

Subject Index

- A. aerogenes 186, 188
- abdominal cramps 75
- abnormal jejunal fluid transport 89
- acidic polysaccharide capsules 199
- acid production 256
- acute inflammatory response 74
- adhesins 119
- adhesins or colonization factors 119
- ADP-ribosylating elongation factor 2 55
- ADP ribosylation 98
- (ADP) ribosyl-transferase 235
- ADP-ribosyltransferase activity 62
- Aerobacter aerogenes 180, 189
- aerobactin 180, 186
- Aeromonas hydrophyla 73
- agarose gel electrophoretic analysis 88
- α -hemolysin 226
- alkaline and neutral protease 57
- alkaline phosphatase 61
- alternative pathway 198
- α -melanocyte stimulating hormone (α -MSH) 246
- amplification 105, 107, 108
- α -MSH receptor 246
- animal models 156
- antibodies 200
- antigen-antibody complexes 197
- antigen B 266
- antigen I/II 266
- antigenic determinants 63, 127
- antigenic variation 18
- antiserum 202
- apolipoprotein A1 236
- aspartic acid semialdehyde dehydrogenase 264
- Aspergillus niger 180
- assembly precursors 131
- attachment 90
- attP 236

- Bacillary dysentery 77
- Bacillus megaterium 180
- Bacillus subtilis 180
- bacteremia 201, 211
- bactericidal 199
- bactericidal action of normal human serum 41

- bacteriocin 269
- bacteriophage P1 35
- bacteriostatic 199
- biogenesis of fimbriae 129
- bloody and mucus rectal discharge 75
- B. nodosus 26

- Ca²⁺ dependence 33
- Ca²⁺ independence 33
- cAMP levels 152
- Campylobacter 73
- capsulated bacteria 199
- capsule 201
- capsule biosynthesis genes 204
- caries 253
- catabolite repression 173
- C3b 200
- cell envelopes 197, 213
- cell surface 203
- cell surface component 211
- cereolysin 224
- CFA/I fimbria 121
- CFA/II 121
- cholera 97
- cholera toxin 97, 98
- classical pathway 197
- cloacin 187
- cloning 140, 143, 144, 205, 221
- Colicin V plasmid 186
- Coli-surface-associated antigens 121
- colon 90
- colonial morphology variants 78
- colonic mucosa 74
- colonization factors 119
- colony hybridization 206
- common intestinal disease mechanisms 72
- complement in serum 197
- complement system 197
- conjugation 143, 260
- conjugative plasmids 208
- conservation of polynucleotide sequence 206
- conserved regions 19
- ColV plasmids 185, 208, 212
- corynebacteriophage β 235

- Corynebacterium diphtheriae* 235
 cos 236
 cosmid cloning technique 144
 cosmid gene banks 202
 cosmids and lambda substitution vectors 221
 ctxA 102
 ctxAB 104
 ctxB 102
 ctx genetic element 106, 107
 ctx tandem duplications 107
 cyclic AMP 173
 cystic fibrosis 54
 cytolysins 73, 140
 cytoskeletal collapse 89
 cytotoxic 156
 cytotoxicity 76, 82
- deletion and transposon mutagenesis 202, 203
 dextranase 255
 diagnostic biochemistry 76
 diarrheal disease 119
 diphtheria toxin 228, 235
 diphtheria toxin-related polypeptide hormone
 gene fusions 244
 diphtheria tox operator 242
 diphtheria tox promoter 239
 disruption of microvilli 90
 disruption of phagosomal membrane 90
 dissemination 90
 DNA hybridization probes 92
 duplication 105
 dyad symmetry 122, 124
 dysenteric *Escherichia coli* 71, 75, 88
 dysentery 72
- elastase 58
 endocytic uptake 89, 91
 endocytic vacuole 74
 enteric infections 211
Enterobacter cloacae 187, 189
 enterobactin 180, 181
 enterochelin 180
 enteropathogenic 73
 enteropathogenic and exenterotoxigenic *E. coli*
 141
 enterotoxigenic *E. coli* 119
 “enterotoxigenic” mechanism 72
 enterotoxicity 82
 epithelial cells 78
Escherichia coli 139, 140, 179–189, 191, 192,
 199
E. coli strain J96 166
 excretion of exotoxin A 56
 exoenzyme S 62
 exopolysaccharide 64
 exotoxin A 55
 exposed epitopes 213
- expression sites 15
 extracellular alpha-galactosidase 83
 extrachromosomal genetic elements 206
 extraintestinal infections 141
 eye infection 59
- Fab fragments 210
 ferric aerobactin-cloacin receptor 187
 ferrichrome 180, 181
 Fe³-uptake systems 83
 fimbriae 119
 F incompatibility group 210
 FI incompatibility group plasmids inhibited
 virulence in the Sereny assay 86
 form I O-antigen 81
 fructosyltransferase 259
 functions of K 88ab polypeptides 130
 functions of K 99 polypeptides 134
- Gal-Gal*-binding pili 164
 gene conversion 19
 gene dosage 209
 gene rearrangement 13
 genetic determinants of virulence 77
 GlpK 79
 glucan-binding protein 259
 glucosyltransferase 255
 glycolipid 60
 gram-negative bacteria 197
 group B streptococci 199
- Haemophilus influenzae* 199
 heat-labile enterotoxin (LT) 101
 HeLa cell monolayer plaque assay 76
 hemagglutination 163
 heme 192
 hemolysins 60, 73, 140
 hemolysis 139, 140
 hemolytic *Escherichia coli* 141
 high- and low-affinity iron assimilation 183
H. influenzae b capsular polysaccharide 206
 host ingestion 89
 htx 111, 112
 hybridization 143
 hybrid plasmids 202
 hybrid toxins 245
 hypervariable regions 19
- immune deficiency 65
 immune suppression 54
 immunoblotting 210
 immunodiffusion 203
 immunoelectrophoretic analyses 203
 immunogenicity 200
 immunological assays 76
 ingestion 90
 intestinal colonization 113

