

# Indices

The page numbers are given by the Chapter numbers in **bold** type, followed by the page number, as in: **10-17**. Page numbers in *italics* refer to figures. The Preface is indexed with the letters 'Pref' without the (roman) page numbers. The subjects prominently referred to in specific Chapters are listed by the Chapter and its number. Specific page references point in this case to major items only. The 'Index of Personal Names' starts below; for the 'Subject Index,' see the pages from 12-11-37.

## Ranges of the page numbers for the Chapters:

## Index of Personal Names

The index entries for the names of the immediate family (Vati, Mutti, and the author, Bernhard, as well as Heidel, Caryn, and Brent) are limited to major events and references to figures (*italics*). The full identity of relatives can be recognized by references to the genealogy on pages **11-2-4**. The last names of friends listed under their first names can be identified on the text page of the first entry.
