

Index

- Basic Sensitivity Theorem, 11
- Binary search tree, 61
- Case studies
 - cart and spring system control, 148, 164
 - combustion plant control, 173
 - compressor surge control, 77, 93
 - continuous stirred tank reactor control, 120, 131
 - electropneumatic clutch actuator control, 97, 116
 - pH maintaining system control, 196
 - time-optimal diver decompression, 108
- Convexity, 76
- Differentiation
 - automatic, 61
 - finite difference method, 60
 - symbolic, 61
- Direct collocation, 46
- Direct multiple shooting, 47
- Direct single shooting, 45, 78
- Discretization, 41
- Distributed NMPC, 212
 - on-line optimization based, 217
 - semi-explicit, 218
- Dynamic dual decomposition, 212
- Explicit dual-mode control, 192
- Explicit min-max NMPC
 - closed-loop, 134
 - open-loop, 128
- Explicit output-feedback NMPC based on neural network models, 191
- Explicit quantized NMPC, 114
- Explicit state-feedback NMPC, 88, 112, 130, 138, 163, 171
- Explicit stochastic NMPC
 - based on Gaussian process models, 169
 - based on parametric probabilistic models, 158
- Hessian matrix, 60
- Interconnected nonlinear systems, 210
- Jacobian matrix, 60
- Karush-Kuhn-Tucker (KKT) optimality conditions, 3, 25
- Linear parameter varying model, 55
- Multi-parametric
 - nonlinear integer programming (mp-NIP), 114
 - nonlinear programming (mp-NLP), 1, 12, 142
 - convex, 12, 14, 15
 - non-convex, 17, 18, 23
 - quadratic programming (mp-QP), 24, 27, 73
- NMPC
 - decentralized, 57
 - distributed, 57, 212
 - feasibility, 48
 - initialization, 59
 - min-max, 54, 128, 134

- output feedback, 56, 188
- problem formulation, 41
- robustness, 54, 129, 136, 161, 171, 192
- stability, 50, 52, 90, 144
- stochastic, 55, 158, 169
- tuning, 49
- Nonlinear programming methods, 4
 - direct search, 7
 - DIRECT method, 8
 - method of Box, 8
 - Newton-type, 4
 - interior point, 5
 - sequential quadratic programming, 4
 - penalty function, 6
- Nonlinear systems with bounded uncertainties, 129, 134
- Nonlinear systems with quantized inputs, 112
- Numerical linear algebra, 58
- Observers, 56
- Parameter space partitioning
 - orthogonal ($k - d$ tree), 14
 - polyhedral, 26
- Parameterization, 41
- Piecewise constant solution, 114
- Piecewise linear (PWL) solution
 - approximate, 13, 20, 192
 - exact, 27
- Piecewise linear system, 56
- Piecewise nonlinear solution, 140, 163
- Reference tracking NMPC, 89, 113, 171
- Regulation NMPC, 88, 112, 190, 211
- Slack variables, 53
- Stochastic nonlinear systems, 159, 171
