## A

Abberation function, 5  
Abbe, Ernst Karl, 2  
Abiogenic MMC formation, 128  
Accumulations, 71  
Acquisition of spectra, 62  
Acrylic latex, 252  
Acrylics, 251  
Active compound, 152  
Active drug delivery systems, 139  
Active pharmaceutical ingredients (API), 166  
Active therapeutic coatings, 210  
Adhesive, 191  
Adhesive potential, 238  
Aerogel, 118  
Aerosol, 189  
Ageing, 194  
Agglomerative clustering, 79  
Albumin, 146  
Aliphatic compound, 115  
Alkyd, 251, 252  
Alkyl chain length, 212  
Alpha-PbO<sub>2</sub>-structured TiO<sub>2</sub>, 125  
Alteration history, 119  
Alteration history of minerals, 112  
Alteration veins, 113  
American Food and Drug Administration (FDA), 157, 196  
Amorphous, 215  
Amorphous carbon, 254  
Amorphous silica, 225, 234  
Amphiphilic molecules, 153  
Ancient meteoritic materials, 124  
Anisotropic units, 275  
Antenna, 35  
Antibodies, 138  
Anti-oxidants, 254  
Anti-Stokes scattering, 24  
Antisymmetric stretch vibration, 25

Aperture angle, 6, 9, 10  
API, 166  
API particles, 184  
Apoptosis, 158  
Aqueous alteration products, 120  
Asymmetric stretching C-C vibration, 274  
Atomic Force Microscopy (AFM), 172, 237, 249  
Atomic replacement, 124  
Attenuated total reflectance (ATR) objectives, 175  
Augmented classical least squares method (aCLS), 212  
Australasian tektite field, 125  
Autofluorescence, 170  
Average spectra, 84

## B

Backbone bond, 275  
Back gate voltage, 105  
Background, 71  
Background subtraction, 61, 70, 86  
Background suppression, 46  
Back scattered electrons (BSE), 171  
Backscattering configuration, 261, 266  
Bacteria differentiation, 33  
Band structure, 102  
Basal (0001) twinning system, 271, 272  
Basis analysis, 57  
Basis spectra, 82  
Benzene ring modes, 246  
Biaxially oriented polypropylene, 242  
Biaxial stress, 263, 265  
Binders, 251  
Bioavailability, 178  
Biocompatibility, 203  
Biodegradable  
matrix, 185  
polymer, 220
