

Author Index Volumes 1–12

The volume numbers are printed in italics

- Alfintsev, G. A., see Ovsienko, D. E.: 2, 119–169 (1979).
- Bak, P.: Melting and Solidification of Epitaxial Structures and Intergrowth Compounds. 9, 23–41 (1983).
- Bauser, E., see Benz, K. W.: 3, 1–48 (1980).
- Benz, K. W., and Bauser, E.: Growth of Binary III-V Semiconductors from Metallic Solutions. 3, 1–48 (1980).
- Bonissent, A.: Structure of the Solid-Liquid Interface. 9, 1–21 (1983).
- Bruni, F. J.: Gadolinium Gallium Garnet. 1, 53–70 (1978).
- Burkhanov, G. S., see Savitsky, E. M.: 7, 107–148 (1982).
- Ciszek, T. F.: The Capillary Action Shaping Technique and Its Applications. 5, 109–146 (1981).
- Demianets, L. N.: Hydrothermal Crystallization of Magnetic Oxides. 1, 97–123 (1978).
- Demianets, L. N., Lobachev, A. N., and Emelchenko, G. A.: Rare-Earth Germanates. 4, 101–144 (1980).
- Dietl, J., Helmreich, D., and E. Sirtl: “Solar” Silicon. 5, 43–107 (1981).
- Dietze, W., Keller, W., and Mühlbauer, A.: Float-Zone Grown Silicon. 5, 1–42 (1981).
- van der Eerden, J.: Surface and Volume Diffusion Controlling Step Movement. 9, 113–144 (1983).
- Emelchenko, G. A., see Demianets, L. N.: 4, 101–144 (1980).
- Georgopoulos, P., see Knapp, G. S.: 7, 75–105 (1982).
- Gillessen, K., Marshall, A. J., and Hesse, J.: Temperature Gradient Solution Growth. Application to III-V Semiconductors. 3, 49–71 (1980).
- Haubenreisser, W., and Pfeiffer, H.: Microscopic Theory of the Growth of Two-Component Crystals. 9, 43–73 (1983).
- Heimann, R. B.: Principles of Chemical Etching – The Art and Science of Etching Crystal. 8, 173–224.
- Heimann, R. B., and Kleiman, J.: Shock-Induced Growth of Superhard Materials. 11, 1–73 (1988).
- Helmreich, D., see Dietl, J.: 5, 43–107 (1981).
- Hesse, J., see Gillessen, K.: 3, 49–71 (1980).
- Hesse, J., see Maier, H.: 4, 145–220 (1980).
- Heydenreich, J., see Neumann, W.: 7, 1–46 (1982).
- Honjo, G., see Yagi, K.: 7, 47–74 (1982).
- Huber, D., see Zulehner, W.: 8, 1–143 (1982).
- Karl, N.: High Purity Organic Molecular Crystals. 4, 1–100 (1980).
- Keller, W., see Dietze, W.: 5, 1–42 (1981).
- Kirillova, V. M., see Savitsky, E. M.: 7, 107–148 (1982).
- Kleiman, J., see Heimann, R. B.: 11, 1–73 (1988).
- Knapp, G. S., and Georgopoulos, P.: EXAFS Studies of Crystalline Materials. 7, 75–105 (1982).
- Lobachev, A. N., see Demianets, L. N.: 4, 101–144 (1980).
- Maier, H. and Hesse, J.: Growth, Properties and Applications of Narrow-Gap Semiconductors. 4, 145–220 (1980).
- Marshall, A. J., see Gillessen, K.: 3, 49–71 (1980).
- Morrish, A. H.: Morphology and Physical Properties of Gamma Iron Oxide. 2, 171–197 (1979).
- Mühlbauer, A., see Dietze, W.: 5, 1–42 (1981).
- Müller, G.: Convection and Inhomogeneities in Crystal Growth from the Melt: 12, 1–136 (1988).
- Nassau, J., see Nassau, K.: 2, 1–50 (1979).
- Nassau, K., and Nassau, J.: The Growth of Synthetic and Imitation Gems. 2, 1–50 (1979).

