

Index

A

Affinity levels, 189
Alkanedithiols, 146
Alkanethiols, 49
Alligator clips, 42, 52, 124
Aluminum, 43
Amplifiers, unimolecular, 77
Anthracene, 255
Ashwell rectifiers, 71
Au–alkanedithiol–Au, 145, 200
Aviram–Ratner rectifier, 53
Aviram–Ratner theory, 39
Azobenzene (AZO), 95, 106

B

Benzene, 225
Benzene dithiol, 49, 75, 129
 conductance, 18
Benzoquinone, 57
Bicyclooctane bridge, 58
Biphenyl junctions, torsion-angle
 dependence, 152
Biphenyldinitrile (BPDN), 152
Biphenyldithiols (BPDT), 152
Biphenyls, nitrile-terminated, 156
 thiol-terminated, 154
Bipolar junction transistor (BJT), 74
4,4'-Bipyridine, 158
Bis-phenylethynyl-benzene, 153
Born–Oppenheimer separation, 2
Break junctions, 5, 47, 121, 127
Broken symmetry, 27

C

C₁₆H₃₃- γ Q-3CNQ, 58
Capacitors, 73

Cascade devices, 29
Charge transfer (CT), 87
 mechanisms, 89
Charge transport, 85, 121
Chemisorption, 41
Chirality, 27
Coherence, 12
Cold gold evaporation, 39
Conductance, single-molecule, 147
Conduction, 1
Conductive-probe atomic force microscope
 (CP-AFM), 45, 124
Coulomb blockade, 73
 regime, 4
Crossed-wire junctions, 46, 88
Crosstalk, 28
Cu–porphyrin, 232

D

Decanedithiol (DDT), 148
Decoherence, 12
Design rule (DR), 40
Diarylethenes (DAE), 95, 104
Dimethylaminophenylazafullerene, 67
Dimethylfluorene polymers, 51
Dinitroanthracene, 254
Dinitrocyclobutadiene, 253
Donor/bridge/acceptor molecules, 2
Donor-acceptor molecules, 70

E

E-GaIn, 99
EHMO–NESQC technique, 242
Elastic electron tunneling spectroscopy,
 189, 202

Elastic tunneling, 193
 Electrochemical double layer (EDL), 132
 Electrochemical molecular junctions, 85
 Electrolyte gating, 121, 132, 165
 Electromigrated break junctions (EMBJs), 47
 Electron-acceptor groups, 39
 Electron-donor groups, 39
 Electron hopping, 85
 Electron mass, 9
 Electron scattering quantum chemistry (ESQC), 221
 Electron transfer, 1, 87
 Electron transport, 1
 Electron tunnelling, 85, 191
 Electronic junction transport, 1

F

Field-effect transistors (FETs), 74, 236
 Fullerene, 57, 68, 124, 133, 153
 bis(triphenylamine)-substitute, 67

G

Gate effect, electrochemical, 163
 Gold, 42, 134
 Gold atoms deposition, 97
 Gold nanoparticles, 46
 Gold–alkanedithiol–gold junctions, 147
 Graphene, 258
 Green's function for electrons, 13

H

Hamiltonian models, 9
 Hexanedithiol, 49, 148
 HOMO/LUMO, 40
 Hopping, 12, 91, 124
 Hubbard Hamiltonian, 10
 Hybrid molecular devices, 229

I

Inelastic electron tunneling spectroscopy (IETS), 20, 68, 189, 195
 Interconnects, organic, 77
 Interference, 17, 28, 225, 230, 241
 Interlayers based junctions (IJs), 98
 Intervalence transfer (IVT), 55
 Intramolecular charge transfer (ICT), 55
 Inverse photoemission spectroscopy (IPS), 202
 Ionization levels, 189

J

Junction transport, 1

K

Kirchhoff current superposition rule, 243
 Kirchhoff laws, 217, 237, 249
 intramolecular, 217
 Kohn–Sham density functional theory, 10
 Kondo resonance regime, 4

L

Landauer limit transport, 4
 Landauer/Imry/Buttiker elastic scattering model, 11, 13
 Langmuir–Blodgett (LB) films, 39, 87
 monolayer, 39, 52
 Langmuir–Schaefer (LS) transfer method, 41
 Large-area junctions (LAJs), 88, 96
 Lift-off, float-on (LOFO), 97
 Liquid metal based junctions (LMJs), 98
 Local density of states (LDOS), 126
 Logic circuit, single molecule, 217, 242
 Logic gates, 217, 242

