

List of Tables, Figures, and Exhibits

TABLES

Tab. A1: Developments in Real Output and Inflation (% changes, annual averages)	9
Tab. A2: Income Disparities and Share of the Service Industry in Selected Countries	9
Tab. A3: Sectoral Developments in Eastern Europe, the U.S.S.R., and Industrial Countries, 1961-88 (in %)	10
Tab. A4: Imports of OECD Countries by Goods Categories from CMEA Countries and Asian NICs (Hong Kong, Malaysia, Singapore, Korea,R., Taiwan), 1965 and 1986	11
Tab. A5: Growth of Labor, Total Factor Productivity, and the Capital Stock in the U.S.S.R. and Selected Countries, 1951-84, (annual percentage changes)	12
Tab. A6: Selected Macroeconomic Indicators, 1951-88 (Percentage changes at annual rates, unless otherwise noted)	13
Tab. A7: Innovations of Socialist Countries as Measured by Patent Applications 1987/88 (Inpadoc Statistics, 1990)	18
Tab. A8: Investment GNP Ratios in Eastern Europe and West Germany	38
Tab. B1: GNP Growth Rates and Unemployment Rates in Eastern Europe Real gross national product, figures are in percent p.a.	48
Tab. B2: Budgetary Subsidies* Relative to GDP in Eastern Europe	61
Tab. B3: Bilateral CMEA Trade Flows, 1989 (percent) (share in total exports of CMEA5 group and the USSR; growth rates of exports and [imports] of trade with the USSR/CMEA5, 1990)	81
Tab. B4: Technology Intensity of Exports and Imports of Engineering-Goods, 1987 (percentage shares and percent, respectively)	82
Tab. B5: Selected Macro Data for Eastern Europe in the late 1980s	89
Tab. C1: Key Figures for Eastern Europe, Yugoslavia and the USSR, 1990	99
Tab. C2: Selected Macroeconomic Data for Eastern Europe (in %)	99
Tab. D1: Openness and Trade Patterns of the CMEA Countries in 1988/89 (export-GNP ratio X/Y and country shares for imports/exports in percent)	152
Tab. D2: Foreign Indebtedness of Eastern Europe	156
Tab. D3: Ratio of Net Debt Service to Exports for Selected East European Economies	156
Tab. D4: Eastern European Convertible Currency Trade	174
Tab. D5: East European Exports to Western Europe	194

Tab. D6: Imports and Exports from the USSR and Central Europe in 1989 (bill. US \$)	194
Tab. D7: Income Disparities in Europe and Service Sector Share in GNP	196
Tab. D8: Trade Between the EC and Eastern Europe	197
Tab. D9: Exports to European CMEA Partners as a Percentage of Total Exports*	210
Tab. E1: European Wars in Modern History	209
Tab. E2: International Wars and Civil Wars 1900-89	214
Tab. E3: Effects of Demobilization and Disarmament Options of the U.S.	219
Tab. E4: German Trade Orientations in 1913 and 1989* (shares for merchandise trade with selected countries)	233
Tab. E5: Military Expenditures in Federal Spending, Government Expenditure Ratios and Military Ratios in Selected Countries	237

FIGURES

Fig. A1: Cost-efficiency, Allocation and Prices	23
Fig. A2: Interdependency Between the Official Economy and the Shadow Economy	28
Fig. B1: Transaction Cost Problems in a Planned Economy	63
Fig. B2: Relative Price Adjustment in a MUNDELL Model with Barro-Grossman Effect	72
Fig. C1: Diffusion and Process Innovation in a Privatized Industry (p=product price, k' = marginal costs)	111
Fig. C2: Effective Protection under Tariffs (or with Domestic Monopoly) in the Supplier Industry	114
Fig. C3: Consumer Surplus and Producer Surplus	114
Fig. C4: International Income Distribution with Capital Flows	116
Fig. C5: Tradables and Nontradables Sector in a Model with International Capital Flows	139
Fig. D1: Static Economies of Scale and Liberalization	164
Fig. D2: Imports and Foreign Debt	168
Fig. D3: Import Quota vs. Tariffs in a Competitive Export Market	176
Fig. D4: Monopoly Effect of Import Quota	177
Fig. D5: Monopoly and Export Liberalization	179
Fig. D6: Effects of Capital Flow Liberalization	187
Fig. D7: Welfare Effects with Foreign Direct Investments in Industry	190
Fig. D8: Welfare Effects of Tariffs in the Presence of FDI	191
Fig. D9: Trade Diversion as a Consequence of West European Economic Integration	199
Fig. D10a): Supply-augmented Macro Model	210
Fig. D10b): Money Demand Function	210

EXHIBITS

Exhibit B1: Dimensions of the Transformation Problem	58
Exhibit C1: Forms of Privatization	106
Exhibit C2: Links between Privatization and Foreign Direct Investment in Systemic Transformation	135
Exhibit D1: Convertibility	159
Exhibit E1: Cohesion by a) External Threat in a Hegemonic Regime vs. Cohesion from b) Positive Economic Interdependence	228
Exhibit E2: Effects of Free Trade in the Short Run (the Long Run)	231

Multinationals in the New Europe and Global Trade

1992. XV, 281 pp. 24 figs. 75 tabs. ISBN 3-540-54634-0

The emergence of an integrated European market will provide new opportunities and new challenges to firms operating in the international arena. This volume addresses some timely issues concerning the „new“ European market, with a focus on the multinational corporation and foreign direct investment.