- Neumann, W., Pasemann, M., and Heydenreich, J.: High-Resolution Electron Microscopy of Crystals. *7*, 1-46 (1982).
- Osiko, V. V., Voron'ko, Y. K., and Sobol, A. A.: Spectroscopic Investigations of Defect Structures and Structural Transformations in Ionic Crystals. *10*, 37-86 (1984).
- Ovsienko, D. E. and Alfintsev, G. A.: Crystal Growth from the Melt. Experimental Investigation of Kinetics and Morphology. *2*, 119-169 (1979).
- Pasemann, M., see Neumann, W.: *7*, 1-46 (1982).
- Pfeiffer, H., see Haubenreisser, W.: *9*, 43-73 (1983).
- Ploog, K.: Molecular Beam Epitaxy of III-V Compounds. *3*, 73-162 (1980).
- Polezhaev, V. I.: Hydrodynamics, Heat and Mass Transfer During Crystal Growth. *10*, 87-147 (1984).
- Randles, M. H.: Liquid Phase Epitaxial Growth of Magnetic Garnets. *1*, 71-96 (1978).
- Savitsky, E. M., Burkhanov, G. S., and Kirillova, V. M.: Single Crystals of Refractory and Rare Metals, Alloys, and Compounds. *7*, 107-148 (1982).
- Schönherr, E.: The Growth of Large Crystals from the Vapor Phase. *2*, 51-118 (1979).
- Schwabe, D.: Surface-Tension-Driven Flow in Crystal Growth Melts. *11*, 75-112 (1988).
- Seidensticker, R. G.: Dendritic Web Growth of Silicon. *8*, 145-172 (1982).
- Sirtl, E., see Dietl, J.: *5*, 43-107 (1981).
- Sobol, A. A., see Osiko, V. V.: *10*, 37-86 (1984).
- Sugimoto, M.: Magnetic Spinel Single Crystals by Bridgman Technique. *1*, 125-139 (1978).
- Tairov, Y. and Tsvetkov, V.: Growth of Polytypic Crystals. *10*, 1-35 (1984).
- Takayanagi, K., see Yagi, K.: *7*, 47-74 (1982).
- Tolksdorf, W. and Welz, F.: Crystal Growth of Magnetic Garnets from High-Temperature Solutions. *1*, 1-52 (1978).
- Tsvetkov, V., see Tairov, Y.: *10*, 1-35 (1984).
- Voron'ko, Y. K., see Osiko, V. V.: *10*, 37-86 (1984).
- Voronkov, V. V.: Statistics of Surfaces, Steps and Two-Dimensional Nuclei: A Macroscopic Approach. *9*, 75-111 (1983).
- Wagner, R.: Field-Ion Microscopy in Materials Science. *6*, 1-115 (1982).
- Wald, F. V.: Crystal Growth of Silicon Ribbons for Terrestrial Solar Cells by the EFG Method. *5*, 147-198 (1981).
- Weber, H.-J.: Electrooptical Effects, Crystals and Devices. *11*, 113-192 (1988).
- Welz, F., see Tolksdorf, W.: *1*, 1-52 (1978).
- Yagi, K., Takayanagi, K., and Honjo, G.: In-situ UHV Electron Microscopy of Surfaces. *7*, 47-74 (1982).
- Zulehner, W. and Huber, D.: Czochralski-Grown Silicon. *8*, 1-143 (1982).

Crystals

**Growth, Properties,
and Applications**

Editor:
C. J. M. Rooijmans

Volume 3

III-V Semiconductors

1980. 92 figures, 9 tables. VI, 163 pages. ISBN 3-540-09957-3

Contents: *K.-W. Benz, E. Bauser:* Growth of Binary III-V Semiconductors from Metallic Solutions. – *K. Gillessen, A. J. Marshall, J. Hesse:* Temperature Gradient Solution Growth/Application to III-V Semiconductors. – *K. Ploog:* Molecular Beam Epitaxy of III-V Compounds.

Volume 5

Silicon

Editor: **J. Grabmaier**

1981. 156 figures. V, 199 pages. ISBN 3-540-10932-3

Contents: *W. Dietze, W. Keller, A. Mühlbauer:* Float-Zone Grown Silicon. – *D. Helmreich, E. Sirtl, J. Dietl:* "Solar" Silicon. – *T. F. Ciszek:* The Capillary Action Shaping Technique and Its Applications. – *F. V. Wald:* Crystal Growth of Silicon Ribbons for Terrestrial Solar Cells by the EFG Method.

Volume 6

R. Wagner

Field-Ion Microscopy

1982. V, 115 pages. ISBN 3-540-11712-1

Contents: Field-Ion Microscopy in Materials Science: Introduction. Principles of FIM Technique. Single-Atom Mass Spectroscopy in Connection with FIM. Applications and Results. Conclusions and Outlook. References.

Volume 7

Analytical Methods. High-Melting Metals

1982. V, 150 pages. ISBN 3-540-11790-3

Contents: *W. Neumann, M. Pasemann, J. Heydenreich:* High-Resolution Electron Microscopy of Crystals. – *K. Yagi, K. Takayanagi, G. Honjo:* In-situ UHV Electron Microscopy of Surfaces. – *G. S. Knapp, P. Georgopoulos:* EXAFS Studies of Crystalline Materials. – *E. M. Savitsky, G. S. Burkhanov, V. M. Kirillova:* Single Crystals of Refractory and Rare Metals, Alloys, and Compounds.

Springer-Verlag
Berlin Heidelberg New York
London Paris Tokyo

Springer

Crystals

**Growth, Properties,
and Applications**

Editor:
C. J. M. Rooijmanns

Volume 8

Silicon / Chemical Etching

Editor: J. Grabmaier

1982. VII, 226 pages. ISBN 3-540-11862-4

Contents: *W. Zulehner, D. Huber:* Czochralski-Grown Silicon. – *R. G. Seidensticker:* Dendritic Web Growth of Silicon. – *R. B. Heimann:* Principles of Chemical Etching – The Art and Science of Etching Crystals.

Volume 9

Modern Theory of Crystal Growth I

Editors: A. A. Chernov, H. Müller-Krumbhaar

1983. VII, 146 pages. ISBN 3-540-12161-7

Contents: *A. Bonissent:* Structure of the Solid-Liquid Interface. – *P. Bak:* Melting and Solidification of Epitaxial Structures and Intergrowth Compounds. – *W. Haubenreisser, H. Pfeiffer:* Microscopic Theory of the Growth of Two-Component Crystals. – *V. V. Voronkov:* Statistics of Surfaces, Steps and Two-Dimensional Nuclei: A Macroscopic Approach. – *J. van der Eerden:* Surface and Volume Diffusion Controlling Step Movement.

Volume 10

Growth and Defect Structures

1984. V, 150 pages. ISBN 3-540-13600-2

Contents: *Y. Tairov, V. Tsvetkov:* Growth of Polytypic Crystals. – *V. V. Osiko, Y. K. Voron'ko, A. A. Sobol:* Spectroscopic Investigations of Defect Structures and Structural Transformations in Ionic Crystals. – *V. I. Polezhaev:* Hydrodynamics, Heat and Mass Transfer During Crystal Growth.

Volume 11

Superhard Materials, Convection, and Optical Devices

1988. Approx. 200 pages. ISBN 3-540-18602-6