M

Magnesium, 43
 Mechanically-controlled break junction (MCBJ), 47, 128
 Metal-active molecular layer-metal (M-A-M), 191
 Metal-insulator-active molecular layer-metal (M-I-A-M), 191
 Metal-insulator-metal (M-I-M) tunnel diode, 192
 Metal-molecule-metal junctions, 52, 85, 87, 123, 125
 Metal nanocluster, 121
 Metal nanoparticles (NPs), 173
 Molecular electronics, 1, 85, 217
 Molecular interferometer-like devices, 235
 Molecular junctions, 121
 active, 94
 electrochemical, 96
 non-active, 92
 photoactive, 95
 Molecular logic gates, 217
 Molecular rectifiers, 234
 Molecular resistors, 48
 Molecular switches, 231
 Molecular transport junction, 1

- Molecular wires, 49
Monolayer, self-assembled, 39
Monolayer-protected nanoclusters (MPC), 173
Multilayer rectifier, 60
Multiwire multichannel conduction, 221
- N**
Nanocapacitors, 73
Nanopores-based junctions (NPIs), 88
Nano-transfer printing (nTP), 97
Naphthalene, 227
 molecular wire, 23
Negative differential resistance (NDR), 48, 94
 devices, 74, 229, 234
Nickel(II) octaethylporphyrin (NiOEP), 202
Nickel(II) tetraphenylporphyrin (NiTPP), 207
Nitrogen connectors, 52
Nonanedithiol (NDT) junctions, 147, 150
- O**
Octanedithiol, 49, 146, 148
Ohmic contact, 43
Oligophenylene ethynylene (OPE)
 wire/junction, 51, 124
Optoelectronics, 27
Orbital mediated tunneling spectroscopy (OMTS), 39, 189, 202, 209
- P**
Palladium, 43
Pariser–Parr–Pople model, 10
Pentanedithiol (PDT), 148
Perylenebisimides (PBI), 51, 165
Perylene-tetracarboxylic acid bisimides (PBI), 57, 167
Photoactive molecular junctions, 85
Physisorption, 41
Platinum, 43
Pockels–Langmuir (PL) monolayer, 41
Polymer-assisted lift-off (PALO), 98
Pyrene, 57
- Q**
Quantum cellular automata, 29
Quantum conductance, 129, 134, 145
Quantum-dot cellular automata (QCA), 29
Quantum dots, 4, 11, 27, 73, 207
- Quantum Hamiltonian computing (QHC), 217, 250
Quantum monomolecular devices, 249
Quasi-horizontal transfer method, 41
- R**
Rectification ratio, 58
Rectifiers, 39, 234
 asymmetric, 52
 molecular, 58
Redox-mediated tunneling current, 171
Resistors, 48
- S**
Scanning probe microscopy (SPM), 124, 126
Scanning tunneling microscopy (STM), 39, 121, 124
 break junction, 47
Scanning tunneling spectroscopy, 121, 124
Schottky barrier, 39, 42, 52
Schottky–Mott theory, 39, 43
Self-assembled film, 39
Self-assembled monolayers (SAMs), 5, 39, 42, 88, 190
Semiconductor, 43
Single-electron transistor (SET), 75
Single molecule electronic circuits, 217
Single-molecule conductance, 147
Single-molecule junction, conductance, 161
 elastic tunneling, 209
Spintronics, 26
Stilbene, 258
Surface-diffusion-mediated deposition (SDMD), 97
- T**
TCNQ, 43, 57, 58
Terthiophene, 51
Thioesters, 42
Time-independent Schrödinger equation (TISE), 221
TMPD, 57
Transistors, 25, 166, 218, 250
 C₆₀, 236
 single-electron (SET), 75
TTF, 57
Tunnel diode, 192
Tunneling, 12, 91, 189, 191
 current, 130, 146, 171, 177, 194, 231, 253

U

Ultra-violet photoelectron spectroscopy
(UPS), 202

Unimolecular amplifier, 39

Unimolecular electronic devices, 39

V

Vertical transfer method
(LangmuirBlodgett), 41

W

Wheatstone bridge, 237, 241, 247

X

Xylenedithiol, 49