The topics addressed in this volume include the multinational corporation and global trade, exchange rate passthrough and the international pattern of production, the macroeconomic determinants of foreign direct investment, the interrelationship between technology and multinationals, foreign direct investment in Eastern Europe, foreign direct investment in Germany, European integration and multinational activity in the European Community, and the behavior of Japanese multinationals in Europe and in the United States.

P. J. J. Welfens, University of Münster

Economic Aspects of German Unification

National and International Perspectives

1992. XI, 402 pp. 19 figs. 67 tabs. ISBN 3-540-55006-2

German unification is changing central Europe, the EC and international economic and political relations. The merger of the two Germanies raises many new questions for Germany itself, Europe, and the whole international community. Will the enlarged Germany become a new economic giant in Europe and can the FRG maintain stability and prosperity? What macroeconomic and structural problems are faced by the new Germany and what are the effects for trade, investment, and growth in Germany's partner countries? Will East Germany catch up with the West and can this process serve as a model for Eastern Europe? What are the views of Poland and the USSR, and what implications arise for Western Europe and the United States? Finally, how is the triangular relationship between the USA, the EC, and Japan affected, and how does this affect the United States' ability to organize economic cooperation with Japan, Germany, and other leading economies?

P. J. J. Welfens, University of Duisburg and The Johns Hopkins University, Washington, D.C. (Ed.)

European Monetary Integration

From German Dominance to an EC Central Bank?

1991. XII, 260 pp. 8 figs. 7 tabs. ISBN 3-540-53790-2

Monetary integration in the EC will continue with the desired hardening of the European Monetary System that is expected to lead to an EC central bank in the 1990s. Why has the European Monetary System been so successful and what role has the Deutsche Bundesbank played in monetary policy and the EMS in Europe?

This book gives an assessment of the EMS developments, analyzes the impact of German monetary unification and shows how financial market liberalization as well as the EC 1992 project affect the process of Economic and Monetary Union.

W. Eucken

The Foundations of Economics

1992. VIII, 358 pp. ISBN 3-540-55189-1

Reprint of the 1st English edition published 1950 by William Hodge and Co. Ltd., London

This is the classic work of German economic literature in the past 60 years. The book was of great importance for the economic order that developed in the Federal Republic of Germany after the Second World War and made Germany the leading economic power in Europe. Walter Eucken places great emphasis on economic reality in his work. Taking everyday observations as his starting point, he attempts to infer complex connections. He provides the reader not only with a comprehensive criticism of classical economics, but also in particular with an analysis of economic systems, economic order, and the course of economic events.

As a consequence of the dramatic changes that have taken place in Eastern Europe, many states now find themselves facing problems similar to those faced by West Germany in its earliest days. Eucken's considerations can be of assistance in the search for the correct concepts.

Money, Trade and Competition

Essays in Memory of Egon Sohmen

A Publication of the Egon-Sohmen-Foundation

1992. X, 304 pp. 19 figs. 2 tabs. ISBN 3-540-55125-5

This volume examines key aspects of international economic theory and policy. It presents papers from well-known scholars discussing the following topics: historical evidence on free banking, the question whether speculation in foreign exchange markets is stabilizing or destabilizing, the insulation properties of flexible exchange rates, the economics of the Louvre Accord, some basic issues of the German Monetary Union, the merits of financial liberalization in developing countries, the integration of fiscal policy into the theory of international trade, theoretical aspects of international factor flows, the relation between trade restrictions and exchange rates, the recent shift of the United States' trade policy toward aggressive unilateralism and the theory and practice of commercial policies since 1945, basic concepts of welfare economics while the other reassesses the vital link between competition and economic growth.

H. Giersch, Kiel Institute of World Economics (Ed.)

Towards a Market Economy in Central and Eastern Europe

1991. IX, 169 pp. 5 figs. 9 tabs. ISBN 3-540-53922-0

The papers in this volume deal with major aspects of the transition in the East, most notably with the causes of the collapse of the old system, the lessons to be drawn from West Germany's successful 1948 reforms and the respective roles and the appropriate timing and sequencing of privatization, macroeconomic stabilization, deregulation and external liberalization.
