 Chiralpak IA 74
 chitinase activity 53
 chlorophyll content 242
 chloroplast 4
 chromatographic purification 58
 cinnamaldehyde 8
 coat protein 1
 (*E*) configuration 106
 (*Z*) configuration 106
 cucumber mosaic virus 1
 curative activity 18
 2-cyano-3,3-dimethylthioacrylate 102
 cysteamine acid synthase 4
 Cysteine synthetase 242

D

DCC 21
 DCU 21
 defense related enzyme activity 170
 deoxyribonucleic acid 1
 2-D gel electrophoresis 246
 dialkyl phosphites 7
 Dialkoxyethyl phosphites 26
 diastereoselective addition 7
 1,3-Dicyclohexyl-carbodiimide 21
 1,3-dicyclohexylurea 21
 diethyl phosphite 42
 dihydro-1,3,5-triazine- 2,4-dione 3
 di-isopropyl phosphite 42
 dimethyl phosphite 42
 di-*n*-propyl phosphite 42
 Dufulin 4, 207, 259, 261

E

electrophilic reactivity 17

10% emulsion concentrate (EC) 209
 enantiomeric purity 16
 Enantiomeric separation 273
 enantioselective addition 7
 enantioselectivity 74
 environmental behavior 207, 208
 environmental toxicology 208
 environmental toxicology test 240
 Environment-friendly chemicals 4
 enzyme inhibitors 7

F

field trial bioassay 207
 field trial for biological effect 208
 fluorescence spectroscopy 173
 fluorinated aromatic 8
 fluorinated cinnamaldehyde 10
 2-fluorobenzaldehyde 219
 3-fluorobenzaldehyde 42
 5-fluorouracil 3
 formulation optimization 211
 Formulation of Dufulin 208
 fungicide 20
 furametpyr 184
 furan 20
Fusarium oxysporum 49, 198

G

gene expression 177
 gene up-regulation 177
Gibberella zeae 21
Gibberella Zeae 198
 Gram-negative bacteria 45
 GU188 207, 280

H

half-leaf method test 8
 half-life times 236
 health toxicity evaluation 207
 heat storage stability 212
 herbicide 20
 herbicides 7, 36
 Hill inhibitory activity 112

host defense mechanisms 2
 host resistance 295
 host RNA synthesis machinery 4
 Hydrolysis 259, 297
 hymexazol 22
 hypolipidemic 192

I

immunotropic activities 192
 inactivation effects 18
 inactivation efficacy 19
 indoor bioassays 280
 inhibition rates 18
 insecticides 7
 intramolecular hydrogen bond 61
 ionic liquids 66

J

Jingtuling 207, 295

K

Kabachnik-Fields reaction 31

M

Mannich addition 66
 Mannich-type method 58
 marine biowastes 207
 microwave irradiation 30, 37
 mode of action 207
 montmorillonite clay 37
 MTT method 43
mycelial chitinase activity 47
mycelial chitosan content 46
mycelial glucose content 46
mycelial soluble protein content 47

N

neat lotion LS 213
 new compounds 20
Nicotiana tabacum K₃₂₆ 257
Nicotiana tabacum L 11
 Ningnanmycin 18
 nonionic and anionic emulsifier 211

non-ionic emulsifier 700[#] 210
 non-nucleoside inhibitors (NNI) of 161
 non-target organisms 240
 normal plant metabolism 2
 nucleic acid 1

O

Oligosaccharins 295, 299
 Organic solvents 8
 organocatalysts 8
 outdoor bioassays 280
 Oxime Ester 169

P

PAL activity 125
 pathogenesis-related proteins 254
 pathogenic fungi 21
 penthiopyrad 184
 peroxidase (POD) 242
 petroleum ether 21
 L-phenylalanine 243
 phenylalanine ammonia-lyase (PAL) 242
 (*R*)-1-phenylethylamine 114
 (*S*)-1-phenylethylamine 114
 photodegradation rate constants 269, 270
 Photolysis 260
 photosynthetic electron flow 107
 photosynthetic electron transport 107
 photosynthetic electron transportation 95
 physical data 20
Phytophthora infestans 49
 plant antiviral chemotherapy 2
 plant growth regulators 36
 plant immune system 259
 plant systemic acquired resistance
 (SAR) 259
 plant viral diseases 3
 plant virucide 20
 plant virus disease 2
 plastid-lipid-associated protein 242
 POD activity 127
 polysaccharide CSPs 72
 potato dextrose agar 21

PR-1a 200
 PR-1a gene expression 254
 PR-5 gene 200
 PR-gene expression 170
 product chemistry 208
 protein subunits 1
 protein tyrosine kinase inhibitors 192
 PR-5 proteins 242
 pure enantiomers 72
 pyraclostrobin 184
 Pyrazolaldoxime esters 169
 pyrazolaldoxime ether 185
 Pyrazole Derivatives 169
 pyrazophos 184
 pyrrole 20
 pyrrole 7

Q

Qualitative analysis 275
 Quantitative analysis 275
 quinazoline scaffolds 4
 4(3*H*)-Quinazolinones 192

R

racemic α -aminophosphonates 74
 real-time PCR analysis 177
 red-shift-phenomenon 180
 relative quantification PCR 177
 relative quantification real-time PCR
 analysis 200
 residue 208
 residue analysis 207
 resolution factor 77
 retention factors 77
 reverse transcriptase (RT) 161
 ribavirin 2
 RNA synthesis related gene 293
 RNA viruses 1

S

salicylic-acid biosynthesis 244
 salicylic acid signaling pathway 4
 SA signaling pathway 183, 242

Schiff's bases 15
Sclerotinia sclerotiorum 21
 self-replication 4
 semi-preparative preparations 72
 semi-quantitative PCR 200
 semi-quantity PCR 123
 separation factor 77
 signal transduction pathway 259
 signal transduction pathways 182
 SOD activity 127
 solvent-free conditions 31
 specific proteins 1
 spectroscopic data 24
 stretching absorption band 61
 subunits of the coat protein 1
 superoxide dismutase (SOD) 242
 30% suspension concentrate (SC) 209
 synthesized chiral naphthyl thiourea
 (CNT) 159
 synthetic conditions 219
 synthetic route optimization 280
 systematically acquired resistance 4
 systemic behaviors 207

T

the ingredients of the formulation 215
 the mobile phase 77
 the mode of action (MOA) 241
 the site-directed mutagenesis
 technology 183
 the stationary phase 77
 1,3,4-thiadiazole 7
 thiophene 7, 20
 2-thiouracil 3
 Thioureas 153
 TMV CP 170
 TMV particles 249
 TMV RNA 170
 Tobacco Mosaic Virus (TMV) 29
 Tobacco protein samples 246
p-toluenesulfonic acid 20, 219
 toxicity evaluation 280
 toxicology 208

4-trifluorobenzaldehyde 42
4-trifluoromethylaniline 41
3,4,5-trimethoxybenzyl groups 31

U

ultrasonic irradiation 54
ultraviolet spectrophotometer 11

V

Valsa mali 198
viral RNA 1
viral RNA synthesis 3
viral RNA-synthesizing enzyme 1
Virus A 178
virus genome 1
virus infection 2

virus multiplication 2
viscosity modifier 211

W

30% wettable powder (WP) 209
wetting dispersant dosage 211
without nucleic acid repair
mechanisms 3

X

X-ray Crystallography 27
X-ray intensity data 26

Z

zucchini mosaic virus 1