- intoxication 72
 intracellular multiplication 90
 intracellular polysaccharides 259
 intragenic diversity 20
 invasion 90
 invasive microorganisms 73, 119
 invasive pathogens 211
 in vivo pilus – antigenic variation 19
 iron acquisition 91
 iron assimilation 179
 iron regulation 56
 iron-sequestering systems 83
 IS elements 148
 isogenic derivatives 15
 isogenic pairs of strains 213
 iss gene 208, 212
- K1 capsule 205
 KcpA locus 82
 keratoconjunctivitis 82
 K 88 fimbriae 123
 K 99 fimbriae 121
 kidney cells 156
 Klebsiella 210
 K 1 polysaccharide 200
 K protein 204
 K 5 206
 K 7 205
 K 92 206
 K 100 206
- lactate dehydrogenase 259
 lactic acid bacteria 180
 lamina propria 74
 Legionella pneumophila 182
 leukocidin 60
 leucocytes 156
 life-threatening pathogen 53
 ligated rabbit ileal loop model 76
 lipid A 64
 lipid bilayers 197
 lipopolysaccharide 42, 64, 206
 lipoprotein 208
 locus lasA1 58
 low infectious dose 90
 LPS 79
 LPS biosynthesis 89
 ltx 111
 lytic complex 197
- macrophages 198
 maxicells 152
 120-Mdal plasmid 81, 85
 members of inc gp FI 85
 membrane attack unit 197
 meningitis 199, 201
 meningococcus 199
- meningococcus C capsular polysaccharide 206
 microvilli 74
 microvillus disruption 89
 min 44 group antigen 80
 minicell mutants 88
 minicell-producing strain 39
 minicells 152, 263
 M. nonliquefaciens 26
 model for the biogenesis of fimbria 134
 modifications of fimbrial subunits 132
 molecular cloning 220
 monkeys 75
 monoclonal antibody 209, 269
 morphological types of fimbriae 125
 mouse infection model 201, 210
 mucin 74, 83
 mucinases 83
 mucoid 64
 mucosal cell replacement system 75
 multicistronic gene clusters 166
 mutant isolation 257
- N-acetyl neuraminic acid 200
 neaB 81
 neonatal meningitis 201
 N. meningitidis 26, 182
 neurotoxicity 82
 nonconjugative plasmids 260
 nonproductive binding of complement components 214
- O-acetylation 200
 O-antigen lipopolysaccharides 199
 opaque colonia variants 78
 operon fusion 172
 O-polysaccharide antigen 79
 opsonin 197
 opsonization 200
 osmotic shock 203
 outer membrane polypeptides 88
 outer membrane proteins 37, 199, 204
 outer membranes 204
- P. aeruginosa 26
 Pap (pili associated with pyelonephritis) pili 164
 pap genes 167
 papA 167
 papB 173
 papC 171
 papD 171
 papF 168
 papG 168
 papH 171
 passage through mucin 90
 pathogenesis 199
 pathogenesis factor 210

282 Subject Index

- pathogenicity 29, 154, 210
pathogens 199
pathophysiology 74
P blood group antigens 164
penetration ability in HeLa or Henle cell
 monolayers 76
periplasmic space 203
Peyer's patches 770
P-fimbriae 164
phagocytes 197
phagocytosis 197
phase variation 14, 174
phosphate-regulated proteins 61
phospholipase C 60
phospholipid 202
physical map 146
pili 62, 119
pili adhesins 165
pilin gene repressor 17
pilin-like protein 170
pilin mRNA 18
pilus domains 21
pilus-mediated attachment 63
plaque formation 254
plasmid-borne virulence properties 83
plasmid-determinants of pathogenicity 30
plasmid-determined invasiveness 85
plasmid involvement in O-antigen 83
plasmid maintenance functions 37
plasmids 29, 140, 141, 207
plasmid shuttle vectors 257
polymerisation 207
polymorphonuclear leukocytes 47, 198
polynucleotide sequence homology 205
polysaccharide 202
polysaccharide capsule 199
poor immunogenicity 213
porin 202
positive control 108
potential bacterial virulence properties 89
PII phase variation 18
prevention of dysentery 92
primary structure of CFA/I 128
 – papA 128
 – K99 type I 128
primary structure of fimbrial subunits 125, 127
primer extension sequencing 18
probes 206
promoter activity 149
promoter sequences 17
protein fusion 149
proteolytic enzymes 57
Pseudomonas aeruginosa 53, 179
Pseudomonas sp. 180

rearrangement 16
reassembly 26

recA 108
receptor binding 23
recombination events 16
regulatory mutations 56
release from the phagosome 91
repressor-iron complex 243
requirement for mucinases 89
resistance to complement 209
resistance to host defenses 207
resistance to phagocytosis 209
restriction endonuclease 202
restriction endonuclease fragments 88
rpsL 81
rpsQ 81
RS1 106
R 6-5 208
R100 208

Salmonella arizona 189
Salmonella austin 189
Salmonella memphis 189
Salmonella sp. 185
Salmonella typhi 73
Salmonella typhimurium 170, 180, 183, 184,
 191
 secondary structure 23
 secretion 102, 105, 148
 secretory immune system 770
 semivariable regions 19
 sereny reaction 76
 serological variants of the K 88 fimbria 127
 serotypes 76
 serum resistance 208
 Shiga toxin 82
 Shigella 71, 210
 Shigella boydii 76
 Shigella dysenteriae 76
 Shigella flexneri 76, 86, 186, 188–190
 Shigella sonnei 76, 81, 85, 186, 189
 shuttle vectors 221
 sialyl transferase 201
 siderophores 181
 signal peptide 130
 silent loci 15, 20
 small K 88ab fimbrial subunit 128
 somatic mutations 20
 Southern blot analysis 205
 Southern blotting 212
 SpaA protein 265
 staphylococcal protein A 227
 staphylococcal pyrogenic exotoxin type C
 229
 staphylokinase 226
 starved opiated guinea pig 76
 strain 569B 101
 streptococcal erythrogenic toxins 228
 streptococcal M protein 228

- Streptococcus mutans* 253
Streptococcus pneumoniae 199
Streptococcus pneumoniae type III capsular polysaccharide 206
 streptokinase 227
 streptolysin 225
 structural gene for exotoxin A 57
 structural motifs 24
 structure and function of fimbriae 125
 subunit assembly 26
 subunit-subunit binding 127
 sucrose-dependent attachment 255
 sucrose-independent attachment 255
 sucrose-6-phosphate hydrolase 264
 sugar biosynthesis 207
 surface exclusion 208
 surface protein antigens 265
- tagatose pathway 263
 tandem repeats 106
 temperature-dependent production 124
 temperature-dependent regulation 123
 tenesmus 75
 terminal phospholipid 205
 terminator 122
 thermoregulation 174
 thyrotropin-releasing hormone (TRH) 245
 thyrotropin-stimulating hormone (TSH) 245
 Tn5 35
 tobacco mosaic virus (TMV) coat protein 24
 tox 103, 109
 toxR 109–112
 transcriptional activity 150
- transcriptional organization 172
 transformation 256, 261
 translational control 105
 translocation 202
 transport of fimbrial subunits 133
 transposons 268
 transposon Tn5 202
 traT 208
 tra Tp 210
 TRH surface receptors 245
 type-specific antigens 80, 254
- undecaprenol carrier molecule 205
 unequal crossing over 16
 urinary tract infections 154, 201, 211
Ustilago sphaerogena 180
- vaccine 92, 269
 V and W antigen 34
Vibrio cholerae 97
Vibrio cholerae toxin genes 148
Vibrio parahaemolyticus 73
 virulence 141, 199
 virulence assay systems 75
 virulence factors 199
- water-soluble glucans 267
 weak immunogenicity 200
 Western blot 40
- Yersinia* 30
Yersinia enterocolitica 31
Yersinia pestis 31
Yersinia pseudotuberculosis 31
